Five-Passenger Touring Car

The comfort and ease of riding of the good Maxwell have aroused great enthusiasm among owners. Its pronounced beauty, its reliability and its economy are other reasons for the remarkable inroads it is making in public regard.

Ontario	7,115,000	15,270,000
P. E. I.	30,000	
Quebec	1,521,000	572,000
Totals	$19,821,500	$17,260,100

ICE CREAM BY NEW METHOD

Frozen With Sterile Atmosphere, Not in Air, Product is Unique in Purity.

The entire ice cream industry has been revolutionized by a manufacturing process invented by Prof. W. P. Heath, noted food scientist. Simple in practice, the method is radically new, comprising the application of an old principle to an entirely new use. Ice cream made by this system it is claimed is of certain purity, with flavor, aroma and lasting qualities unequaled in products made by any other method.

Nearly everyone is familiar with the fact that in freezing ice cream the "mix" practically doubles in volume. In ordinary ice cream this increase in bulk is due to the accumulation of multitudinous tiny air cells within the mass. The air comes from the room where the product is being made. Practically no air is pure, and the air of a workroom is contaminated by the breath of the employes and dust particles. So in ordinary ice cream, whatever is in the air enters the product, stays there, and tends to affect the purity.

Under the new process, no air enters the freezing cream, a sterile atmosphere being substituted.

Ice cream which is carbonated is more healthful and pure than any other. Furthermore, it is more tasty and aromatic, and retains its solidity longer.

Manufacturers all over the country are negotiating with Prof. Heath for the privilege of using his patented process. He is granting this right with conscientious discretion, however, and only firms with the most scrupulously sanitary conditions within their plants are granted the privilege.

In Charlottetown and the Island generally, the makers of Perfection Ice Cream have the exclusive rights to this process. Perfection Ice Cream is therefore unrivalled in purity. Made of materials rigidly tested for purity, the most is made of these materials. No ordinary air enters the product in the making.

The makers of Perfection Ice Cream exhibited their progressive attitude by applying for the privilege of using the carbonated process. The fact that it was granted this privilege is a tribute to the plant, methods and products of the Hydrox company, and above all, to the excellent sanitary conditions prevailing throughout the establishment.

BERLIN SUBWAY SHYLOCKS TO WOO THE FICKLE MARK

BERLIN, May 31.—Since the mark began palpitating uncertainly from one day to another, indeed, from one hour to another,—Berlin has undergone a mushroom growth of small exchange establishments along streets all over the city. The tourist, looking for a place to convert quickly his good American dollars, English pounds, or other currency, does not need to make a lengthy search, for he runs into a money-changing booth at almost every turn, even in the railway promenade and driving sections of the boulevards.

Now an enterprising Shylock has hit upon the happy idea of setting up exchange shops at transfer points on the underground and elevated railways. The topic is simple: The alert business man enters his home station and buys a morning paper; he finds the mark is rising, or falling; his office may be a half hour away, too far to permit keeping pace with the exchange; at the transfer point he can sell "short" if necessary, or buy at a liberal margin, without the necessity of awaiting his train's arrival down town.

The first of these new establishments to put in an appearance is at the metropolitan subdivision of Schoeneberg, where trains from the fashionable West End meet those from the traders' residential district in southwestern Berlin. The authorities have granted an exchange dealer a 10-year lease on a part of the station. The basic annual rent will be 750,000 marks (about $20 when the contract was made), changeable in accordance with changes in the buying power of the mark.

TAKING A CHANCE.

"What's the trouble, son?" said the kindly stranger.

"My pa and ma won't take me to the movies," sobbed the oppressed child.

"Do they ever take you when you make a noise like that?" inquired the stranger.

"Sometimes they do and sometimes they don't," sobbed the poor boy; "but it ain't any trouble to yell."

The Higher the Fewer

You can recognize the approach to Easy Street by the little piles of discarded friends along the way.—Vancouver (B C) Sun.

Many People Wonder

why it is that glasses are worn more commonly in the present generation than in the past. Some say that the race is deteriorating, some that is for style, but the real reason is that our modern civilization requires the eye to do more work than was even the case before.

Consequently, the eyes, if in the least defective, may give you a lot of trouble though in reality they are no worse than those of your grandfather who did not wear glasses till he was an old man.

If you feel the least symptom of eyestrain, remember that it is natures warning to you and consult us at once.

On the Mountain Top

CLIMB the mountain—stand on the peak—and before you there unfolds a panorama extending as far as your eye can reach. Stay in the valley, and your view is restricted by the surrounding hills.

The Charlottetown Guardian—properly used—will guide you to the mountain top. Read it and your vision is enlarged. You get a bird's-eye view of world events. You glimpse the doings of the day.

Fail to use it, and your view is limited—you remain in ignorance not only of events at home and abroad, but of much that concerns you even more vitally—news of the very things that have to do with your personal, everyday life.

Some one might be selling a new, better and more economical food; or a utensil that would add immeasurably to your comfort and well-being; or some better material for shoes or clothingb—but you would never know, because of your restricted view.

You may read every line of the news columns, but if you overlook the advertising, you are still living in the valley. You remain uninformed about many things you ought to know in order to live a happy useful, profitable life in this age of progress.

Climb out of the valley to the mountain top.

Read the advertisements
