Address and Presentation at Canoe Cove

On Monday evening, August 24th the Sisters and Brothers of both Lady Patricia and Derry Lodges and friends gathered to do honour and tender their respectful farewell to Mr. and Mrs. Neil MacCannell, Mr. and Mrs. Bus MacCannell and Wendell previous to their departure to make their home in Charlottetown.

Mr. Malcolm MacKenzie acted as chairman and in well chosen words explained the nature of the gathering. Master Gerald MacLean then presented Mrs. MacCannell with a lovely bouquet and Miss Christina MacNevin read an address while Mr. Dan MacLean presented a well filled purse.

Mr. MacCannell on behalf of the family then thanked all for their kindness. Fitting remarks were made by some of the men present. The next feature was a very dainty luncheon served by the ladies. The evening was brought to a close by singing "The National Anthem."

Following is the address: To Mr. and Mrs. Neil MacCannell and family.—We your Sisters and Brothers of the Orange Order and friends have gathered here tonight to express in some small way our love and respect for so loyal and valued members of our community. We assure you that we regret very much that you have decided to make your home elsewhere because during your long sojourn here all of you have truly exemplified the standards of Christian citizenship and we sincerely hope that your splendid example may have borne fruit by teaching all of us how fine a trait it is to stand always for what is just and right.

We can truly say that as neighbors you have been kind and generous and good, always ready and willing to help in any need or misfortune and in all deeds for the good and welfare of our community. We take this opportunity of congratulating you on the success you have achieved in raising such a splendid family whom we trust will continue to be a comfort and blessing to you throughout your lives.

And now while we regret your departure, we are glad to know that you will not be so far distant from us but that it will be possible for you to come back and visit us at any time and assure you that at any time, or all times you will be welcome in our homes or in our Lodge room.

In conclusion we ask you to accept this small gift as a token of the esteem that we feel for you. It is our hope and prayer that you may long be spared to enjoy in the fullest measure the happiness you so well deserve and at last hear the Master's "Well done good and faithful servants enter into the joy of the Lord."

Signed—Christine MacNevin Dan MacLean. (Patriot Please Copy)

THE PERFECT FOOD

No single food contains all the elements necessary for life and health, but milk is the most nearly perfect ration, and cannot be equalled by any other food in nutritional value. One of its virtues is its exceptional mineral content. It is the best source of lime, salts and calcium phosphate highly important in the physical structure. Many other helpful minerals are found in milk. Whether used by pigs or people, milk is a most valuable food.

Mrs. S., 469 Church Street, Toronto. Soap or Ointment 25c each, all drug stores. FREE sample write "Cuticura" Dept. B1, 256 St. Paul Street, W. Montreal.

THOSE LEVEL CROSSINGS—The Ottawa journalist's impressions of P. E. Island, reprinted in yesterday's Guardian, are at fault in at least one respect, namely the number of level crossings on the Bonaventure-Charlottetown highway. Instead of "seven level crossings in his first ten miles" as stated, there is but one.

SQUIRREL KILLS HAWK
(C. P. By Guardian's Special Wire) MELVILLE, Sask., Sept. 9—A duel to the death in mid-air between a hawk and a squirrel was related today by Ernest Heatherington, district farmer. His attention was drawn to the bird fluttering in clumsy circles, close to the ground, clutching a small animal in its talons. A moment later he saw a squirrel drag itself free, bleeding from many wounds, and drag itself to the first branch of a nearby tree. The hawk lay dead with a gaping wound in its throat.

FOR BUSINESS REASONS

Comfortable stalls, plenty of pure air, and water from which the chill has been removed, are three factors in milk production that the farmer cannot afford to overlook. Pure air is essential to the health of the cow and the production of uncontaminated milk. Pure water in plentiful quantity is as essential as food. Cows require large quantities at regular intervals. The man who is keeping cows and neglecting these essentials of handling cannot complain if he doesn't succeed. It may be safely asserted that any man who is so unfortunately constituted that he has no natural sense of obligation to his animals or pride in the appearance of his barn and premises, should for business reasons act along the lines recommended.

Any Time Is Playtime For World-Famous Dionne Children

SWEET CREAM

Good butter comes from good cream and from no other source, and cleanliness is the one essential in the production of good cream. C. K. Johns, of the Central Experimental Farm, who has made a long study of the factors that enter into cream quality, issues the warning that the temperature at which the unwashed separator bowl is held is one of the principal considerations. By flushing with two gallons of cold water immediately after separating and keeping the bowl where the temperature does not rise above 65 degrees Fahr., and again flushing with cold water before the next run, bacterial contamination can be reduced to a low figure. Flushing with hypochlorite practically eliminated contamination. Where the bowl is held overnight at 80 degrees Fahr., the flushing treatment is insufficient to prevent serious contamination although the bacterial counts for the hypochlorite treatment will be lower than for cold water flushing.

Though the Dionne quintuplets are busy making a new motion picture they have plenty of time to play, which they do with great gusto most of their waking hours. The picture shows: (1) Yvonne, with a happy smile for everyone and everyone; (2) There's nothing like a cool drink of water and a bit of bade after a hot day, according to Annette, Edie, and Emelie.

Hull Warns Against Warlike Tendencies

WASHINGTON, Sept. 9.—Warning against present warlike tendencies, Secretary of State Hull tonight called upon "the thinking people of each land" to stave off new hostilities lest civilization itself be destroyed.
In an address of welcome to the third world power conference which opened here today, the Secretary said that past wars provide no basis for judging the effect of future conflicts.
"If war comes upon us," he said, "it will be fought not alone by uniformed armies and navies but by the entire population of the countries involved. Airplanes, poison gas, and other modern fighting equipment of which we can only conjecture would make the world a veritable inferno."
Hull told the assembled delegates from 52 nations that "the fabric of peace has been worn perilously thin." He added: "A general war would set loose forces that would be beyond control—forces which might easily bring about a virtual destruction of modern political thought, with all its achievements, and possibly a veritable shattering of our civilization."
The pictures show: (3) other happy pose by Yvonne, (4) Left to right: Emelie, Yvonne, Annette, who seem to be doing a bit of scrubbing or something of a similar nature.—Copyright, 1936, Star Newspaper Service.
