Mae McCarville, teacher.

BODY MECHANISM Need of constant care and "overhaul" for the human body to avert illness and preserve health, is noted in a statement issued by the Department of National Health and Welfare, Ottawa. Says the health authorities: "Just as

an automobile, or any machine, needs the clean, properly blended fuel; just as it requires water, air, cleaning and constant checking for the proper operation of its body needs good quality food and other aids to perfect performance—like exercise, fresh air, relaxation for the human body, a motor—finest of them all. And, like all sensitive things, it must have a regular overhaul and constant attention."

Health authorities declare that growing children should not be fed on combination of starch and grease, such as gravy, piecrust or fried foods. An Ottawa authority says "Starch is only partly digested during chewing and the digestive process is retarded. It is a coating of grease on food. This is hard enough on the digestion and can only lead to trouble in a child's stomach."

Compare your condition with the symptoms described in the following letter. This lady was seriously ill. Her Cough and Cold were deeply entrenched—yet she got well through using Polson's Cough Syrup. Why don't you try to clear away your trouble in the same way? "To give details—"I was troubled with Chest Weakness and Asthma and found lasting relief difficult to secure. Polson's Cough Syrup touched the raw spot in the throat and helped to heal it over; this relieved the Cough that hurt so much. I used this remedy for several weeks, and cleared my system of every trace of cold. Where there is lots of sickness, due to Cold, Polson's Cough Syrup is held in high esteem. For the control of Coughs, Bad Throat and kindred ills due to cold use Polson's Cough Syrup... 35c at all dealers.

POLSON'S COUGH SYRUP

In Memoriam

JAMES Y. INGLIS

—There passed away at the home of his son in Kensington on June 28, James Y. Inglis, in his 89th year, almost a life-long resident of O'Leary, being one of the first settlers there.

—The remains and executor his work could not be excused. In 1862 he married Emmeline Crossman, daughter of Henry Crossman of Summerside. Of this union eight children were born of whom four have passed on.

—There are left to mourn: James Evans of Kensington; (Lottie) Mrs. O. E. Britt of Shreveport, Louisiana; (Ruby) Mrs. Lewis Vey, Spiritwood, Sask.; (Marion) Mrs. Stephen Goteil, St. John, N. B.; (Bertha) Mrs. S. Lanford, Shreveport, Louisiana.

—The remains were conveyed to O'Leary where the funeral was held from the United Church. The service was conducted by Rev. Geo. Goff assisted by Rev. C. O. Howitt who spoke very kindly of the deceased. As a friend and neighbour he was ever willing to give a helping hand in sickness or trouble and many homes were made more beautiful by his skillful hand. The hymns sung were: "The Lord's My Shepherd," "Roads Of Ages," "The Sands of Time Are Sinking."

—The pallbearers were George MacDonald, Kenneth Campbell, Bayfield Ellis, Harry Ellis, Edd Mathews, Clifford Ellis.

—The floral tributes were: Wreath—Evans and Ethel; Wreath—Grandchildren Major Lorne, Della, Glennie; Wreath—Marion, Steve and family; Wreath—Dr. and Mrs. Martin and family; Wreath—Mr. and Mrs. Lanford; Wreath—Mr. and Mrs. Britt.

—The remains were laid to rest in Mount Royal Cemetery by the side of his wife who predeceased him several years. The funeral was under the direction of Undertaker Claude Jelley.

KEEP THE HOUSE COOL IN SUMMER

By S. F. Getson

Now that hot weather has arrived it might be a good idea to take stock of our homes and see how we can make them more comfortable for the inmates.

If your house is blessed with a porch, you already have a valuable asset, for it can be made the focal point of summer living. If it is on the sunny side of the house a set of awnings will shut out the glare and keep it cool at the same time, protecting the adjacent rooms from excess sunlight.

If space on the porch permits, a table should form part of your summer time equipment, and then it just remains to purchase what will want to serve many of the family meals on the porch. A simply made cupboard or old dresser could be used to hold dishes and cutlery then it will not be necessary to carry everything into the house after each meal.

