THE Natural History and Antiquarian Society's opening meeting of their new room was a decided success. Notwithstanding the numerous other attractions a goodly number were in attendance and they were well rewarded by a highly interesting and instructive paper read by A. E. Morrison. A large amount of scientific information and natural history facts regarding the nature, habits and propagation—yes and destruction too—of our river fishes were crowded into small space, in language that held the closest attention of his audience. Mr. Morrison entered a strong plea for the protection of our streams from the wanton destruction of "pot-hunters." At the conclusion remarks were made by John Newson, Wm. Gillespie, W. P. Dull, John McLaren, J. H. Reddin and others and a number of questions were asked which were answered by the lecturer. Afterwards a suithearty vote of thanks was tendered and ably acknowledged. The next paper will be given by ex-President McSwain on "Our Birds of Prey."

THE death of Mrs. George O'Neill of the Halfway House, Vernon River, will be learned with widespread sorrow in that section of the country. The late Mrs. O'Neill was a daughter of the late Thomas Foley, Hope River. She was a fine woman in every sense of the word. As a neighbor she was beloved by all, and her demise will leave a blank in the home and in the community which cannot be filled. In her life she exemplified the Christian graces, and being a woman of more than ordinary intelligence she impressed her culture on both her own family and her more intimate friends. There are left to mourn her departure, her husband and family of two sons, Joseph now practising law in Crystal, North Dakota; Rev. Frank of Baltimore, Md.; and four daughters, Annie, trained nurse in Boston; Rose, Mary and Eliza at home. The Guardian extends sympathy to the bereaved.
