**TWO BROTHERS CAPTURE SHARK BARE-HANDED**

Oyster Fishermen Re-late Hand-to-hand Encounter With Sea Beast.

(C. P. by Guardian's Special Wire) TRENTON, N. S., Nov. 6—A story of two brothers capturing an eight-foot shark bare-handed in shallow water was told here today by fishermen returning from oyster grounds off Big Cove.

Verified by five, the tale went like this:

Two dories containing men looking for oysters came upon a dark bulk near shore and surrounded it. They prodded the 200-pound shark with sharp oyster hooks and beat it off for a time. Then it tried to capsize the dory by getting under its keel and heaving upward. Three times it failed in this, then gave up and attacked the other boat without success.

The shark was getting weaker and weaker as it continued its fruitless assaults and Jeff Gerrold jumped into the water and tried to grab the killer's tail. Swiftly it turned on him and before he could move the shark had ripped a long gash in the fisherman's rubber boot.

Attacks Boat

Without warning, the bulk suddenly rushed at one of the dories and frightened fishermen saw at once what they were up against. They prodded the 200-pound shark with sharp oyster hooks and beat it off for a time. Then it tried to capsize the dory by getting under its keel and heaving upward. Three times it failed in this, then gave up and attacked the other boat without success.

The shark was getting weaker and weaker as it continued its fruitless assaults and Jeff Gerrold jumped into the water and tried to grab the killer's tail. Swiftly it turned on him and before he could move the shark had ripped a long gash in the fisherman's rubber boot.

John Battle

Jeff's brother Bill joined the hand-to-hand battle just as the shark was turning for another charge. Between them they managed to grab the shark's tail and finally it died from suffocation and additional wounds from a sharp knife. But that was only after a tremendous struggle in which both fishermen while being held half in, half out of the water.

This was the story Jeff and Bill told when they got back in Trenton today. Their brother Fred, Stan Burns and Edward Beach, who were in the dories, swear it all true, and Warren Robertson claims he watched the fight from shore.

I FEEL LIKE A "TWO YEAR OLD" thanks to

**Escaped Convicts Relate Hardships**

BA, Dutch West Indies, Nov. 7.—Ten escaped convicts from French penal colonies in Guiana related to a group of 32 days under a Caribbean sun they spent in the open air, passed their parched lips with their hands, and their frail bodies were weak.

Three of their 32 days under a Caribbean sun they spent in the open air, passed their parched lips with their hands, and their frail bodies were weak.

Three of their 32 days under a Caribbean sun they spent in the open air, passed their parched lips with their hands, and their frail bodies were weak.

**Rain Causes Road Damage**

HALIFAX, Nov. 7.—(C.P.)—Incessant heavy rain for three days has washed out highways and railway roads in different parts of Nova Scotia and today officials of the Halifax and Southwestern Railway experienced difficulty in maintaining regular service.

The Halifax-bound train from Yarmouth was held up at Bridgewater after plowing through two and three feet of water in several sections. A local train leaving Matamoras took four hours to cover the eight miles between that station and Bridgewater.

Two work trains were dispatched to repair the roadbed. Several streets in Liverpool are flowing rivers. Between Lunenburg and Bridgewater the main highway is inundated in 14 places and motorists experienced great difficulty in getting through.

In Hantsport the rain was welcomed by the employees of the Hantsport Pulp Mills which were about to close down because of a deluge of the past three days has removed all fears of closing and instead gives an assurance of power for months to come.

Truro and other provincial towns suffering from a lack of water following a record summer of drought, also welcomed the heavy showers.

**IN MEMORIAM**

MRS. ELLEN JANE WALSH

The death occurred at the residence of Mr. Norbert Pierce, at Summerside, on November 1st, after a five days illness, of Mrs. Walsh, aged 72 widow of Capt. James Walsh.

Her maiden name was Ellen Jane Feehan and she was a daughter of the late Henry Feehan, of Fairview, P. E. Island.

Mrs. Walsh was a most estimable woman whose fine qualities of mind and heart greatly endeared her to all who knew her.

Her husband who died twenty-three years ago was a well known master mariner, commanding vessels owned by Peake Brothers of Charlottetown and making voyages to different parts of the world. His father, Capt. Michael Walsh, was another outstanding seaman.

Mrs. Walsh leaves to mourn one son, Henry James, and one daughter, Mrs. Wallace MacDonald, of Charlottetown, also three grandchildren and eight great grandchildren. Mrs. MacDonald's eldest son Cyril of the S. S. Cornwallis, is now following the sea and expects soon to get his master's papers.

Mrs. Walsh was laid to rest in the South Shore Cemetery, the funeral services being conducted by Rev. Father Fleming. The very large attendance at the funeral testified to the high regard in which the deceased was held.

Many spiritual bouquets were received.

