LOCARNO

"The Locarno Pact" is a subject of outstanding importance at present in view of the discussion at the recent Imperial Conference and the action of the British Dominion with reference to it.

There were in all five treaties agreed upon as follows:

- (1) Rhineland Security compact among Germany, France, Belgium, Great Britain and Italy. (2) An Arbitration Convention between Germany and France. (3) An Arbitration Convention between Germany and Belgium. (4) An Arbitration Treaty between Germany and Poland. (5) An Arbitration Treaty, between Germany and Czecho-Slovakia.

The Rhine land pact is the key treaty. Its most important provisions are as follows:

- (1) Germany and France agree never to fight each other again and to arbitrate all mutual disputes. (2) Germany agrees to join the League of Nations. (3) Germany and France agree that there shall be a Neutral zone in the Rhine country where it touches German, French and Belgian soil, and this, too, has been successful. (4) The frontier between France and Germany is to be guaranteed, the value of fish caught was by five power — Germany and \$1,142,253, most of which came from lobsters. Altogether the German, Belgium and Italy. Should den of the Gulf is ready for a Germany attack France or France Merry Christmas. Germany, the other three nations will go to the aid of the defending power.

According to our despatches Saturday Newfoundland and New Zealand favored acceptance of the whole treaty, Australia favours acceptance provided all the dominions agree to it. South Africa, Ireland and Canada declined to become parties to it.

The attitude of the dominions in this matter again brings us back to the fact that "if Britain is at war, the dominions are at war." The fact have left "footprints on the sands of time" which it will always be responsible for the treaty will follow and which, if followed, will lead, if not to greatness, at least to usefulness and honor.

The excellent lecture by Dr. J. A. McPhee of Summerside on Saturday, published in Saturday's Guardian, is well worthy of careful perusal by our boys among whom we are to look for the men who are yet to contribute to Canada's greatness and the greatness of its people.

Community leadership is one of the pressing needs of today. With proper leadership there shall be a following and a general betterment. Good roads, well-kept barns and outbuildings and neat and comfortable residences are the result of intelligent following of wise leadership.

Providence has been especially merciful this season in withholding the frost until the bulk of the potato crop has been got away. But there is a large quantity still on hand and depending largely on Providence for protection. Notwithstanding the mild weather, winter, to all intents and purposes is here and may come in any night.

Foxes are now claiming the front of the stage along with potatoes, which heretofore have kept possession of the front. The foxes are being scored and splendid records are in prospect for a more than ordinarily successful fur season. The few little millions we get from the foxes will be a welcome addition to the proceeds from the land in the raising of seed potatoes.

One of the most profitable branches of agriculture on the land is the raising of seed potatoes.

The Toronto Mail and Empire has the following editorial on Prince Edward Island in its issue of November 13:

"While the Maritime Provinces undoubtedly have some grievances, it is a pleasure to note that Prince Edward Island has been unusually successful this year with its agricultural products. It was a banner season for potatoes, the most of which are grown for export and the export business is said to have been the largest on record. Moreover, there was the happy coincidence of a good crop and good prices.

"One of the most profitable branches of agriculture on the land is the raising of seed potatoes.

toes which are shipped all over the continent. The Potato Growers' Association is estimated to have exported 600,000 bushels, of seed, and independent growers an additional 100,000, making 700,000 bushels which, at \$1.25 a bushel, would realize \$875,000. One steamer alone loaded at Charlottetown last week 149,836 bushels of seed potatoes for Brooklyn, N. Y., and Norfolk, Virginia, said to be the largest cargo of seed potatoes ever shipped from any Canadian or American port. In addition to that, 2,300,000 bushels of table stock will be shipped which, at 75 cents a bushel, would realize \$1,725,000, making a total of \$2,600,000 for potatoes alone. "One of the most far-reaching advertisements this province has ever had," says the "Charlottetown Guardian," "is the legend in conspicuous red letters on each of the hundreds of thousands of potato sacks now going to the southern markets: Seed Potatoes from Prince Edward Island, 'The Garden of the Gulf.'"

Whatever success may attend the potato-growing business, the Guardian points out that the basic industry of the province is dairying and this, too, has been successful. In addition, by way of extra means, the value of fish caught was by five power — Germany and \$1,142,253, most of which came from lobsters. Altogether the German, Belgium and Italy. Should den of the Gulf is ready for a Germany attack France or France Merry Christmas. Germany, the other three nations will go to the aid of the defending power.