A few camp stools or chairs rearranged from the attic and related to one another by the alchemy of the paint pot will make your porch the most lived-in part of the house. If space permits, a cot, couch, or even a hammock will go over in a big way with the family. A "five" after lunch, "Windows that face the direct rays of the sun should have drawn shades during the time Old Sol is putting in his best looks so that particular side of the house. Enough sunlight will find its way in between the chinks to keep the germs down, so do not let that worry you.

In fine weather windows should be kept open as much as possible. Screens are a necessity, and in case your windows are not all equipped with metal screens and you cannot at present procure any, lack up strips of cheese cloth over the entire window, and it will prove an effective barrier to flies and other insects that will plague you if you have open unscreened windows.

Plan to cook early. It is in the kitchen of many homes where the sweating atmosphere is found. A certain amount of heat is necessary here, grant you that, for with hungry appetites to appease it seems the homemaker is continually baking, cooking or frying something, herself included.

If some time and thought is expended it will be seen that much can be done to cut the hours spent in the kitchen. First of all planning meals in advance will give you an edge on the old slip-slap method some of us are guilty of practicing. Then do as much as possible of the actual cooking in the early morning before the heat of the day visits your arduous and energy. Make use of the oven heat by preparing baked puddings and custards that are at their level best when icy cold. Bake bread, pies, etc., also in the early part of the day.

Make it a rule that you will not make a fire for the evening meal.

If your family likes a hot drink with this meal, and many do, make tea, cocoa or whatever you are having at noon and keep it soaking wet in an open doorway. The evaporation of the moisture will help to cool the room. As it dries it should be dipped again so to water and again hung up.

Flowers help to give an idea of coolness, but to be at their best they should be carefully arranged and of course should not be allowed to clutter up the table or mantle after they have lost their freshness or they will defeat their own purpose.

Keep House Ventilated. Open doors between rooms help to circulate the air freely, and aids materially in keeping the house ventilated and cool. On those breathless days when the heat seems unbearable bring out a sheet in cold water and hang it soaking wet in an open doorway.

Stairway To Peace; Luxembourg Palace Readied For World Parley

By ROSETTE HARGROVE NEA Staff Correspondent

PARIS. — The bedroom in the Luxembourg Palace at Paris, where Marie de Medicis once swayed the palace chit-chat with her husband, Henry IV of France, has become the information center for the World Peace Conference.

Starts July 29. Marie certainly never expected her 17th century love nest to be a hangout for the reporters of the world; but French authorities are making every effort to see that both reporters and the delegates have everything for their comfort.

The Luxembourg Palace lacks the imposing majesty of nearby Versailles, where the last peace treaties were made, but it ranks second among France's royal abodes.

Built for Marie on her marriage to Henry IV some 200 years ago, it is almost pure Florentine in design. Its towering windows open onto the beautiful palace gardens. Ceilings are high and panelings are all hand carved.

The Peace Conference will be held in that section of the building which has been used by the French Senate for its sessions. The hall has a seating capacity of 314 plus a double-tier balcony which can accommodate another 500. Accommodations for 150 working press will be reserved in a room immediately below the Conference Hall, 46 telephone booths plus teleprinters have been transformed into a restaurant and kitchen. Lunch and dinner here will cost a little more than a dollar, cheap in France today.

NO ELEVATORS Delegates and reporters are going to have to climb the grand ornamental staircase to the conference chambers. The building has no elevators. But once they get there, they should be comfortable. Cushions for their chairs have been upholstered in leather on one side to make them cooler in the summer. Should the conference extend over into winter, all the delegates will have to do is turn the cushions over; the other side is upholstered in red velvet for cold weather.

Acoustics in the conference hall are excellent, and the French have installed a system of indirect lighting just automatically increases in brilliancy as daylight outside begins to fade.

During the war, German Field Marshal Speer, commanding the Western Approaches of France established his headquarters at Luxembourg, and stayed there until General Jacques Leclerc's tanks ran him out.