**CONFIDENCE TRICK REVIVED**—The Guardian understands that the "Spanish Prisoner Confidence Trick" method of raising funds is at present being carried on through the mails. Apparently this means of preying upon the public has been in operation for generations. All persons receiving letters from addresses in foreign countries and purporting to offer large sums of money to the person written to should be ignored and the letter in each case passed to the authorities for investigation.

**ISLANDER TO CONTEST**—Alderman J. F. Semple of Chilliwack will be the Liberal party's standard bearer in Fraser Valley riding in the forthcoming federal election. Mr. Semple received the party nomination by a majority of nine votes at the Liberal party's convention held in the Canadian Legion hall Saturday. The count on the final ballot was Semple 138, Conley 129. The candidate elect is a member of the Fraser Valley Relief Committee. He is also president of the Chilliwack Board of Trade, and vice president of the Fraser Valley Union Library. A native of Chilliwack, B. C., Mr. Semple came to Chilliwack 27 years ago and has been an active member of the community since that time—Chilliwack Progress. (The Mr. Semple referred to is a native of Chilliwack, B. C., and is not the same as the young woman stated Sir Frederick Whyte, former president of the Legislative Assembly of India and later political adviser to the National Government of China. Sir Whyte's address is the Women's Canadian Club on "The Mind of Asia.")

Her friends will be glad to know that Miss Rheta Judson, who underwent a successful operation in the P.R.L. Hospital performed by Dr. Acker a few days ago is doing as well as can be expected.

**Extensive Advertising Campaign To Further Inter-provincial Travel.**

(C. P. by Guardian's Special Wire) OTTAWA, Nov. 6—Canada's tourist industry was on the upgrade and the Federal Government was behind the industry to the fullest extent, Dr. R. J. Manion, Minister of Railways and Canals today told the first nation-wide conference of tourist executives sponsored by the Government (The Canadian Travel Bureau, the Government's newest department) which was held in Ottawa, Nov. 6.

Advertisements in Canadian newspapers and magazines would be utilized to promote inter-provincial tourist travel next year. The campaign carried out by the Government since it was started last August it was stated had shown the value of newspaper advertising in promoting tourist traffic. Autumn travel had been greatly stimulated by the bureau's activities, adding hundreds of thousands of dollars of revenue to the many avenues of trade directly and indirectly influenced by the tourist industry.

Confer With Government

Officials of the provincial bureaux, representatives of transportation companies, the directors of municipal tourist bureaux and representatives of private organizations interested in tourist activity met with the officials of Government departments having contact with the industry.

The Canadian Association of Tourist and Publicity Bureaux presented a resolution to the conference that a nation-wide survey of the industry be made by D. Leo Dolan, director of the Canadian Travel Bureau, aided by other experts, and that the Federal Government's co-operation with the industry be placed on a scientific basis. The survey would also be made the basis of the Government's bureau's 1935 advertising campaign, necessarily of a broad nature covering all of the Dominion from the Atlantic seaboard to the Pacific coast.

Senator W. H. Dennis, Halifax, Chairman of the Senate committee which made the recommendations to Parliament that resulted in the Canadian Travel Bureau coming into being, stated that the title of the Department of Railways and Canals should be broadened to include the word "tourist." The importance of the industry demanded this, United States tourists to Canada in the summer season of 1934 spent \$150,000,000. The Canadian Travel Bureau was in this department and was responsible to its Minister.

Outline Problems

The officials of each provincial tourist bureau and of municipal bureaux outlined to the conference their individual problems and these were taken under advisement.

D. W. Griffith, New Brunswick bureau director, requested that particular emphasis be placed on hunting and fishing in tourist advertising, as the hunter and fisherman spent a relatively large percentage of the expenditure made by tourists coming to Canada.

A. Bergeron, Deputy Minister of Highways for Quebec, stated that this Province was most gratified by the implementing of the Senate tourist committee's recommendations. There was no question but that the Federal Bureau's campaign was on broad national plans which was highly satisfactory.

J. O. Hamilton, director of publicity for Ontario, asked that the Federal Bureau's advertising be tied with that instituted by the Provinces. Also, that the customs regulations on firearms brought in to Canada by hunters from the United States be relaxed.

Inquiries from potential tourists coming to the Canadian Travel Bureau were passed on to the various provincial bureaux on a geographical basis. D. Leo Dolan, Federal bureau director, told the conference.

**TOURIST INDUSTRY ON UPGRADE**

Charles H. Webster, commissioner of publicity for Vancouver, gave the conference a detailed picture of the tourist industry on the Pacific coast. United States automobiles entering Canada via British Columbia in the fiscal year ending March 31, 1934 numbered 108,863. These carried 359,248 passengers. Canadian cars passed from British Columbia to the United States. During the same period 140,451 United States cars entered Canada through British Columbia ports numbered 188,877 cars. These carried 605,568 passengers. During this period Canadian cars going from British Columbia to the United States totalled 140,451. The balance of tourist traffic which had favored Canada in 1930 had been unfavorable in the 12 months ending March 31, 1934. It was emphasized by Mr. Webster. Co-operation of all Canadian agencies and vigorous advertising would place this balance of tourist traffic back where it was in 1930.

