

TREAT CONSTIPATION THE "BETTER WAY"

Stop "Dosing" Yourself! Get at the Cause Instead

LONDON, Canada (Maybe your constipation is the common kind, caused by lack of the proper "bulk" in your meals. If so, try the "Better Way" to treat it...)

Lindbergh Resigns as U. S. Colonel

NEW YORK, April 28—(AP)—Charles A. Lindbergh resigned today as a colonel in the United States Army Air Corps Reserve because, he said, his commander in chief—President Roosevelt—had implied certain things about "loyalty" to my country, my motives and my character.

Thus, the man who at 25 historically flew the Atlantic, became a world hero, and rose at once from captain to colonel, beseeched his government at 39 to return him to private life because he had "no honorable alternative."

In a letter to President Roosevelt, Lindbergh took exception to "implications" he said the President uttered concerning him at last Friday's press conference.

In this conference the President criticized the files and others who say the Axis powers will defeat Britain.

The President "clearly implied," Lindbergh wrote, that I am no longer of use to this country as a reserve officer.

He told his commander he was "greatly disturbed" and that he had hoped the might "exercise my rights as an American citizen to place my viewpoint before the people of my country in time of peace, without giving up the privilege of serving my country as an air corps officer in the event of war."

Neither President Roosevelt nor the War Department commented on the resignation.

Cardigan Head And Vicinity

Mrs. Peter Carter, 48 road attended the Ordination to the priesthood of her cousin, Rev. Parnell Wood at St. Dunstan's Basilica on Sunday April 20. The newly ordained priest is now the guest of Rev. Monsignor M. McDonald, Vernon River where he celebrated his first Solemn High Mass on Sunday April 27.

Mr. Herb McDonald is spending a short time at his home in Cardigan.

Mr. Billie McAulay, P.E.I. Highlanders, Nova Scotia arrived home Sunday afternoon at the funeral of his grandfather the late John P. McAulay, which took place on Tuesday morning April 22, to All Saint Church Cardigan.

Miss Regina Wood and Mrs. Elmer McLean, Mass arrived in Charlottetown Saturday evening April 19 to attend the Ordination of their brother Rev. Parnell Wood.

Messrs Patrick and Thomas Sanphy, Balwyn Road were recent visitors to Montague.

The roads are now open for motorists from Charlottetown to Cardigan and 48 Road Station.

Mr. Samuel Johnston returned home on Wednesday evening after spending the winter months in the lumber woods in Nova Scotia.

Miss Marion Sullivan, Charlottetown, spent a few days at her home in Cardigan Head and returned on Wednesday morning accompanied by her sister Miss Sadie.

Mrs. Joseph McAulay, Cardigan Head was a visitor to the city during the past week.

Battle of Britain booklet

This completes a Canadian Press series of stories based on the British Air Ministry's best selling booklet, "The Battle of Britain," which is to be published in Canada shortly by the Queen's Canadian fund for air raid victims.

(By H. M. Peters) (Canadian Press Staff Writer) On Sunday, Sept. 15, 1940, the German air force, after losing 70 planes in the morning gave London a mid-day lull of 1-2 hours, then returned to the attack in two waves, the first of 150 planes, the second of 100, states the Air Ministry's booklet, "The Battle of Britain."

Personals

Mrs. Catherine Nicholson, Dartington, spent the week-end in Hantsville, visiting Mrs. Douglas Sims.

Miss Gertrude Pollard, City, spent the weekend with her parents, Mr. and Mrs. Arthur A. Pollard, New Haven.

His Worship, Mayor B. Roy Holman of Charlottetown arrived home last night from Ottawa. He was in the Capital City attending the meeting of the Federation of Canadian Mayors and Municipalities. He was absent from the City for about two weeks during which time his place was taken by Deputy Mayor J. T. McKee.

One of founders Of St. Vincent Orphanage dead

QUEBEC, April 28—(CP)—Rev. Sister St. Patricia, directress of St. Brigid's home here for the aged and orphans and one of the founders of the St. Vincent de Paul Orphanage in Charlottetown, P.E.I., died yesterday.

