

**Diarrhoea, Dysentery, Summer Complaint, Stomach Cramps, Colic, Cholera Morbus, Cholera Infantum, and all Looseness of the Bowels**

MAY BE RAPIDLY AND EFFECTUALLY CURED BY THE USE OF THAT OLD AND STERLING REMEDY.

**Dr. Fowler's Extract of Wild Strawberry**

It has a reputation of 65 years' standing and never fails to either relieve or cure.

There are many imitations of this remedy on the market that sell for less per bottle. Dr. Fowler's is 35 cents, so be sure and get the genuine. The cheaper articles may be dangerous to your health.

**SUMMER COMPLAINT AND DIARRHOEA**

Mrs. GEORGE PHILLIPS, Sault Ste. Marie, Ont., writes: "My baby one year old took the Summer Complaint, and was so bad as to pass blood. I got a bottle of Dr. Fowler's Extract of Wild Strawberry and only had to give a few doses before my baby was cured. My husband had diarrhoea and three doses cured him. I have used it in my family for over three years with great results and feel safe in recommending it to everyone for all kinds of Summer Complaints."

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

**2 IN 1 SHOE POLISH**

Shines like the sun. Is waterproof and permanent. Feeds and preserves the finest leather. Will not soil the daintiest garments.

No other even half as good.

WEDNESDAY.

**RECENT ACHIEVEMENTS IN AVIATION.**

Santos Dumont years ago set the pace in dirigible balloons. He was a Brazilian by birth but a Frenchman by adoption. Other young men of France are now distinguishing themselves in overseas, international flying, making new world-records in flying without balloon support. The present month will be always memorable for the successful crossing of the English Channel with machines that are self-supporting.

On July 19 Herbert Latham in his little monoplane started to fly from near Calais to Dover. He sailed away from the high cliffs and at a height of 300 feet above the sea was making fine progress, till about half way across, when from some reason his motor failed and he came down. But his machine was unsinkable, and he had a life-belt on. When a torpedo boat reached him he was coolly smoking a cigarette as he floated in the calm sea. His flying machine was saved with little damage, and he will try again.

The palm of victory, however, fell to another young Frenchman, Louis Bleriot, who successfully made the trip all the way across, just one week after Latham's failure. His machine, is even smaller than that of Latham's and is described as a mere toy compared with the broad and bulky flyers of the Wrights and others. This fact is important in many ways. It is a noteworthy fact in nature that some birds whose flight is very swift have but small wings.

The world will be talking of this first flight across the English Channel perhaps hundreds of years hence. Hereafter in the near future it will become a common occurrence, and we shall have records of shorter and shorter time for the flight. There are those who sometimes speak of France as decadent, but the achievements of her sons in civil and mechanical engineering, in submarine and aerial navigation, to go no further, still challenge the admiration of the world. The British people gave a hearty and admiring welcome to the young French aviator. Had he been a German it might have been otherwise.

A recent trip to the mainland shows that having is only beginning and is much less advanced than in our own Province.

A far-away subscriber to The Guardian sends a clipping from a newspaper which tells that the town of Seny, Georgia, has passed an ordinance prohibiting the use of automobiles within the town limits. Our correspondent wants this fact printed as there may be some consolation in it for Prince Edward Islanders.

THURSDAY.

The St. John Standard, the young and vigorous conservative organ in St. John, has some good words in favour of the Tunnel, to which it says the Island people are entitled. The Sackville Post, which also favours the Tunnel, says we should secure a flying machine on the Capes.

Mr. Roosevelt had an exciting and perilous adventure in Africa a few weeks ago. He was in a row boat on a lake, pursuing a calf hippopotamus, when suddenly the boat was surrounded by several giant hippos who rose up out of the water and made a furious attack. His two negro servants were paralysed with fright and covered in the bottom of the boat. The monsters got beneath the boat and raised it out of the water. Mr. Roosevelt with well-directed rifle balls, killed two of the biggest hippos and the rest fled. It was 3 o'clock in the morning before he and his assistants made the shore towing their dead trophies with them.

FRIDAY.

UNITED STATES TARIFF DELIBERATIONS.