**CANADIAN FARMERS' BUSINESS ORGANIZATION**

Farmers' Business Organization in Canada is the title of the latest bulletin issued by the Dominion Department of Agriculture. Since one of the purposes for which the Economics Branch of the Department was established was to study the farmer's co-operative movement, it was felt that the first step to be taken was the acquisition of all the information possible on the activities of such agencies in Canada. To this end arrangements were made for a survey of existing organizations.

Information was sought from all farmer-owned and controlled associations, companies, societies, and clubs actively engaged in business, regardless of their methods of operation or form of organization. The information thus obtained has been summarized and will be found in the 64 pages of the bulletin. It is expected that a similar survey will be undertaken annually, or at intervals of a few years, and that the information will form the basis for a permanent record of co-operative activities. The bulletin may be obtained on request from the Publications Branch, Dominion Department of Agriculture, Ottawa.

**Gold Discovered Where Assyrians May Settle**

(C. P. by Guardian's Special Wire) GEORGETOWN, British Guiana, Nov. 6—A grizzly old prospector-rancher rolled into Georgetown today with 11 ounces of gold in his belt, the result of the first discovery of that precious metal in the Rupunini district of British Guiana where some 5,000 Assyrians may settle in the near future.

The discovery was made in an area that had been offered recently by the Colonial Government for the colonization of Assyrians "tired of religious persecution" in Iraq. The offer was the result of a request made through the British Government from the League of Nations.

A commission from Geneva is now in the area investigating its suitability as a future habitation for the disheartened Assyrians occupying the land which once constituted the ancient Babylonian Empire.

**Do Without Food In Better Homes**

(By The Canadian Press) WINNIPEG, Nov. 6—"Before effective maternal welfare services are established, an intelligent public opinion must be created to ask for those services and to use them when they are obtained. Government can do little in advance of public opinion, you know! It is here that you, as the Local Council of Women, can do much; you are an influential representative of many different clubs in the city."

So did Dame Janet Campbell, M. D. visiting British health specialist on child and maternal welfare, explain to the Local Council of Women when they could do to promote the work.

Something of the rapid advance effected in maternal care was indicated by the speaker, who declared that when she was a medical student she had never heard of prenatal care. It was only since the war that this side of maternal care had developed, she said.

In answer to questions put by council women, the British doctor stated that housing in England had been one of the chief responsibilities of the ministry of health, the department from which she retired as senior medical adviser 10 months ago. "In getting rid of the slums the problem is where to put the people while new houses are being built. The people, we have found, like to stay where they are. The new houses, being built by thousands just outside of congested town areas, are more expensive to live in; add the cost of transportation to and from the cities, and the result is that people must cut down on something, and food is what they have chosen. The very practical point is that the people can't afford to live in the new houses and also buy good food," was the speaker's opinion.

Although the mineral content of honey is very small, it is worth noting, says the Dominion Apiarist, that such elements as lime and iron, necessary to the well-being of the human body, are present.

**Madam "Old Dutch" Stages Limerick Contest**

\$5.00 For Each Lucky Winner

Popularity contests are all the rage today and the makers of Old Dutch Cleanser have taken advantage of the modern trend by initiating a Limerick contest in connection with their popular product.

All a competitor has to do is to write a limerick about Old Dutch Cleanser (or a reasonable facsimile) and send it to the makers. \$5.00 will be paid for each limerick published in a Limerick about Old Dutch Cleanser which has equal chance of being a lucky winner.

Considering that the little Old Dutch lady with the big stick is so outstandingly popular with housewives everywhere, as a sign of helpful cleanliness and a time and money saver, there is no doubt that the Limerick Contest will attract a host of competitors and widely cherished poems in praise of Old Dutch from all over Canada. Particulars about the contest are now being published in this paper.

**IN MEMORIAM**

MRS. MARGARET BETTS

Mrs. Margaret Betts, widow of the late Martin Betts, of Summerside, P. E. Island, passed away on the 28th of August, 1934, at the age of 86 years. She was a daughter of the late John Martin and Emily Compton, his wife of Newton, this province, and is survived by one brother, James Martin of Portland, Oregon, U. S. A. She also leaves the following family: Ruth, wife of John MacDonald, of New Dominion, Joseph Martin, of Cambridge, Ontario, the homestead, Silas of British Columbia, Arthur of Chicago, Alexander of Vancouver, B. C. and Reuben of New Dominion, P. E. I. One daughter, Emily, wife of Archibald MacDonald of Nine Mile Creek, passed away some years ago, and one son, William, has not been heard from for several years.

