

THE KING OF OUT-OF-DOORS

Walking one mile on the pedals of a bicycle will carry the rider six to nine miles anywhere out-of-doors. Bicycles are not only better but cheaper than ever before.

(The rigid frame bicycle, the standard model is lighter, stronger and more comfortable to ride than it used to be. There are no repairs to be made to the modern bicycle.)

Massey Harris and Cleveland Bicycles.

**Cushion Frame,
More Comfort.**

**Coaster Brake,
Less Work.**

(A boy in Claybank, Ontario, said: "You may ride down a stoney hill on a cushion frame bicycle, with your pockets full of apples and they won't shake out." That is not saying too much for the cushion frame. Neither is it too much to say: "It's no use to go out on a cushion frame bicycle to find a rough road." The cushion frame takes all the ruts out of the road.

(The Morrow Coaster Brake makes coming down hill safe, swift and easy. A backward pressure on either pedal disconnects the hub of the pedals so that the wheels turn without working the chain or pedals. A hard backward pressure on the pedal puts on a brake that brings the wheel up quickly. The Coaster Brake makes a bicycle a wheeled toboggan for coming down hill. The Morrow Coaster Brake may be attached to any bicycle.

If you have never ridden a Cleveland or Massey-Harris, cushion frame, coaster brake bicycle, you have never known the real pleasures of wheeling.

Gasoline Automobiles for all Canada.

(The made in America automobile is now recognized as a most serviceable, reliable and available machine. We supply all Canada with "made in Canada" and made in the United States Automobiles gasoline and electric power.)

Runabouts of seven to ten horse power, touring cars twenty-four to forty horse power. Agents for the Packard, Peerless, Thomas, Autocar, Stevens-Duryea, Ford and Ivanhoe electric.
