MAYFIELD WOMEN'S INSTITUTE

The Mayfield Women's Institute met at the home of Mrs. Millar Orr on Tuesday, Jan. 30. The president presided. Meeting opened by singing the Ode and repeating Creed in unison. Minutes of last meeting read, adopted and signed. Roll Call was responded to by 7 members and two visitors were present. Moved and seconded that Mrs. Frank Houston be paid 55 cents for Christmas baskets. The report of the different committees were then given. New committees are: Sick committee, Mrs. Frank Houston and Mrs. Blair Andrew. Refreshment committee: Mrs. Millar Orr and Mrs. Blair Andrew. Program for the evening consisted of recitation, Mrs. Davis Moffatt; paper, "A Winter Breakfast" read by Mrs. Blair Andrew. Miss Stevenson, convenor of legislation took charge of same and filled in questionaire. A "nut contest" put on by the secretary was won by Mrs. Mervyn Bulman and Mrs. Blair Andrew. It was decided that Mrs. Frank Houston and Mrs. Millar Orr, convenors of agriculture and public health take charge of same at next meeting. Miss Stevenson then gave the Institute an account of the concert, Roll Call for next meeting, "An Original Verse." Next meeting to be held on the regular evening. Invitation from Mrs. Lewis Toombs to meet at her home was accepted. A daily lunch was served by the hostess assisted by Mrs. Frank Houston and Miss Marguerite Houston. A very enjoyable social hour was spent. Meeting closed by singing the National Anthem.

Planting the Farm Home Grounds

(Charlottetown Experimental Farm Notes) Now is the time to plan improvements to the home grounds. A few flowers and shrubs planted around the farm home will do much to improve its appearance. The cash outlay for such planting need not be large and the satisfaction of having a more beautiful home will more than pay for the labor involved. The first consideration in the general scheme of improvement, is a good lawn. A practically unbroken stretch of grass, whether large or small, will act as a setting or ground work for the planting of all trees, shrubs or perennial plants. All planting should be confined to the foundation of the house and to the margins of the lawn. A lawn broken up by shrubs or flowers generally looks smaller than it actually is. In planting shrubbery and

trees, keep in mind the ultimate size to which they grow and plant them far enough apart. You cannot easily move mature shrubs. There is a long list of flowering shrubs from which to choose covering a blooming season from early spring to late fall.

Annual and perennial flowers make excellent planting material. These are easily grown and are especially desirable where an immediate effect is desired.

It is not wise to attempt too much the first year. A little work well planned and executed is far better than elaborate plans carelessly or incompletely carried out. The Experimental Station, Charlottetown, is always ready to assist in such work. Address all enquiries to the Superintendent, Experimental Station, Charlottetown.

NOTE:—In last week's "Charlottetown Experimental Farm Notes" the formalin treatment for hullless oats was not quite clear. The mixture recommended for hullless oats is one pint of formalin to eighty gallons of water, instead of one pint of formalin to forty gallons of water, which is the strength used for hulled varieties.

PLAN TO BREED WILD PHEASANT

(Canadian Press) REGINA, Feb. 9.—Wholesale propagation of pheasants will be undertaken in Saskatchewan, if plans of Game Commissioner A. E. Ester are adopted. He suggests that certain numbers of the 1000 pheasants to be brought from North Dakota be retained at Moose Jaw for breeding purposes. He suggests that certain numbers of the 1000 pheasants to be brought from North Dakota be retained at Moose Jaw for breeding purposes. Then school children, recommended by their teachers and inspectors in rural areas, will receive eggs to hatch, using small inexpensive incubators for the purpose. The children will be instructed how to hatch the eggs and then feed and care for the birds.

Mr. Ester made his proposal at the annual meeting of the Saskatchewan Fish and Game League. A Regina doctor, who did not want his name mentioned, told the meeting he would breed free of charge for the league "basillus bulgaricus." These small bugs when fed to young pheasants protect them from diarrhoea, the cause of high mortality among pheasants when raised in captivity.

