The Nova Scotia Steel and Coal Company Ltd., in offering their bonds for sale, as appears in their ad elsewhere, present to the keen business men a proposition which at once commends itself as one of the first investments procurable, for such is the history of results from the above company that security seems assured and the money invested will bring good returns. The earnings of the company for the past three years has been \$2,859,732.22, an average for the three years of \$279,324.44, equivalent to about three times the interest on the entire issue of bonds. The bonds offered are part of an issue of six million dollars, secured by first mortgages upon all the ore, coal, timber and other lands, buildings etc of the company in Canada and Newfoundland, and are fifty year gold bonds with a cumulative sinking fund of 1/2 p. c., commencing on Jan. 1, 1911, and are redeemable at any time by the company before maturity at 105.

The bond holders of the Nova Scotia Steel and Coal Company Limited are most secure, as the mortgage securing the bonds covers among other things the iron ore and coal deposits of the company, which alone are estimated to represent in value many times the amount of the issue of bonds. Messrs Price Waterhouse & Co., of London, England, are the auditors of the company and their certificate is in the office of the Eastern Trust Company at Halifax, where it can be readily seen at any time, thus proving the company's claims for reliability in the business world.
