BABY'S FUTURE

Something for Mothers to Think About

Lives of Suffering and Sorrow Averted

And Happiness and Prosperity Assured by

Cuticura Soap, Ointment and Pills When All Else Fails.

Every child born into the world with an inherited or early developed tendency to distressing, disfiguring humours of the skin, scalp and blood, becomes an object of the most tender solicitude, not only because of its suffering, but because of the dreadful fear that the disfiguration is to be lifelong and mar its future happiness and prosperity. Hence, it becomes the duty of mothers of such afflicted children to acquaint themselves with the best, the purest and most effective treatment available, viz., The Cuticura Treatment.

Warm baths with Cuticura Soap, to cleanse the skin and scalp of crusts and scales, gentle applications of Cuticura Ointment, to allay itching, irritation and inflammation, and soothe and heal, and mild doses of Cuticura Resolvent, to cool the blood in the severer cases, are all that can be desired for the speedy relief and permanent cure of skin tortured infants and children, and the comfort of worn-out parents.

Millions of women use Cuticura Soap, assisted by Cuticura Ointment, for preserving, purifying and beautifying the skin, scalp, hair and hands, for annoying irritations and weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves.

Cuticura Resolvent, liquid and in the form of Chocolate Coated Pills, Cuticura Ointment and Cuticura Soap are sold throughout the world. Depots: London, 27 Charterhouse Sq.; Paris, 5 Rue de la Paix; Australia, R. Towns & Co., Sydney; Boston, 137 Columbus Ave. Potter Drug & Chemical Corp., Sole Proprietors.

THE PREVAILING DISEASE AMONG THE DOGS OF CHARLOTTETOWN

Many are Dying From a Malady that has Baffled Many Owners—The Symptoms Described and the Name of the Disease that Afflicts Them.

During the past few weeks many of the most valuable dogs of the city as well as those of smaller worth have sickened and died from a disease which up to the present has defied the efforts of their owners to successfully combat.

Following upon the poisoning of many canines some time ago it has alarmed those who possess valuable animals whose lives they wish to preserve.

The symptoms are described in the early stages as dullness, loss of appetite, sneezing, chills, fever, undue moisture of the nose, congestion of the eyes, nausea, a gagging cough accompanied by the act of vomition, though rarely anything is voided (if anything, it will be a little mucus,) thirst, a desire to lie in a warm place, and rapid emaciation. This is quickly followed by muco-purulent discharge from the eyes and nose, later, perhaps ulceration of either eyes or eyelids. Labored respiration constipation or obstinate diarrhoea, usually the latter, which frequently runs into inflammation of the bowels. Inflammation of the mucous membrane of the entire alimentary canal exists, all the organs in time becoming more or less involved.

The disease has been pronounced by authorities as distemper, the literal meaning of which is a deranged condition of the animal, economy, particularly applied to animals of the brute creation, to the dog when afflicted with that disease somewhat resembling typhus fever in the human race. As canine pathology has been given more attention in the past few years than formerly, we have now become quite familiar with the nature of the disease and the remedies indicated, consequently the loss by death is comparatively small when proper treatment and attention are employed. Microscopic analysis of the blood during distemper shows the existence of bacilli life. In early days, those dogs that were fortunate enough to survive this disease did so merely through strength of constitution and not from the assistance of any remedical agents, as utter ignorance of the subject then prevailed. The disease doubtless then appeared in a much milder form than that with which our present highly bred animals are afflicted. Owing to more or less inbreeding that has been indulged in to intensify certain forms and characteristics in dogs of most all breeds, constitution has to some extent been sacrificed. Animals bred in this way are, in consequence, less able to resist or combat disease than those with less pretentious claims to family distinction.

The causes are alleged to be bad sanitary conditions, crowded or poorly drained kennels, exposure to dampness, unsufficient or overfeeding, improper diet, lack of fresh air and exercise, all conduce to the development of distemper. It is contagious, infectious, and will frequently appear spontaneously without any apparent cause in certain localities assuming an epidemic form. Age is no exemption from distemper, though it more frequently attacks young animals than adults. Very few dogs pass through life without having it at some period.

An authority writing on the important question says: "If any dog having attained the age of one year in vigorous health, is then attacked with distemper, I know of no reason why he should not recover, providing the proper methods are employed, though occasionally a case occurs in which numerous complications arise, such as inflammation of the bowels, fits, cholera, paralysis, jaundice, pneumonia or broncho-pneumonia, that will resist all the science of the veterinary profession. As a matter of ceremony, I would suggest to dog owners, especially those intending to have their puppies field broken, to subject them at the age of one year, if in robust health to the contagion of distempered animals, with the object of their contracting the disease with a fair chance of recovery. If they come through all right they may then be broken. To have a dog die of distemper after having expended from $100 to $200 on his education, is to say the least very unsatisfactory. Again a dog's sense of smell is sometimes so seriously impaired by the disease so to render him ever after useless in the field."

WILL FIGHT THE BILL.

OTTAWA, September 3.—At a conservative caucus today it was decided to fully criticize the bill to provide for the construction of the Grand Trunk Pacific railway. Mr. Monk will lead the party during Mr. Borden's illness.

THE STEAMER MONTEREY.

LONDON, September 3.—Lloyds' Times' correspondent says an enquiry has been ordered into the loss of the C. P. R. steamer Monterey. It is particularly desirable to ascertain how the vessel came so far out of her course.

