but who performed gallant service at the picking throughout the day. Naturally they found the sun "a long time going down" and when they called briefly a short time ago, they owned to weariness and aching joints but were gay and happy settling out in the back of Bob's truck for the bright lights of home. As I said, this is a nice quiet corner to come to—this room of mine, when one has been wearied with the cares of the day. Here in the peace and quiet, they seem to drop away one by one until one is refreshed in mind—and rested in body.  
"Are you very tired? Rest a little bit, In some quiet corner, fold your hands and sit. Do not let the trials that have grieved you all the day Haunt this quiet corner! Drive them all away! Let your heart grow empty of every thought unkind That good may hover round you.

MUTUAL  
FIRE INSURANCE  
COMPANY**  
ESTABLISHED 1885  
MUTUAL  
SERVICE AND SECURITY

Fire Prevention should not be the topic for discussion and prevention one or two weeks of the year but should be the year around cause for the greatest care of each person in eliminating any potential cause for fire.

If you know of any weakness or probable cause for fire eliminate it today do not put off until tomorrow.

Every year Canada loses many millions of dollars and many lives through fire, the cause of which could have been easily eliminated.

The following are the causes of a great many fires:—

1. Carelessness.
2. Defective flues and pipes
3. Defective shingles on the roof.
4. Use of gasoline and oil for lighting fires.
5. Defective wiring.
6. Overheated stoves.
7. Exhaust from engines.

The last of these causes could be eliminated altogether if the engine which powers your thrasher or crusher is placed in a different building from the barn or is placed outside a reasonable distance from the barn door so that the fumes from the engine will not come in the barn door and permeate the air in the barn.