(She was a member of the Sisters of Charity of Grey Nuns who were stationed in this province when the orphanage was opened in 1910. The order of Grey Nuns left Prince Edward Island in the year 1923. Sister St. Patricia was associated with the founders of the orphanage, Sister St. Elizabeth.)

As a practical contribution to the Nazi point of view, their bombers have now destroyed or damaged 2,659 churches of all denominations in England and Wales, apart from vicarages, convents, church halls and manse. Among the 714 which have been completely destroyed or seriously damaged are the cathedrals of Coventry, Llandudno and St. Paul's (although the main fabric of the latter remains untouched). Westminster Abbey, Westminster Cathedral, and the Deanery of Canterbury have all scars to show the meaning of "total war". No fewer than 108 vicarages, 304 church halls, 236 church schools, and 36 convents have all been wrecked.

The fact that this Nazi attitude to Christianity is not shared by all who live within the Reich may be inferred from much bigger attendances reported at Catholic and Protestant Churches and the increasing sale of the Bible to Germans, other than Nazis. It has gone up from 830,000 in 1930 to 1,525,000 last year.

Growing Toll of Britain's Churches

Official figures of the damage done by Nazi bombers to Church property in England and Wales comes on the heels of the affirmation of the Hitler creed in a home broadcast to German youth.

"This," the announcer declared, "is the Creed of our time: We believe in Hitler. And what of the old Creeds? The scriptures are dead. We need no fairy-tales today. Believing, we entrust our destiny to our Führer."

As a practical contribution to the Nazi point of view, their bombers have now destroyed or damaged 2,659 churches of all denominations in England and Wales, apart from vicarages, convents, church halls and manse. Among the 714 which have been completely destroyed or seriously damaged are the cathedrals of Coventry, Llandudno and St. Paul's (although the main fabric of the latter remains untouched). Westminster Abbey, Westminster Cathedral, and the Deanery of Canterbury have all scars to show the meaning of "total war". It has gone up from 830,000 in 1930 to 1,525,000 last year.

HOG OUTLOOK

The Canadian hog outlook for 1941 is marked by indications that marketings will show a further increase from a year ago, says the Current Review of Agricultural Conditions in Canada. A smaller increase will, it is expected, be shown in the last six months of 1941 in comparison with the first six months.

WINDSOR, Ont., April — Ordinarily Trans-Canada Air Lines uses modes of its aircraft for window display purposes. At least one of them has a new purpose in life as a target for anti-aircraft practice by the military. A local regiment has borrowed one to shoot at. Fortnately for the model camera guns will be used and not the real thing.

TOPNOTCH NAVIGATION

Off course only 24 miles on a 1,880 mile sweep is a sample of the topnotch navigation the R. A. F. coastal command is getting on its anti-submarine and convoy patrols. The chart of this long sweep is one of the proudest possessions of Flying Officer L. L. "Slim" Jones, D.F.C., of Saskatoon, formerly captain of a Short Sunderland flying boat and hero of half a dozen thrilling war episodes, now a transatlantic ferry pilot.

Donovan - Doyle Nuptials

A pretty wedding of interest to a large circle of friends both in Charlottetown and Montreal was solemnized on Monday, April 28, at St. Anthony's Church, Montreal, when Dorothy, eldest daughter of Mr. and Mrs. Dominic Doyle of this city, became the bride of Mr. John Donovan, son of Mrs. Frances Donovan and the late Jeremiah Donovan, Bulgrove, Ireland. The ceremony was performed by Rev. Fr. O'Brien.

The bride entered the church by the arm of Mr. Louis Tracey on the large number of guests who were tastefully attired in navy blue while accessories. She was attended by Miss Mae Donovan, sister of the groom, also groomed in blue with accessories in white.

The groom was ably supported by his brother Daniel. After the wedding the happy couple motored to the home of the groom where a delicious wedding breakfast was served to immediate relatives and friends of the contracting couple.

Amid the good wishes of their friends the newly wed departed by auto on a short honeymoon to Ottawa and other Ontario cities. On their return they will reside in Montreal where the groom is the proprietor of a flourishing taxi service.

Previous to her wedding the bride was tendered several miscellaneous showers by her friends where the latest fashions in wedding presents testified to the popularity of the young couple.

