Dalhousie, arrived home on Thurs-
day afternoon and will spend his
holidays with his parents, Mr. and
Mrs. Elmer Taylor.

Mrs. Alex. Mews of St. John's
Newfoundland is visiting at the
Parsonage, 220 Richmond Street, the
Guest of Rev. H. and Mrs. Johnson.

Miss Beulah Campbell of The T.
Eaton Co., Moncton, is visiting at
her home, Graham's Road. She in-
tends returning Monday.

Mr. Emory P. Wood who has
been on a short visit to his mother,
Mrs. Rhoda Wood and his brother,
Mr. Brecken Wood, and his grand-
parents, Mr. and Mrs. D. Jones, has
returned to his home in Edmonton,
after a very pleasant visit.

KINKORA SCHOOL

The following is the standing of
the pupils of Kinkora School for
the month of April:

Grade X. 1. Nora McIvor, 2. Tom-
mie Johnston, 3. Willie McIvor, 4.
Tessie Mulligan.

Grade IX. 1. Edwin McCarville, 2.
Kathleen Shreanan, 3. Aileen
Greenan, 4. Charlie McIvor.

Grade VIII. 1. Jim Ranahan, 2.
Leslie Keefe, 3. Mary Greenan, 4.
Cyril McCarville.

Grade VII. 1. Winnifred McIvor, 2.
Ralph McCarville, 3. Mae McCar-
ville, 4. Joseph Johnston.

Grade VI. 1. George Donnelly, 2.
P. J. Greenan, 3. Teresa Lawless,
4. Nettie Siddon.

Grade V. 1. Mary Croken, 2.
Teresa Greenan, 3. Gerald Shre-
nan, 4. Bernardine McIvor.

Grade III. 1. Annie Greenan, 2.
Harry Ranahan, 3. Gerald Keefe,
4. Blanche Campbell.

Grade II. 1. Marion Keefe, 2.
Everett Mulligan, 3. Agnes Camp-
bell.

Grade I. 1. Lou's Smith, 2. Doro-
thy Sullivan, 3. Gerald Smith, 4.
Josephine Greenan.

Card Of Thanks

Mr. and Mrs. William W. Colwill
and family wish to thank all their
friends and neighbors for their
many acts of kindness and sym-
pathy shown them during the ill-
ness and death of their little daugh-
ter Florence May.

Card Of Thanks

The Sisters of St. Vincent's
Orphanage wish to thank very sin-
cerely Messrs. Prowse Bros., for
their contribution to the Anni-
versary Sale. May prosperity con-
tinue to shine on this enterprising
firm and may its individual mem-
bers enjoy the choicest blessings of
Him who said, "As long as you did
it unto one of the least of these my
brethren, you did it unto me."

CHARLOTTETOWN

SUMMERSIDE

The New Peoria
Fertilizer Sower

As our original stock of Fertilizer sowers ran low
during the last few weeks, we have ordered out another
carload of these machines, and these are being unloaded
at our western Warehouse in Summerside, to take up our
orders in that section. We now have an ample supply in
both Charlottetown and Summerside, and are able to
meet all demands for these machines immediately.

For those growers who are interested in this simple
method of spreading fertilizer, and who are not yet fam-
iliar with the points of the New PEORIA Sower, we are
attaching the following explanation and remarks.

The New Peoria Sower

is a fertilizer spreading machine which
attaches to the end of the wagon box.
There are no holes to bore and no cleats to
attach and it can be put on without remov-
ing the tail board. It is driven from the
rear wheel of the wagon. It spreads the
fertilizer over the ground very evenly and
easily, and can be equipped with several
different speed sprockets which will re-
gulate the width of the spread from ten
feet up to twenty four feet. It has been
specially designed for spreading damp and
sticky chemicals such as exist in unmixed
fertilizers.

Construction:

This machine has
been designed with the idea of perfecting
the four most important points in this type
of machine, namely: STRENGTH, SIM-
PLICITY OF WORKING PARTS,
EVEN ADJUSTABLE SPREAD, AC-
CESSIBILITY OF PARTS FOR
CLEANING. It contains only one half
the chains, fans and gears necessary to other
Endgate Sowers. Each of these work-
ing parts is from forty to sixty per cent.
heavier and stronger than on any other
similar machine. It has an adjustable
cross throw spread for even application.
Each working part is visible, easily re-
movable for cleaning, and fully protected
from chemicals.

In the Matter of Strength:

Here is an interesting point regarding the
New Peoria Sower. With the exception
of the New Peoria Sower with its simple
spreading unit, all the older fashioned
types of Endgate Sowers are equipped
with two fans, two sets of driving gears
and two sets of chains. These superfluous
parts not only increase the draught, but
they also give the owner a lot of extra
parts where trouble may occur; a lot of
extra parts to clean and adjust, and a lot
of extra parts that will wear out and have
to be replaced eventually.

In the Matter of Draught:

It has been customary to build these
machines containing all these extra parts,
so that the complete machine weighs be-
tween 160 and 170 pounds.
The New Peoria Endgate Sower with
only one half the chains, fans and gears,
weighs 181 pounds. Strict comparison
will reveal that the Hopper, Gears and
Fan in the Peoria Sower are built very
much heavier and stronger than the cor-
responding parts in any other machine.

In the Matter of Cleaning:

Fertilizer chemicals are very gummy and
sticky substances as a rule, hence the
clogging up of fertilizer sowers has long
been a bug-bear to the average owner of
such implements, and many a man has
spent many an annoying and profitless
half hour in the field, trying to remove the
gummy fertilizer from the working parts
of the sower he uses. This unpleasant
feature has been eliminated almost en-
tirely from the New Peoria Sower. This
has been accomplished in the following
manner: There are no worm or augur
feed gears to bridge up and bind. There
are no internal working parts to clog up
and stick. All the driving gears are pro-
tected from the fertilizer and each bear-
ing is equipped with a grease cup. It is
within the realm of possibility that the
feeding spouts might get more or less
clogged up. However, these feeding spouts
are common on all fertilizer sowers. The
difference is that the spouts on the Peoria
Sower are easily removed in a few seconds
while the spouts on most endgate sowers
are rigid and unremovable.

In the Matter of an Even
and Adjustable Spread:

The New Peoria Sower is very light in
the draught on account of each bearing be-
ing protected with a grease cup, and because
it has only one spreading unit to be driven.
Compare the ease with which these re-
movable spouts can be cleaned, with the
struggle connected with getting at the inside
of a spout that is not removable.

In the Matter of an Even
and Adjustable Spread:

NOTE: We have secured the services of a
Peoria Sower factory representative who
will explain and demonstrate the new
Peoria Sower both at Charlottetown and
Summerside, for the benefit of our cus-
tomers and interested prospects.
TERMS: Any responsible farmer can se-
cure one of these New Peoria Fertilizer
Sowers on very reasonable terms at ordi-
nary interest charges.

Imperial
Fox Food

FOR PUPPIES

The wonderful success, following its use during
the past three years, has clearly proven the superior
merits of this IMPERIAL product to our experienced
ranchers and they are planning on feeding liberally this
season.

Our formula is specially adapted to the needs of the
young and growing foxes, is rich in vitamins and a sure
preventative of rickets.

IMPERIAL PUPPY FOOD is guaranteed to be
strictly fresh.

Order early so as to be sure of receiving your supply
in good time as a heavy demand is assured.

HAUCK FIRE GUN

We have the exclusive agency for this popular and highly efficient ranch disin-
fectant which is heartily endorsed by leading ranchers for clearing pens and houses
of destructive parasites. Full information on request.
