CANADA ARRIVES AT LIVERPOOL.

Disquieting rumors which were current last Friday night concerning the steamer Canada en route from Halifax to Liverpool, have been set at rest by the news of her safe arrival at her destination on Sunday. Several anxious enquiries were received by telephone at The Halifax Herald office, Es-

pecial interest was centered in her on account of her having on board many of the survivors of the Bohemian wreck and also some of the passengers from the steamer St. Paul.

FRENCH ARRIVAL IN NEW YORK

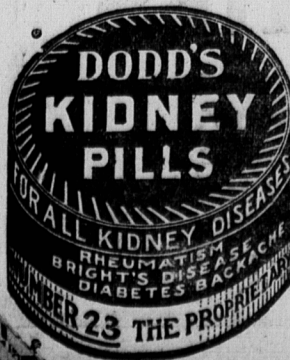

The Cable Steamer Edouard Jerome (French) Halifax, March 10th to the French Cable Company, in ballast.

THE WORLD IS FLYING.

The airship R 33 has been making a tour of the French battlefields, says the London Sphere, and it carried a chef and gave its passengers French cooking, and real beds, with sheets. "On September 15," says the same paper, "during a flight from Amsterdam to England, this lunch was served on a passenger airplane: Salmon mayonnaise, cold chicken, fruit salad and wine."

The flower of the family is usually the last to rise.

Even when a woman weighs her words she gives good measure.

The bride was wearing a white silk net, embroidered with gold, and wore the conventional veil and orange blossoms. She looked charming as she entered the parlor leaning on her father's arm while Mrs. Harry Muttart played Lohengrin's Wedding March. Only the relatives and a few intimate friends were present, but after supper was served a merry group of young people entered to greet the bride and groom. The many beautiful gifts they received, both at the wedding, and at the variety shower held in Lansdowne Hotel give evidence of the esteem in which the bride and groom are held.

Save the surface and you save all - Paint & Varnish

The weather surely is thorough in its work of searching out every joint and remote place in farm machinery. Paint and varnish, however, are equally searching and prolong the life of implements wonderfully. Is your machinery protected?

Somebody Blundered!

THIS house is not old, but look at its condition! Anything but an actual photograph from which this drawing was made might be considered an exaggeration.

Note the way the building has rotted away under the eaves owing to neglect.

Paint—surface protection—would have prevented this ruin. The unpainted metal eave troughs rusted through, water got into the eaves and decay did the rest. Repairing will be expensive business.

This extreme case points an example which any property owner will admit is impressive. Any waste through lack of surface protection is unnecessary waste. Damage has to start at the surface. If the surface is undamaged the property lasts—repair bills are avoided—money is saved.

Your house may or may not be well protected—it will pay to make sure. And remember that surface protection

is vital to everything you own—to all wooden and metal property, to out-buildings, to machinery, to furniture, to everything exposed to weather or wear. A thousand and one things grow old before their time simply through lack of surface protection.

Examine your property as closely as you would expect some one else to do it to whom you had entrusted its care. Save the surface and you save all.

THIS ANNOUNCEMENT is issued by the Canadian Save the Surface Campaign Committee, for the purpose of educating the public in the Preservative and Protective value of Paint, Varnish and Allied Products for the Conservation of Property, and has received the approval of the Canadian Trade Commission in the following words: "The realization of the above objects will lead to employment during the Reconstruction Period and bears our entire approval."