Visitor "What is this?" "The composing room." "I couldn't write music so publicly."—Louisville Courier-Journal. Hope "Hope," remarked the speaker, "is a truly wonderful thing." "That's so," remarked his friend. "I've known one little child to keep a man waiting for a whole day."

SUMMERSIDE and Prince County

—This column is reserved for news of local interest but advertising of a new nature may be inserted at 2 cents a word strictly payable in advance.

—SILVER FOX FELTS are being brought daily at the office of B. Graham Rogers, Summerside. L-67.

—ON VISIT FROM BOSTON—Mr. George Sutherland, who is visiting his home town of Kensington, and parents Mr. and Mrs. William Sutherland, after an absence of eleven years, leaves on return Saturday morning. He says that living conditions in Boston are approaching the state they were in previous to the "crash" in 1928. He speaks in optimistic terms of President Roosevelt's N.R.A. policy, which bids fair to successfully revolutionize the present economic system and restore prosperity. He also spoke commendably of Father Conaghan's propaganda in collaboration with the President.—K.

—A.A.C.C. BENEFIT AT KENSINGTON RINK.—The Kensington Rink management are staging a special benefit performance on Friday night, Mar. 2nd, in aid of the Active Arrested and Cured Cases, an organization formed by the patients at the Provincial Sanatorium. This is a most praiseworthy organization, having for its objective the curtailing of the ravages and eventual stamping out of the dreaded tuberculosis in this province. The proponents of the cause wish to enlist the active sympathy of everyone in this Province. There will be skating races for boys and girls of the different schools (including Summerside), also races open to the Province, feature performances, obstacle races, etc. Particular attention is to be given the speed events, and it is expected that some potential racing entries will take part. The wonderful and beautiful art of speed skating has deteriorated in recent years and old time sport fans are looking to the younger generation to duplicate the feats of Gaudet, Unsworth, and Cannon, champions 25 years ago.

—KENSINGTON BRANCH LIBRARY.—The new branch of the P. E. Island Carnegie Library System was officially opened on Wednesday, Feb. 7th. Premier MacMillan, Miss Bateson, visiting clergymen and others delivered fine addresses stressing the great benefaction to Kensington and contiguous districts. The chance for all the people, young and old, to commune with the greatest intellectual writers of all ages, and the chances for technical education, on any subject, and last but not least, the substitution in our midst of standard recognized authors for the slimy and deleterious literature in many of the current periodicals, which is liable to contaminate the youth of Prince Edward Island as it evidently has already done in large centres of population less insulated than this province. It may quite readily be visualized that the establishment of the library system will turn out to be one of the greatest social blessings ever conferred on P. E. Island. On Thursday evening when the Library opened its doors to the public, large crowds took advantage of the occasion to make application for books. Among the patrons were quite a number of children who will undoubtedly benefit from having direct access to such good literature.

—Mr. James O'Connor, Clinton, is undergoing treatment at the P. C. Hospital. His many friends will hope for his speedy and permanent return to normal health.—K.

—Mrs. Gertrude Maynard, Secretary of the estate of Milligan & Morrison, Ltd., is visiting Charlottetown, a guest at the Canadian National Hotel.—K.

EASTERN GUARDIAN

—This column is reserved for news of local interest but advertising of a new nature may be inserted at 2 cents a word strictly payable in advance.

—CARNIVAL MONTAGUE, Wednesday, February 14th. Music by Montague Legion Band. Admission 25c. L-340

—SUBSCRIPTIONS to The Charlottetown Guardian may be handed to their Rept. Archie Hume, or left at H. J. Mabon's Drug Store, Montague. L-78.

—SUPER LOCK IS ROBOT'S RIVAL (Canadian Press) WATROUS, Sask., Feb. 9.—A house lock designed to supply a variety of useful information has been invented by Dr. D. D. McEneaney, of this city. The inventor says it will tell visitors when the householder is in or out; and, if out, when he expected to return.