The Guardian joins with a host of friends in wishing the bride and groom a long and happy life. Mrs. Donovan heartiest felicitations.

FORMER P. E. I. LADY HEADS MARITIME CLUB

MONTREAL, April 28—(CP)—Mrs. George R. MacLeod was elected president of the Maritime Women Club of Montreal at the annual meeting Saturday. She formerly resided at Vernon Bridge, P. E. I.

Mr. Boulter Addresses Rotary Club On Farm Problems

Many people theorize about the farmer, picturing him as a sturdy independent man, enjoying to the full a life in the outdoors, an ideal life close to nature, said Mr. J. W. Boulter, Manager of the P. E. I. Potato Growers Association in speaking at a Rotary Luncheon yesterday.

Mr. Boulter went on to tell of some of the problems faced by the farmer. He must gamble with too much wet weather, drought, insects, blight, rust and a multitude of other troubles that may bring his labour to naught. If he wins and has a good crop ready for the market he has no way whatsoever as to what he will receive in exchange for his products. Since 1926, except for a few short periods, the prices received by the farmer for what he has produced have been brought into the portion to the price he has had to pay for goods he must buy. The discrepancy in 1940 amounted to 33 per cent. No constant could be adjusted in his manner of living to suit such a blow. Mr. Boulter declared, Nevertheless, our farmers carry on, in the hope that better times would come.

With regard to livestock, Mr. Boulter said he had information that 22 carloads of meat products had been brought into the Island last year, and he wondered what was being done by those interested in the improvement of this branch of farming to remedy this situation. It is "ridiculous" for a purely agricultural province to be importing meat products.

At the conclusion of his talk, Mr. R. E. Mutch asked if there was any answer to the problem of meat importation. Mr. Boulter replied that the knowledge of some unless the farmers would organize themselves so that their voice would have some weight with the powers at Ottawa. Mr. K. S. Rogers said he thought the problem was never concentrated among the farmers and enterprise among the business men. It should be possible to form companies to process the farmers' products here in the province.

At the conclusion of his talk, Mr. Boulter answered several questions as follows: asked by Mr. E. Mutch, thanked him on behalf of the club.

A letter was read from the Red Cross Committee for the purpose of \$1,858.15 from the Rotary Auction.

Officers for next year were nominated as follows: President, G. H. Ives; Vice President, R. H. Rogers; Secretary, Roy Oudmore; Treasurer, A. L. MacPherson; Directors, A. H. Mould, J. E. Sterns, and Dr. McIntyre.

Visitors were Laird Watt, Montreal, Jack Richards and George Walters, City.

Canada Streamlines Infantry To Meet Modern War Demands

(By Ross Munro) Canadian Press War Correspondent

SOMEWHERE IN ENGLAND, April 28—(CP)—Canada has streamlined her overseas infantry battalions and given them an arsenal of small arms to ensure that the old-line foot-sloggers will still be powerful when the Canadian corps gets into battle.

Even in mechanized warfare, thousands of infantrymen armed with Bren and Tommy guns, anti-tank and ordinary rifles, grenades and trench mortars, probably will form the backbone of an attack, supported by all the modern machinery of the rest of the corps.

As corps anti-invasion manoeuvres grow more expensive and complex, the divisional battalions carry more weapons and prove they're tough enough to go without sleep and food for long stretches. Beat without these regiments when the 1st Canadian division advanced to the invasion coast to repel an "enemy" played by units from the 2nd division and British regiments. The Canucks trudged 15 miles in attack formation on the last lap of the push to the beaches and assiduous cliffs.

Taken to a concentration area in troop-carrying lorries during the first 30 hours of the three-day exercise, the divisional battalions bivouacked along a 10-mile front. For a night and a day, a realistic battle raged to the coast. In villages, hills and fields the "enemy" was pressed back.

A western infantry regiment, holding a reserve position in an all-weather, infantry march, was ordered by Maj.-Gen. G. R. Pearkes, divisional commander, to "recapture" a village in the first attack.

A platoon crept into the outskirts of the town only to find the "enemy" had withdrawn.

