**High Analysis Fertilizers Are Cheapest**

This opinion is unanimous. Our mixed formulas, A, B, and N. S. Special tarry from 20% to 26% plant food, and are the highest grade and most concentrated brands offered in Canada today.

The amount of plant food required can be regulated by the quantity used. Low analysis grades are cheap per ton, but high per pound of plant food. Do not be misled in this respect.

You might spin wool and weave cloth for your own use as in the old days, but it does not pay, neither does it pay to mix your own fertilizer at home. The man who says the cost is practically nil in this respect is one who places a very poor valuation on his time.

Our high grade fertilizers are not an expense. They have been tried and proven. Their advantages are real advantages and if you are not a user you will do well to talk with somebody who has used these brands before you place your order this year.

We also handle other fertilizers of all grades and shipment may be obtained at any time you desire.

Mixed fertilizers can be obtained in good strong flat hoop barrels at a cost of 57c each additional, 9 barrels of 22 1/2 lbs. each to the ton.
