

Here is a "Friendly drink"

What are you doing to keep cool and healthy this summer? Try this! When you rise in the morning drink a dash of ENO'S in a glass of water.

When you travel—when you go on holidays or week-ends—take a bottle of ENO'S "Fruit Salt" along. It is invaluable in counteracting the ill-effects of changes of climate and water and diet.

CHILDREN OF MARY.—On Sunday evening in St. Pauls Church, Summerside, there was a reception of the Children of Mary. The members of the Society marched from the Convent to St. Pauls Church, where about sixteen candidates were admitted to the Order. Rev. Father John J. MacDoner preached an excellent sermon appropriate to the occasion. The service concluded with Benediction of the Blessed Sacrament.

RED CLAY ROADS.—Our red clay roads can be made "things of beauty and joys forever" (so to speak) by the diligent and timely application of the split log drag. Every one admits the efficacy of the drag, but very few communities have applied it to the limit of its capacity—some haven't even given it a decent trial. There's no economy in our importing many thousands of dollars worth of mainland gravel, before making the best possible use of the red gravel with which nature has amply provided us. It is a delight to our tourists to drive on a smooth RED gravel road in preference to the eternal drab and gray of almost the whole mainland of North America. The dark red clay and gravel make the grass look greener by contrast. The running of a dry drag over the roads lightens a dry time is almost time lost. The road drag hauled by a four horse team with proportionate weight, driven by a man who has the "smooth roads" idea, is bound to get results.

about 16 years of age had a narrow escape from drowning. About 5.30 o'clock he was walking along the railroad wharf, Summerside when he slipped and fell through one of the openings. As he struck the water he grasped a spike which he held onto till after 7 o'clock when Mr. Kenny who was taking a walk on the wharf came along and with the aid of several others rescued him. Your Eyes And Your Health

If your eyes are normal, they daily require 40 per cent. of all your nervous energy. If abnormal, they require more, which means eyestrain, which is nerve waste, which lowers your resistance to disease. That's why you should have your eyes examined. That's why glasses frequently produce almost unbelievable results in improving the health—by stopping the waste of nervous energy. Arrange for appointment.
