CASTORIA advertisement for infants and children, featuring an image of the product and text: 'The Kind You Have Always Bought'.

What Fertilizers Do YOU Use?

Do you use these cheap, unprofitable, ready-mixed varieties--barnyard manure - or our English Unmixed brand?

The kind of crop you get depends altogether on the kind of plant food you use. You cannot expect your land to pay good returns unless you give back to it the elements of fertility that were used by previous crops.

Some of the Advantages of Using Unmixed Fertilizer

With these English Unmixed Fertilizers you can treat your land to suit every need or any kind of crop. You can use Muriate or Sulphate of Potash, Nitrate of soda, Kainit, Bone Meal or Superphosphate singly or in any combination to suit the needs of any field.

These fertilizers are the most profitable in every way and besides costing less at the start they save fully 25 p. c. of your money enabling you to mix your own plant foods at home--and when you mix your own fertilizers you know just what you are using and what you are getting for your money.

These Unmixed Fertilizers are far more productive, profitable and scientifically in results and better in every way than any kind of mixed fertilizer on the market.

All Government experts, eminent lecturers and experienced farmers throughout the Dominion are unanimously proclaiming these English Unmixed Fertilizers the best to use.

Free Booklets--- We have a number of interesting booklets on fertilizing and farming and the cultivation of ground crops. These will be sent free to any address--just drop us a postcard and you will get them by return mail.
