Bank Co-operation with the Farmer

Responsible farmers, like other business men, sometimes find that they can make profitable use of temporary capital borrowed from a bank.

The Bank of Nova Scotia has had a ripe experience and possesses a clear understanding of farmers' financial requirements.

Its policy is co-operation with the farmer.

The nearest manager will be glad to discuss your situation with you.

The Bank of Nova Scotia

ESTABLISHED 1832 — J. H. MALCOM, Manager CHARLOTTETOWN

Paid-up Capital $ 9,700,000
Reserve 18,000,000
Resources 230,000,000

Branches also at Alberton, Albany, Bedeque Borden, Emerald Kensington, Montague, O'Leary, St. Peters, Souris, Summerside, Victoria.

Saving $1,000

Through trifling economies, you can accumulate one thousand dollars in a few years.

By persistently and regularly depositing $2.00 a week with us—with interest at 3%, compounded semi-annually—you will have $1,211.43 to your credit in ten years.

GERMANY WILL NOT BE LEAGUE MEMBER

Not to Apply for Admittance Before Result of Washington Conference is Known.

GENEVA, Sept 2.— Germany will not be admitted to membership in the League of Nations at the coming Assembly here for the reason that she is not going to apply. For this attitude on her part there by far the most important is that the astute Germans are waiting to see what the results of the Washington Conference will be. If they remain out of the League, they argue, they will be in an exceptionally good position to support President Harding in the formation of that other association of nations which he has in mind. In other words, they will be ready, should occasion arise, to please America. The second reason for not pressing for admission is that it is considered that prospects in the Silesian debate will be better if Germany remains this year a modest suppliant than if she [illegible] new member of the League. For it membership were sought it might be possible to revive the discussion which was last year so easily provoked about who started the war. With Silesia to be settled, a discussion of that kind might be inadvisable. However, officials here are given to understand that if nothing comes of President Harding's plan. Germany will apply for membership next year.

.....Physicial Fitness at Fifty...

The average man of today who has passed the age of fifty is the physicial equal of the average man of that age twenty-five years ago, according to Mr. Walter Camp, Yale football expert, critic, writer and lover of the great outdoors in general Mr. Camp, whose setting up exercise, designed to keep the business man in fighting trim, and which under the name of "The Daily Dozen", was adopted by Government officials at Washington during the war, believes that sports alone have been responsible for keeping the man of today on a par with his brother of a quarter of a century ago.

RE DAYLIGHT SAVING.

A suburbanite wanted to know how he could set his rooster an hour a head, whereupon a helpful friend advised him to exchange it for a hen, as it was easier to set a hen.

RIGHT USE OF SOCIETY

It is not rejection of society, but wise and right use of it, which characterizes the man who lives most richly in the things of the mind.— Hamilton Wright Mabie.

FEEDING CATTLE IN SUMMER

Animals Have Seldom Been Marked Down When Marketed Because There is a Surplus....

The increase of chores in summer will operate against a great increase of cattle feeding during the season of field work, for the average farmer does not care to feed cattle night and morning in summer when tired out with the long day's work on the land. But if one cares to investigate, he will find that summer-fed cattle seldom have to be marked down when marketed because there is a surplus of stuff in the terminal markets.

The ideal ration is made up of rich, tender grass and grain. The feeding period is shortened and the gain per hundred pounds of grain is enhanced as compared with dry-lot feeding in winter. Counting all the factors in the game the risk in summer feeding for market is far less than in winter.

WILD DUCKS FOODS.

(Experimental Farms Note.)

The majority of the plants which are important as sources of food for Wild Ducks are, as might be expected, those which occur either in water on in marshes. A few land plants, however, find a place on the list of which the principal is Barnyard Grass (Echinoch species, produced from Europe, which grows well on waste ground and on the margins of lakes. It is the seed of this plant which is eaten.

Of importance also are the Smartweeds (Polygonum) most of which on wet soil and have a wide distribution in Canada.

Of the plants which grow typically in marshes, or swamps, two produce edible tubers. The Chufa or Nut-grass (Cyperus esculentus) extends from New Brunswick to the Great Lakes while the Wapato (Sigittaria latifolia) extends across the whole of Canada.

Other important swamp plants are the Bur Reed (Sparaganium eurvcarpum,) Bulrush (Scirpus validus), Meadow Grass (Panicularia nervata) and Corn Grass (Spartina Michauxiana). The first three occur all over Canada while the last extends from Nova Scotia to Saskatchewan. These and various other species are all important food-plants of Wild Ducks.

