Stocks 25c doz. post paid.

Farm Notes

START RECORDS BUREAU OF FARM ORGANIZATION.

A Central bureau of records of Farmer's business Organizations is being established in Ottawa by the Economics branch of the Dominion Department of Agriculture. The immediate aim of the Branch is to build up a statistical record of the number and location of such organizations, to ascertain the number of farmers marketing their products co-operatively, to obtain reliable information on the volume of business handled in this way, and to provide a basis for research in co-operative organization.

This survey of farmers' organizations covers the whole of the Dominion of Canada. For a number of years the Department of Labour has collected and published information concerning the activities of co-operative organizations. By mutual agreement the Economics Branch is now the collecting agency. The provincial Governments are also co-operative in this work in various ways in order that duplication of effort may be minimized.

Early in the year the secretaries of all known farmers' business organizations in Canada were circularized by questionnaire. The response up to date has been satisfactory and these returns are now being sorted and tabulated. When complete they should present a very good picture of co-operative activity in Canada. With these records as a basis for study the Branch will be in a position to make an analysis of the organization and financial structure of the various co-operatives which will be available to those interested in their development. The Branch will thus provide a directory and will become a consulting agency for farmers' business organizations.

Officers of Co-operative or other business organizations controlled by farmers who have received the forms and have not returned them are urged to do so. Should forms not have been received they may be obtained upon application to J. F. Booth, Agricultural Economics Branch, Department of Agriculture, Ottawa.

Plenty: Old Earth is full to plenty of all we require and there is little of excess where and when the laws of Nature are observed; while with that plenty there is nothing but good, when it is wisely

The Raspberry Fruit Worm

Beetles of the Raspberry Fruit worm, or Raspberry Byturus, which seriously injured the crop on both cultivated and wild bushes in 1931 appeared in numbers over the weekend at Fredericton. Growers of raspberries are warned to watch their plants for this insect, a small brown beetle which feeds upon the developing buds. Later, the beetles will deposit eggs among the stamens of the opening flowers and the larvae hatching from these will attack the green fruit.—R. P. Gorham, Dominion Entomological Laboratory, Fredericton, N. B.

BUTTER PRODUCTION GROWS

The current issue of the Dairy News Letter, prepared by the Dairy and Cold Storage Branch of the Federal Department of Agriculture, contains some very interesting figures with respect to the striking increase in the volume of butter which has been made in Canada during the past year.

The total production of butter for the twelve months ending March, 1932, amounted to 10,917,300 lbs. as compared with 1,162,900 lbs. for the corresponding period in the preceding year. This represents a production value of \$2,362,888 for the former and \$389,419 for the latter.

The production of cheese for the twelve months ending March, 1932, totalled 85,424,700 lbs., an increase of nearly 16,000,000 lbs. over the corresponding period in the preceding year.

It is interesting in this connection also to note the equally striking decrease in the volume of milk and cream exported, which for the twelve months ending March, 1932, amounted to 65,814 gallons of cream and 362,764 gallons of fresh milk as compared with 1,121,974 gallons of cream and 1,208,478 gallons of fresh milk for the corresponding period in 1930-31.

Scout News and Notices

CAPE BRETON SCOUTS PLANT TREES

As a Saturday good turn in May Scouts of North Sydney and Florence troops, N. S., planted 4,000 young pine trees on the farm of J. H. MacKinnon. The work was directed by a forest ranger.

ASSISTANT SCOUTMASTER ONE SPOT

Edward One Spot, formerly of the old 13th (Killarney) Calgary Troop, is an A. S. M. of the new Sarcee Indian Reserve Scout Troop, A. S. M. One Spot is one of the first Indians in the Canadian West to hold an A. S. M.'s Warrant.

SIR MICHAEL SADLER ON SCOUTING

Addressing a recent meeting of Scouts and Guides at Oxford, Sir Michael Sadler, Master of the University College, Oxford, declared that "In the centuries to come people will see in the Boy Scout and Girl Guide Movements the great educational invention of the 20th Century."

A DUCK SCRAMBLE FOR BOYS

A job that any other Scout Troop would gladly have shared fell to the 4th (Elks' Own) Calgary Troop when they were called upon by the keeper of the Calgary Zoo to help catch and move the water fowl to new quarters on St. George's Island. The birds lost a few feathers, and the Scouts gained a few peeks and scratches, but the job was done.

AN ISLAND FOR B. C. SCOUTS

An island in Williams Lake, B. C. has been presented by the village commissioners to the First Williams Lake Scout Troop, as a country home and camp site until needed by the village. A large boat was given by Mr. Ted Gibbon; Patents and the general public were invited to the christening of the boat and the flag-raising on the island.