For more than four months the United States Congress has grappled with tariff revision and the end is not yet. The House had its bill, and the Senate its bill, the latter the higher and the more extreme. It has looked all along that the ultimate result would be a revision upwards, and that is still probable. But behind the two Houses is the President, who is understood to demand concessions, notably that hides shall be placed on the free list, and with an implied threat that if concessions are not made he will veto the bill. Late word from Washington is to the effect that the President is immovable and the Senate will not yield. So it looks like a deadlock. The people, if they could have their way, which they cannot in either the United States or Canada, would lower the tariff schedules all along the line. But the protected interest seem all-powerful in Congress and in our Parliament alike.

An American statistician is reported as estimating that by 1920 the United States will have reached a population of 100 millions and Canada eight millions. It seems probable that Canada, at least, will live up to the estimate.

Sixty thousand Prince Edward Islanders are said to be located in Massachusetts alone, and the total of Islanders now in the United States and the Canadian west is greater than our home population. There is something wrong where such conditions exist.

The Patriot argues that it is useless for the Dominion to supply a new and powerful winter steamer without a change of terminal on the other side. It adds: "No ship that could be built can go through the blockade in Picotou harbor after the ice has grounded in the entrance there." True, oh king! And a splendid argument this is for the Tunnel.

The latest new explosive is nitrocellulose. When quite damp it is not dangerous, but when dry the touch of a feather-tip, the fall of a grain of dust, or a fly walking over it will cause it to explode. And compared with the force of the explosion, dynamite is mild and gunpowder harmless.

The by-election in Bedouque District is appointed to take place on August 18. The Party of Progress has the Liberal standard bearer. He is a strong and resolute fighter, but will be heavily handicapped by the "pound of flesh," and the hostility of his party to the Tunnel. It may also be doubted whether the Tatamagouche project will prove very helpful. It is unfair to the gallant Tunnel advocate that he should be loaded down in this way.

**BORN.**

MCINTOSH--At the Manse, North Bedouque, on July 13th 1909, to Rev. M. H. and Mrs. McIntosh, a son.

COOKSON--At Elizabeth New Jersey on the 26th inst. to J. S. and Mrs. Cookson a daughter.

MUTCH--At Port Arthur, on July 3, 1909, to William and Mrs. Mutch, a son. Congratulations.

**MARRIED.**

HOUSTON--BULMAN--At Cavendish, July 26, 1909, by the Rev. John Stirling, Margaret Laura Houston, and William Benjamin Bulman, both of New Glasgow.

TAYLOR-JACKSON--At the Baptist Parsonage, Murray River, P. E. I., July 15th, by Rev. Jas. B. Hogan, Nathaniel Taylor of Lower Montserrat to Bella Jackson of Murray River, P. E. Island.

HAMILTON-MILLER--On the 14th July, at the residence of William Miller, Summerside, his daughter, Miss Annie Maud, and John T. N. Hamilton of River Charles, N. B. were united in marriage by the Rev. J. Howe Kirk.

**DIED.**

WRIGHT--At Cherry Valley, July 17th, Henry Wright, aged 51 years.

RODD--At Dorchester, Mass., July 12th, Gordon, only and dearly beloved son of George and Katie Rodd, aged 16 years, 5 months. Formerly of this City. Other papers please copy.

CARR--In this City, July 29, 1909, Minnie May, aged 16 years, daughter of the late James Carr, leaving two brothers and two sisters to mourn.

**HORSE NOTES.**

The Royalty Bred Clydesdale Stallion Craichmore will be found at his owner's stable at Granville after Monday July 26th.

Isabel McGregor, the great brood mare, owned by Frank Beales, City, dropped a foal at McKays farm, St. Peter's Road on Friday morning. This is one of the best if not the best foal in the Dominion ever. Dam Isabel McGregor trial 2.16, half in 1.08, quarter in 30 seconds, by Robert J. McGregor. Sire Pilot Medium Jr. 2.02, the world's record to date. Mr. Beales thinks that this colt, Pilot McGregor, will make as good a stock horse as George Cresceus, (3) 2.27.

**FORTUNE.** July 27.--Mr. Handersharp, Miss Sharp and Miss Adams of New York arrived in Bay Fortune Friday evening to spend the summer. While here they will be guests of Mr. Wagner and Mr. Myers, at the Flockton Cape Cottage.