Occupying a foremost place among water plants wild Rice (Zivania aquatica) occurs from New Brunswick to Lake Winnipeg. A full description is given of it in Bulletin 42 Second Series of the Experimental Farms Branch.

Water Celery (Vallisneria spiralis) extends from Nova Scotia to the Great Lakes. No less important as Duck foods are the various species of Powdered (Potamogeton) most of which have a wide distribution.

Two species of the Waterlily Family namely. Water Shield (Brasenia Schreberi) which extends from Nova Scotia to Manitoba, and the Yellow Waterlily (Nuphar advena) which extends west to the Rocky Mountains are worthy of mention. The seees only of the second species are of importance.

The Pickerel Weed (Pontederia cordata) is native in Eastern Canada only.

Finally, of importance in salt and brackish water are the Tassel-Pondweeds of Widgeon-Grass (Ruppia) and Eelgrass (Zostera marina) the latter of which occurs on both the Atlantic and Pacific coasts.

The Biological Survey of the United States Department of Agriculture at Washington, D. C. has issued a number of important Bulletins on this subject.

How Ohio River Got Name

The Allegheny and Ohio rivers were regarded by the French as one stream. The name given by them, La Belle Riviere (the beautiful river) is a translation of the Seneca term "Ho-he-yu" changed by the whites, both English and French, at a later date into Ohio.

Wise Words Concerning Advice

Give thy friend counsel wisely and charitably, but leave him to his liberty whether he will follow thee or no; and be not angry if thy counsel be rejected, for advice is no empire, andhe is not my friend that will be my judge whether I will or no.—Jeremy Taylor.

English Humor

A juvenile club advertises: "You furnish the job, we furnish the boy". A correspondent stated that he saw in an English saloon an amusing variation of the above, as follows: "You furnish the bob, we furnish the joy."—Boston Transcript.

Has Various Pronounciations

There are two ways of pronouncing "ough". These are, written phonetically, as in bow, coff, cauf, (each is allowable), enuff, thau, tho, throo, hiccup, the Irish lough, and the Scot's pronounciation of sougs, "such."

Natural Deduction

"The man that argues with a woman is a fool," said Mr. Gadspur.

"I agree with you," said Mr. Twobble.

"And if he expects to have the last word he's an even bigger fool."

"Quite so, quite so. What did you and the Missus' quarrel about this morning?"

Oysters Need Salt

Oysters cannot live in the Baltic Sea because it is not salt enough. They can only live in water that contains at least thirty-seven parts of salt to every 1,000 parts of water.

Forgetful Daddy

Jimmy had always noticed that when his father went to work on rainy days he wore rubbers. One day after his father had gone he noticed that the rubbers were still in their usual place, so he ran to mother and said: "Oh, mother, daddy didn't wear his rain slippers today."

Red Flag Seen In Ireland

DUBLIN, Sept. 2.—The red flag has been raised in Southern Ireland. Inthe Bruree County Limerick group the transport workers seized a mill and bakery and declared themselves Soviet Placards declaring that the mills were now the property of the Brures Soviet workers were put up in the town. They contained announcement: "We make bread, not profits."

World's Largest Snake

The python is considered the largest snake in the world. It is found in the East Indies and in the Phillippine Islands. Specimens thirty feet long have been seen. All the various species of pythons lend themselves easily to captivity and taming.

The Conjunction of Planets in 1919

The extraordinary grouping of the solar system the morning of December 17, 1919, which some prognosticators had gone so far as to perdict would result in the world coming to an end, was an alignment in the heavens of Jupiter, Saturn and Neptune.

Makes Powerful Appeal

There is no more powerful preacher of righteousness for a young man, from eighteen to twenty-five, than a lively, winning warm-hearted girl, all whose beauty and brightness are sacred to truth and piety.—Phoebe McKeen

Logic

The Yokel (meditatively)—"I'm going to sell the farm and put the money in the bank. When you've got a farm, the Lord does as he pleases with you, but he can't touch the money.—Stockholm Kasper.

BERLIN, Aug. 30.—The British French and Italian ambassadors have informed Germany of the decision of their governments to send reinforcements into Upper Silesia.

Germany has been asked by the ambassadors to make the necessary arrangements for the transport of the reinforcements.

We canont have happiness until we forget to seek for it. We cannot find peace until we enter the path of self-sacrificing usefulness. We cannot be delivered from this vain expense of passions that forever ebb and flow, this wretched, torturing unsatisfied, unsatisfying self, until we come to Jesus and give our lives to Him to be absorbed as His life was in loving obedience to God and loving service to our fellow-men.

