In fond and loving memory of a dear husband and father, Peter A. Morrison, South Granville, who was called home August 31, 1947. August brings back sad memories or six years ago today. When one of the very best fathers was sweetly called away. We left us for the blessed land that knows no grief or pain. And we have God's own promise that we'll meet him again. Ever remembered by his wife and family.

New Spencer Company

Motion Picture Theatre For Woodstock, N. B.

At a recent meeting of the Woodstock, N.B. Town Council, a resolution was passed granting a request of Mr. F.G. Spencer, head of the F.G. Spencer Co. Ltd. of Saint John, for a fixed valuation on their new property on the site now occupied by the Central Hotel.

With the granting of this request the Spencer Company is to start construction on a new motion picture theatre sometime before May, 1948.

In response to questioning, Mr. G.A. Walters, manager of the Spencer theatres in Charlottetown, explained that the Company fortunately has no tenant problem to solve in Woodstock—quite a contrast to the situation in Charlottetown in connection with the large property next to the Capitol theatre here, which the Company acquired two years ago for the purpose of building a new theatre. Mr. Walters expects that the problem will shortly be satisfactorily solved.

DUPLESSIS TIGHTENS

(Continued from Page 1) the Northern Abitibi region of Quebec.

He said today all knowledge of the station had been disclaimed by Federal authorities and some newspapers had inferred there was no truth in the assertion. It had been confirmed, he said, by a brother-in-law of the station operator—Jacques Rouleau, an editor of the Communist newspaper *Le Combat* and obviously "himself a Communist" who had disclosed he had made application to Federal authorities several weeks earlier to have the licence transferred to his name.

But still, Mr. Duplessis added, Federal authorities disclaimed knowledge of the station. The censorship of 16 mm. films the type generally used for home projection was being imposed to suppress abuses currently existing and to prevent further ones, the Premier said.

British Operate Experimental Atomic Pile

By John Dauphinee LONDON, Aug. 29 (CP)—Britain's first atomic pile for the release of continuous atomic energy is functioning at Harwell near Oxford in Berkshire.

At 1 p.m. Aug. 19 "chain reaction" started and a metal damper was dropped between uranium rods to slow down the atomic activity to a point where it could be controlled.

The small experimental pile is reported producing enough energy to supply a large apartment block with light and power if the heat developed were converted into electricity.

The first electricity-generating plant which will be built within five years.

The announcement that the pile is working was made at the "swords into plowshares" meeting of the British Association for the Advancement of Science at Dundee, Scotland—20 months to the day after Prof. J.D. Cockcroft, former director of the Canadian experimental atomic energy plant, was named by Prime Minister Attlee as director of the Harwell establishment.

It took a year to build the shell of Britain's first atom machine, a big block of graphite, or pencil lead, surrounded by thick concrete shields to trap dangerous radiation. It was the best out of two play-off series in the Knights of Columbus Girls' Softball League by a score of 19 to 15 and are once again champions of the Centre.