William H. Townsend of Rollo Bay while hauling his salmon net, found in it a beautiful sea trout which weighed ten pounds, the largest trout ever known to be captured in these waters.

Dr. Ben Bourke of Fortune has made some fine catches of trout lately. The Doctor says there is a better place for an angler to spend the summer months than in Fortune Bay.

John McKie of Little River, who arrived in Fortune from Boston recently was visiting in Fortune Sunday.

Harvey B. Hughes of Hyde Park, Mass., arrived at Charlottetown, Tuesday night, July 20th, on a two weeks' vacation. He spent one day viewing the city and enjoying the many beauty spots, thence to Bay Fortune, taking in the Baptist Sunday School picnic at Morell, accompanied by his cousin, Mrs. Pearl E. Cook of Charlottetown. He will reside at C. H. Dinwiddie's summer cottage at Bay Fortune, during his stay here. Mr. Hughes is in the employ of the Employer's Liability Assurance Corp. Ltd., at Boston, holding the position as chief clerk in the Fidelity and Burglary Dept.

During the full moon tides of July large sea trout come in the harbor and go up the Fortune river to the brooks above to spawn in the shallow waters, coming down shortly after. This year only numbers of small trout have come back. Why--a small trout can go through the meshes of a net a large trout can't. At this rate trout fishing must soon die out in the Provincial waters. Will the sporting men who enjoy landing the large sea trout let this continue?

**GLACE BAY.** July 23--(Special)--The explosions have had attention here for the past two days. While much noise was made both by the explosions and the press, the actual damage was slight.

The Simpson house at Reserve has assumed its usual appearance; repairs having been effected in 24 hours. The total damages to the house cannot exceed \$25.

The actual damage to the house at Gardner is less than one dollar.

**Proven Quality**

Fullest assurance of obtaining silver of beauty and proven quality is yours if you ask for "1847 ROGERS BROS."

Recognized everywhere as the world's standard in silver plate.

The Business of This Place is to Raise Salaries

**Do You Want Congenial Work With More Salary?**

If you are one of the really ambitious and want to earn more money and succeed in life, cut out, fill in, and mail to us the below coupon. We will show you how you can fit yourself easily and quickly, in your spare time, to get more money in your present position, or change to a more congenial and better paying occupation.

Mind, the sending of this coupon does not obligate you to pay one cent. It simply gives the I. C. S. the opportunity of proving how easy it is for you to improve your condition right at home, without neglecting your present work.

The I. C. S. has taken a day laborer and qualified him as an electrician, with a salary of \$3000 a year. It has taken a brick-layer and qualified him to become a building contractor with a business of his own of \$200,000 a year. It has taken a sailor and qualified him to start a business worth \$175,000 annually. It has taken tens of thousands of men and women of every age and in every walk of life and in a few months, qualified them to double, triple, or quadruple their salary.

Go where you will, you find in high positions men who have risen from the ranks solely by the help of the I. C. S.; men who were earning but a dollar a day; men with wives and children to support; men with no education, but the ability to read and write.

Go where you will, you find these men to-day as Foremen, Superintendents, Managers, Engineers, Contractors, Owners. Their success reads like roman; and yet it is all readily understood once you know how easy the I. C. S. makes the way.

Work at what you may, live where you will, choose what occupation you like, the I. C. S. can qualify you for it, by mail, in your spare time. It costs nothing to fill in, cut out, and mail the coupon, so do it now.

**LET THESE MEN TESTIFY.**

**W. A. Winfield**, formerly of Charlottetown, Inspector to General Manager of Telephone Co., took Electrical Engineering.

**Kenneth H. Gordon**, Georgetown, axeman to Rodman, Nav. Transcontinental Ry., survey; salary increased. Took Railroad Engineering.

**George Dewar**, formerly of Charlottetown, lineman to local manager of Telephone Co., Winnipeg. Took Telephone Engineering.

**Geo. E. Frye**  
NEW GLASGOW, N. S.

During March 310 students voluntarily reported an increase in salary in their position as direct results of I. C. S. training.

7-7dwsim.

Please explain, without further obligation on my part how I can qualify for a larger salary in the position before which I have marked X.