Hurry Van Dyke.

YES(VERILY

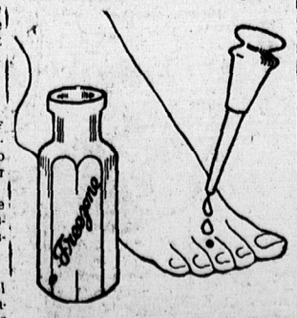
When a man's wife says, "Now, you listen to me!" the proverb is about to be exemplified that "listeners never hear any good of them

WHAT HE WANTED.

"Jenkins, the oil promoter, has Married the talkin-est woman I ever laid eyes on." "Struck a gusher this time, eh?"— Nashville Tennesseean.

CORNS

Lift Off with Fingers



Doesn't hurt a bit. Drop a little "Freezone" on an aching corn instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes and the calluses, without soreness or irritation.

Russian Leaders Assassinated

RIGA, Sept. 2.—Eight Russian Communist leaders at Petrograd have been assassinated within two months in connection with the "white terrorist" plot it was revealed by Leon Trotzky in a speech before the Moscow Soviet meeting according to a despatch received here today. The despatch added that attempts had been made to assassinate M. Zinovieff chairman of the executive committee of the third international Maxime Gorky and M. Asnilohitch, president of the Petrograd trades unions, to rob trains loaded with gold and other valuables on which Leonid Krassin, Soviet trade representative, was riding.

TOO MANY WOMEN COMING TO CANADA

OTTAWA, Sept. 2.—Alarm is expressed by G. W. V. A. officials and from headquarters of the steady influx of unaccompanied women immigrants from Central Europe.

A proposal has been put forth that certain regulations be made effective to curtail such immigration. It is expected that the intention of British emmigration officials has been to encourage the emigration of unmarried women from England where the recent census showed the number of women to be far in excess of the men.

Milk as Glue

Fancy using milk as glue!

The milk does not come from the cow, but from a wonderful tree called the cow-tree. But, for all that, it is quite as pleasant to drink as the milk we get from the dairy.

The tree is one of the largest to be found in the dense forest of Brazil. Its bark is deeply scored, reddish and ragged

Cuts are made in the trunk to allow the milk to flow, but a supply can be obtained equally well from one which has been cut down for some time.

A traveler had some of the milk drawn from dry logs which had been standing many days in the hot sun. He found it pleasant with coffee. It soon thickeend to a glue and often he saw the natives use it to cement broken crockery.

Professor Mare's Nest

An amusing story is related by Lord Hartington. Writing in Paris during the war, he says: "We had a good laugh at a certain worthy professor, who, like a good many others, was enrolled in the Intelligence Department. This painstaking man, who was engaged in the detection of leakages in the blockade, wrote an enormous memorandum on the sinister ramifications of the firm of E. Hijor, of Spain, in 80 pages. He traced the workings of this ruffin, showed how he was more or less interested in every firm which was smuggling iron ore into Germany, supply enemy submarines, or otherwise acting to the prejudice of the Allies; and in a masterly summing up suggested a means of checkmating him. But next day he learnt, and he was never allowed to forget it, that E. Higos is simply Spanish for "and Sons."

The Folding Fan

The folding fan came originally from Japan. In the East fans were carried by both sexes and were much used at important ceremonies. The Japanese had war fans, colored bright red, and there are some fans which have a small poinard concealed in the handle. The folding fan was introduced into England in Henry VIII's time coming from Italy, to which it had been introduced by Catherine de Medici.

The Russian Ruble

In spite of the great changes of government in Russia, the old Czar ruble is still in circulation. Nobody knows who has the plates, but the stuff is still being printed and is always welcomed by the peasant in preference to the new currencies which he does not trust.

Loder's Death Was Instantaneous

NEW GLASGOW, N. S., Sept. 2.—George Loder was hanged at Pictou at 3.05 o'clock Wednesday morning. He was attended during the night by Father Decoste, of Pictou, and Father McKenzie, of Westville, with whom he conversed freely. Police officers D. A. Morrison and P. O. Carroll were also present, and shortly before three o'clock Loder dictated a letter to his sister, Mrs. Grady, at Summerside. When led out he was quite composed and ascended the scaffold without falter. The drop worked successfully and death was instantaneous. A coroner's inquest was held at nine a.m. next day before Mr. Alex. McDougall. The evidence of Sheriff Harris and Dr. Smith Anderson was taken in accordance with the facts of the case.