SURVEY WORK STARTED.

WINNIPEG, September 3.—Ten surveyors for the Grand Trunk Pacific route are in Yorktown, N. W. T., and will start on the trail line at once. Other parties will also be put on the work, and it is expected the location will be pretty well completed from Winnipeg to the coast within a year.

GENIUS OF THE RACE.

GLASGOW, September 3—Neil Munro, correspondent of the Glasgow Evening News, says that during his visit to Canada he failed to find a Canadian who did not think Joseph Chamberlain the genius of the race and the age.

Piles To prove to you that Dr. Chase's Ointment is a certain and absolute cure for each and every form of itching, bleeding and protruding piles, the manufacturers have guaranteed it. See testimonials in the daily press and ask your neighbors what they think of it. You can use it and get your money back if not cured. 60c a box, at all dealers or EDMANSON, BATES & Co., Toronto,

Dr. Chase's Ointment

GOVERNMENT WORK AT PORT HOOD.

The Government Dredge, St. Lawrence, is now at Port Hood, deepening the approach to and the channel alongside the Port Hood Coal Co.'s Pier. This will enable vessels of small tonnage to be loaded without interfering with steamers and larger shipping, and will greatly facilitate the shipment of coal from Port Hood. When she is finished work at the Port Hood Coal Co's Pier, the dredge will be moved to the Government pier, where the water will also be deepened.

A considerable amount of shipping has been at Port Hood for the past month loading Port Hood Coal for the St. Lawrence and Maritime Province ports.

The Port Hood Coal Company report some difficulty in obtaining a supply of vessels at the present time. They will want a good many during September and October. The demand for Poot Hood Coal is constantly increasing.

HIS LIVER DIDN'T WORK

And Dreadful Headaches and Depression Followed—Cured by

FERROZONE

Mr. Lionel S. Lascelle of Strathcona had a trying time with liver complaint, but wisely used Ferrozone in time. He says: "My liver got sluggish and torpid and made me feel about half dead. When I got up in the morning I was as tired as if I hadn't slept at all. My head ached, and specks swam before my eyes incessantly. If I bent over or did any stooping work I would be in a perfect whirl in two minutes. I felt depressed and out of sorts, and only got relief from Ferrozone. It went right to work, and before long cured me. I feel ever so much improved in health since using Ferrozone, which I strongly recommend for the kidneys and liver."

Mr. Ed. D. Moncrief of Springfield says: "For years I was subject to frequent attacks of liver complaint, and no remedy ever cured like Ferrozone. When my head ached fit to split, and I felt drowsy and sick, Ferrozone relieved quickly. I used Ferrozone two months after being cured, and have'nt been bothered since."

When it comes to curing liver and kidney ills you can't beat Ferrozone. It has a specific action on these organs, and at once puts them in a strong healthy condition. Ferrozone isn't the kind that just relieves—it cures, and cures thoroughly. Ferrozone prevents a return of further trouble, and costs only 50c a box, or six boxes for $2.50. All druggists, or by mail from The Ferrozone Company, Kingston, Ont. Get a supply today.

ANNOUNCEMENTS.

—Wanted—A house for a family of four—Must be near Post Office—address stating rent—C. P. D. Box 228, City. 4 d 3i.

A good boy with a fair education who wants to learn office work and run errands can obtain employment by applying at this office.

PARLIAMENTARIANS IN OTTAWA.

OTTAWA, September 3—The British parliamentary party arrived here to-day in charge of W. T. R. Preston. They visited the commons tonight.

Nursed the Sick, Ruined Her Health:

For Months Mrs. Myles Lay a Helpless Sufferer from Nervous Prostration and Was Cured by

Dr. Chase's Nerve Food.

Mrs. John Myles, sr., of South Woodslee, Essex Co., Ont., is well known through out the surrounding country because of her work among the sick and suffering, and it was on account of overexertion in this regard that her health broke down and she lay weak and helpless, a victim of nervous prostration. Doctors could not help her and she resolved to try Dr. Chase's Nerve Food. As a result she has been thoroughly restored and by recommending this treatment to others has been the means of bringing back health and happiness to many a weakened and discouraged sufferer from disease of the nerves.

Mrs Myles writes:—"When I began the use of Dr. Chase's Nerve Food I was confined to my bed with what the doctors said was nervous prostration. My stomach was very weak and I could not sleep at all for any length of time. Nervous chills and trembling would come over me and at times and I seemed to be getting weaker and weaker all the time. There were also pains on top of my head which caused me much suffering and anxiety.

"After using half a dozen boxes of Dr. Chase's Nerve Food I began to gain in weight and to feel stronger. Since then I have been gradually restored to health and in looking back can say that the improvement has been something wonderful. I used in all forty boxes of this preparation and feel it a duty as well as a privilege to recommend it to all who are suffering from nervous disorder. Several persons to whom I have described my case have used it and been cured and I am sure that I owe my present good health, if not life itself, to Dr. Chase's Nerve Food." Dr. Chase's Nerve Food, 50 cents a box, 6 boxes for $2.50, all dealers, or Edmanson, Bates & Company, Toronto. To protect you against imitations, the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box.

DR. A. JOHNSON'S NEW POSITION.

MONTREAL, September 3—Dr. Alex Johnson, for many years vice-principal of McGill university and dean of the faculty of arts; has been appointed lecturer in classics and mathematics at the Montreal Presbyterian college.