Mrs. Betts held a place of high esteem in the hearts of the people who knew her. She was a sincere Christian woman and brought a great measure of comfort as well as a tender nursing instinct to the many afflicted ones to whom she was so kind and caring, and many there are who shall long remember her with true appreciation. After her husband's death her health began to fail and her weakened body could not respond to the desire to continue her work of love to the members of her home. She was a consistent member of the Church of Scotland, and her life of deep devotion and praise was a living testimony of the love of God in Christ Jesus her Lord and in her behalf.

The funeral was held on the afternoon of August 28th, when a large number of people gathered from far and near to pay tribute to the memory of one whom they loved and respected.

Rev. Ewen MacDougall conducted the services and the remains were laid to rest in Argyle Shore Cemetery. The pall bearers were six of her grandsons.

**IN MEMORIAM**

MRS. MARGARET BETTS

Her friends will be glad to know that Miss Rheta Judson, who underwent a successful operation in the P.R.L. Hospital performed by Dr. Acker a few days ago is doing as well as can be expected.

**NORTH BEDEQUE SCHOOL**

Teacher—Mary MacCaull

**Snake Venom May Aid Haemophilia Cases**

LONDON, Nov. 5.—The venom of snakes may possess mysterious properties helpful in the treatment of haemophilia, it was indicated today by the researches of two British physicians.

A new treatment for the disease—an uncontrollable bleeding from which the sons of former King Alfonso of Spain are suffering—was described in The Lancet, English medical journal, by Drs. R. G. Macfarlane and Burgess Barnett.

The physicians based their study of the hitherto incurable malady on the knowledge that the poison of many snakes causes blood to clot. After numerous tests they found the venom of the viper to be most effective for their purpose. From this they developed what they believe to be a safe technique in the treatment of the disease.

**Pile Sufferers**

Can You Answer These Questions?

Do you know why external remedies as applied to sore and painful Piles are only local in effect and do not reach to true circulatory cause? Why Piles may "come back" even after a first removal by cutting? Do you know the cause of Piles is internal? That there is congestion of blood in the lower bowel—the veins flabby, the parts lifeless? That there is a harmless internal remedy for itching, bleeding or protruding piles discovered by Dr. Leonard, known as HEM-ROID and sold with your money back if not joyfully satisfied with the help one bottle gives? HEM-ROID banishes piles by relieving congested circulation and helps to heal and restore the sore surfaces.

HEM-ROID is so successful in every the most stubborn cases that Hughes Drug Co., also Taylor Drug Co., of Kensington and other drug stores advise every sufferer to get a bottle of HEM-ROID Tablets today—take them as directed—then if not completely satisfied with results your money back.

**THE STOMACH BLOOD AND SKIN**

**Took Too Much For Her Cycle**

(By The Canadian Press) LONDON, Nov. 6.—Thirty-one years ago the villagers of Hatley Cocksayne, Bedfordshire, attended a sale of the household effects of the rectory, and among them was a girl who bought the bicycle belonging to the late rector's daughter.

Later, the rector's daughter, Miss Florence Brickwell, was seized with remorse because she considered that she had received too much for the machine. After the sale she moved to Sandown, Isle of Wight, where she died last March, aged 85.

And in her \$60,000 will, she left \$25 to her executors "to pay the same to the girl, if she can be found, who purchased my bicycle at the sale of the rectory effects. But inquiries made in the village revealed that the girl who bought the bicycle is dead.

**Saar Plebiscite In January**

(C. P. Cable) (By Guardian's Special Wire) LONDON, Nov. 6.—The British government is confident the Saar plebiscite can be carried out next January in an orderly fashion, and has never contemplated the necessity of sending British troops to that region, the House of Commons was told today by Sir John Simon, Foreign Secretary.

The Minister was interrogated in view of reports the French government has concentrated detachments near the border of the rich little industrial territory, ready to send forces in should the League of Nations governing commission request assistance in keeping order.

Sir John declared the British government had been assured by the German Ambassador here that there was no danger of an invasion of the Saar, which is to vote Jan. 13 on whether it shall return to Germany. She was unconscious today, and whether it shall return to Germany, the physicians declared should not recover.

**PROTOTYPE OF CARROLL'S ALICE IN WONDERLAND STRICKEN IN ENGLAND**

WESTBHAM, Eng., Nov. 6.—Alice Liddell Hargreaves, immortalized as the original of Alice in Lewis Carroll's "Alice in Wonderland," was reported dying today.

Eighty-two years old, she was stricken ill suddenly while riding in an automobile 10 days ago. She was unconscious today, and whether it shall return to Germany, the physicians declared should not recover.