Battle of Brains

"Battle of Brains" thirteenth film to be released by the National Film Board in the Canada Carries on series will appear in the theatres this week. The film is a picture of the scientist's contribution to the technique of modern war. Opening with sequences which emphasize the fatal mistake of planning a war in terms of the past the film shows how France was crushed in a war of movement which ignored the fact of Maginot Line. France fell because the British Commonwealth learned the lesson of mobility, and used the new technique or war to great effect in the African campaign.

In Canada today men are learning the essentials of mobile war. Canadian scientists are studying the new methods, and improving on them and the results in Canada fields is shown as a vital contribution to wartime needs. In the National Research Council, first line in Canada's chain of laboratories, scientists are examining under 250 machines, give specimens bars of steel a tensile test, test the strength of parachute silk. It is their function to see that Canadian equipment is made from Canadian materials.

Aircraft models are tested in wind-tunnels, aircraft engines are examined, desuperheated cylinders are improved for air force use. Master gauges for munitions production are provided from the Johnson blocks in the National Research laboratories.

Symbolic of this close cooperation between scientist and soldier was the appointment of Canada's number one scientist, Lt. Gen. A. G. McNaughton, President of the National Research Council as Commander in Chief of Canadian troops overseas. It is his responsibility, assisted by all the modern scientific equipment, to see that Canada is able to contribute, to see that Canada may be able to "outwit, outmanoeuvre, outfought and outlast" the worst that the enemy's malice and ingenuity can contrive.

French and English versions of "Battle of Brains" will be released simultaneously.

Anzacs Fought Mighty Battle Against Nazi Army

NEW YORK, April 28—(CP)—"into one of the fiercest continuous fires that this war has known, the Australian gallants fired a round almost every minute. No wonder the plains became the graveyard of dozens of German tanks and vehicles and hundreds of men. Through bomb and shell and machine-gun fire, these men stuck to their guns and they held resolute until the last round was fired."

"For more than a fortnight, a small Anzac force, backed by British artillery and tanks, has fought the whole of the German advance. But in spite of the enemy's strength the Anzac line was never broken. It turned the enemy's strength into the most difficult and dangerous stages of the withdrawal."

Willmott's dispatch continued:—"The Germans with their superiority in numbers were able to drive the forward troops and to bomb and machine-gun the lines of communication and smash the ports through which reinforcements were being sent. The Royal Air Force worked ceaselessly, with the few planes they had. They could have protected the front, or the roads, or the ports, but could not do all three."

"In spite of all this, the Anzac force fought a rear-guard action for 2 1/2 ghastly weeks. "After a night withdrawal from positions, a handful of Anzacs turned to face the enemy on sharply rising hills commanding a plain. Behind them, they had an ammunition dump of more than 8,000 25-pound shells and when the Germans came within range, they ran

valued at \$184,115,951 in 1939. The price of gold remained constant throughout 1940 at \$38.50 per fine ounce compared with an average value in 1939 of \$36.14. Silver output at \$245,715 fine ounces was valued at \$9,109,273.

The combined value of the base metals—nickel, copper, lead and zinc—was \$115,839,877, an increase of 14.36 per cent. The value of the remaining metals aggregated \$12,997,183.

Coal production reached 17,551,326 tons, an increase of 13 per cent. Natural gas at 39,654,000 M. cubic feet exceeded the previous year by 2.2 per cent, and crude petroleum totalled 3,717,545 barrels as against 7,826,801 barrels in 1939.

Clay products were valued at \$6,353,000 as against \$5,115,236 in 1939. Cement advanced 32 per cent to 7,559,948 bags. Lime production reached 710,682 tons compared with 552,200 tons. Stone output totalled 6,976,561 tons valued at \$6,455,096, while the sand and gravel output was approximately the same in 1939.

TURKEYS ON FARMS

Turkeys on Canadian farms to the number of 2,715,600, states the second bulletin on the December 1, 1940 live stock survey, showed an increase of 2.8 per cent on the 2,641,800 on farms at December 1, 1939. The large increase in Saskatchewan from 89,300 in 1939 to 1,013,300 in 1940, together with the increase of 1,700 in Prince Edward Island and 840 in Nova Scotia offset the declines in numbers in the other provinces.