Quite a crowd assembled outside, not only of townspeople, but of auto parties from the outlying towns. The yard was fenced and the scaffold was also fenced with the result that there was not much to be seen by those morbidly inclined.

The Feminine Steam Roller

Mrs. Smart has studied up on parliamentary usage before going to the regular business meeting of the club and had laid careful plans that she might be elected president. When the meeting was duly opened and nominations for president were in order, the business went something like this.

"Madam president, I nominate for president of this club Mrs. Smart,' stated a member, according to the previous arrangement.

"I move that the nominations cease and Mrs. Smart be elected by acclamation," put in the second cog of the machine quickly.

"Do I hear a second to that motion?" the chair asked.

There was a dangerous pause, and no second to the motion. Mrs. Smart glanced hastily around the room. The woman who was to do the seconding was nowhere to be seen. It was a critical moment, but Mrs. Smart rose to the emergency.

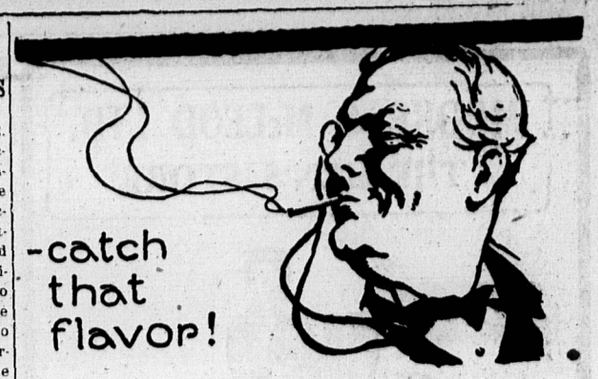
"I second the motion, madam president," she stated as modestly as might be under the circumstances.

FILMING LOOPING PLANE

The ingenuity of the modern film cameraman is seldom put to greater test than when he has to climb into the clouds in an aeroplane and secure thrilling pictures of adventures in midair.

Aircrift diving, looping and spinning at over a hundred miles an hour have to be kept in a focus of a narrow lens, a feat which requires an almost instinctive sense to make it possible to anticipate the movements of the machine.

Pathes employ an ex-flying officer for the purpose of obtaining mid-air thrills for the screen. Recently, this cameraman obtained what is the first complete loop of an aeroplane in mid-air secured by a film camera. Many hundreds of feet of film were wasted before the perfect result was registered On one occasion the camera man dived in his aeroplane on another machine spinning earthwards at a hundred and fifty miles an hour, and during this dizzy descent had to gauge accurately, the whole time, the exact speed at which to turn the handle of his camera.



Its the taste of real tobacco cured—not dried—by the sun of ol' Virginny.

All the natural sweetness preserved in the golden strands.

More than a smoke—a satisfaction.

DISSOLUTION BEFORE CHRISTMAS TIDE

Premier Meighen Announced Last Night That he Would Recommend to His Excellency the Governor General That the House of Commons Should be Dismissed Before the New Year.

LONDON, Sept. 2.—The Right Hon. Arthur Meighen will recommend an early dissolution of the Canadian House of Commons and a general election before the new year. This is his message to the people of London and the people of Canada delivered before an audience of some 3,000 people in the Grand Opera House last night. The announcement which has been awaited with anxiety by all sections of the Dominion came as a surprise to all but a few of the Prime Minister's hearers. But when the Premier announced that he considered that the proper thing was to recommend an early dissolution and general election applause rang through the theatre. Redistribution could not be carried out within a reasonable time, the Minister stated. The census returns would not be complete it had been announced until December and that would mean another twenty-months or so of indecision with regard to tariff matters. Canada could not get settled down to business unless the tariff problem was settled.

The real challenge of the Government, he said, came from the Farmers party which demanded free trade. That their policy was wrong, he was certain, and he was equally certain it would be proved wrong by developments. The revision of the tariff in Canada was due and overdue. To decide the principle of tariff was the big imperative question before the people of Canada today. "Until they do decide it," declared the Premier, "we cannot have business stability, we cannot have confidence, we cannot have full employment, we cannot have health and growth and virility. Until we know whether the people want protective tariff or whether they don't, no tariff is secure. Either the Opposition platform adopted in the convention and set down in black and white, either it or the Farmers' platform means beyond all dispute the overthrow of the historic policy of this country."

How to Get Solid With Your Son. —By Herbert Johnson