When locked from the outside an indicator below the keyhole shows the word "out" while when left unlocked "in" appears. Above the keyhole is a second indicator with the word "return" printed below it. By turning a small screw one can make figures appear showing time of expected return. Only one key will fit each lock and one of the locks has been fitted with a magnet which will lock when locked from the inside it cannot be unlocked from the outside—protection against burglars. Models are being built to be sent to locksmiths in Toronto and England.

—Good Fishings "So you run a duck farm. Business picking up?" "Not picking down."—Ligon Weekly.

—Fred Scott Thompson of Saskatchewan, university student, has been awarded the Bronze medal of the Royal Humane Society for his heroic action in the rescue of Misses Joan Elliott and Jessie McKay from drowning near Macleod.

—FROM LEAMINGTON TO LEAMINGTON BY 3,600-MILE, ALL-WATER, ALL-EMPIRE ROUTE.

Three Revolutionary Riding Thrills!

WHEN a car takes First Place at the Motor Shows—and first place in sales—that's reason enough why you should see it and drive it before spending a single penny on any new automobile. There's simply no question about it when the new Chevrolet, that very same car, introduces the three outstanding low-priced car advancements of 1934: FIRST OF ALL, of course, is THE FLOATING RIDE—the result of Knee-Action front wheels that abolish jar and bump and bounce, give feather-light steering, end wheel "shimmy" and increase front-end strength. SECOND—an advanced new design of Chevrolet's famous, proved engine. Featuring an entirely new, high-efficiency Blue Flame cylinder head that gives more horsepower—faster acceleration—higher speeds—high compression without "knock"—increased smoothness—and better cooling—at even lower cost for gasoline and oil! THIRD—the new, girder-built "YK" frame. Actually a frame-within-a-frame; with greater resistance to twisting, weaving strains; built so it cannot "sag"; lengthened to permit bigger and more spacious bodies; and cushioned from both body and engine by soft, live rubber. With these great exclusive advancements—with bigger brakes, roomier Fisher Bodies and improved No-Draft Ventilation—it is any wonder that Chevrolet is Canada's most popular automobile? You'll agree, too—it's wise to drive a Chevrolet first before buying any new low-priced car!

Dorothy Dix's Letter Box (Continued from Page 8) And there are plenty of men like that. They camp in a girl's home, they eat her dinners, they drive in her automobiles, they take most of her dances. They are always Johnny-on-the-spot until, everybody thinks of them as engaged. Often they even demand that she shall have no other men company—but them, but they never pop the question. And eventually, when the girl has grown worn and haggard and peevish waiting for them to speak, they fall off to some younger woman who has the charm of novelty. Of course, not every man who goes to see a girl is in love with her or wants to marry her. He may not even be in a position to marry, but at any rate, he owes it to her to state his position unequivocally. That gives her the chance to take him or leave him. DOROTHY DIX. Dear Miss Dix—What is to be done when the wife's pet prejudice seems to be the husband's favorite indoor sport? I have always objected to gambling in any form. I knew before we were married that my husband indulged in an occasional poker party, but I thought that I would not mind. But now I find that every time he plays I am upset. I gave up a good home and a good position to marry him and am investing all my savings in our matrimonial venture and I cannot help feeling that our money is sacred. We have so little that I do not want it played with. I do not wish to tie my husband to my apron strings, but I feel that the intensity with which he and his friends play poker, the grasping after pennies, and the thick puff of tobacco smoke in which they play is unwholesome and nauseating. What can I do to destroy this, the only fly in my ornament? A READER. Answer: Gambling appears to be one of the original vices and it is such a universal passion that it has passed into our speech. Unconsciously we say "I bet I'll do this or that." "I'll bet it will rain." "I'll bet they will come by motor instead of on the train." And so on. It has been said that if all games of chance could be suppressed people would still gamble on which of two birds would fly first or which of two toads could hop the fastest. Probably no other one thing has wrecked more lives, more homes and brought more people to poverty and want than gambling, but he one has ever found a way to stop it. Millions of wives have wept and pled and argued and threatened and nagged at husbands for wasting the money on horse races and at card tables that was needed for food and clothes at home. But if any one of them has ever discovered how to keep