Notes by the Way

The cost of living is always a matter of interest to householders and sometimes one of painful interest. The Bureau of Statistics at Ottawa tells from time to time whether this cost is going up or down. It is figured out on the basis of 29 staple foods consumed by the average family per week and the result is made known monthly. So it turned out in the official report for October that the cost of living had gone down. There is no good reason to doubt the accuracy of the report. The weekly family budget for food had been reduced from \$10.94 in September to \$10.93 in October.

Did it not follow as a natural inference that the Dominion is prosperous, everybody contented and happy and the King Government the best ever?

This white area was due to the white corpuscles of the blood hurrying to the site of the abscess, and sort of walling it off from the rest of the surrounding tissues. These white corpuscles have the power of movement, and can force themselves through the wall of the artery to any point where it is necessary for them to do this protective work.

A London research man has been able to show that anything that irritates the tissues anywhere, stimulates these white corpuscles in the blood so that they pour out from themselves a material that offsets the poison or irritation.

He first irritated the lungs with mustard gas, then injected some under skin, and also applied some to the skin. The white blood corpuscles immediately began the pouring out of the substances that overcome poison. This meant the breaking up of these white corpuscles themselves, but they suffered in a good cause.

Further the more severe the exposure to the poison, the more pronounced was the increase in this poison destroying power in the blood. This is of course all very wonderful to us as we have only the brain power and vision of man, but it certainly gives us food for thought that in so many ways, in every way, we might say Nature is doing her best for us the whole twenty-four hours of the day.

And what does Nature demand in return? Simply that you and I should use the common sense with which we are endowed. This may mean leaving the table just a little before you have eaten a meal that is really too large. It may mean getting sufficient sleep, but not more than you really need. It may mean also establishing a daily intestinal habit and finally five or ten minutes exercise daily with a walk in the outdoors to complete things. And if we do this, we reap a reward in health and happiness, that is beyond the price of riches.

At the Imperial Conference Canada stands with South Africa and the Irish Free State against the acceptance of the Locarno treaties. Australia, New Zealand and Newfoundland favored acceptance. We wonder what the Toronto Globe will have to say now that Premier King has taken his stand alongside of Hertzog and Cosgrave in this crisis of the Empire's history. We shall know shortly. Hertzog wants to banish the Union Jack from South Africa. He still leads the dismemberment procession.

Saint John is presently to have the automatic telephone system, which is already in use in Edmonton, Calgary, Winnipeg, Montreal, Toronto and Halifax, wholly or partially. In the use of the automatic system the subscriber gets the number he is calling without having to ask central. On the base of each telephone is a dial on which the caller works out the number he desires before lifting the receiver. When the receiver is taken off the hook the mechanism at central connects him with the number dialled and keeps ringing at set intervals until answered, or the caller hangs up the receiver. If the number is busy, a signal, heard in the receiver, warns him of the fact.

Will the King and Queen visit Canada and attend our Diamond Jubilee next summer? Millions of Canadians would be delighted if such a royal visit could be brought about, but it seems improbable at present. Successive British sovereigns have visited Ireland from time to time and occasionally they have visited foreign capitals on the Continent. A visit to Canada would be a new departure and would involve the necessity of subsequent journeys to other more distant Dominions later. For these and other reasons we must content ourselves with the occasional and ever welcome visits of the Heir Apparent.

Nine days hence comes the election in Ontario. It will be a busy day among the politicians and the voters whether it turns out wet or dry!

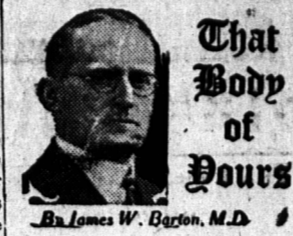

All-white weddings again are fashionable. One was chosen by Miss Joan Southey for her marriage to the Master of Falkland. Her dress was of "mouen age" white satin with a beautiful train embroidered in madonna lilies. She wore orange blossoms in her hair. Her nine young bridesmaids were attired in white frocks and wore wreaths of jasmine in their hair.

Powdered glass in being used extensively in beautifying the new English evening gowns. It is applied broadly-wise to a shot brocade shimmering silver and blue or silver and green and produces an effect much softer than beads.

James W. Barton, M.D.

NATURE'S CARE AND SLIGHT DEMANDS

A most interesting thing was noted years ago, when it was discovered that where an abscess or boil appeared on the skin, that there was first a very dark red central area, then about this centre a light red area, and finally a white area, surrounding the whole abscess or boil.

This white area was due to the white corpuscles of the blood hurrying to the site of the abscess, and sort of walling it off from the rest of the surrounding tissues. These white corpuscles have the power of movement, and can force themselves through the wall of the artery to any point where it is necessary for them to do this protective work.

A London research man has been able to show that anything that irritates the tissues anywhere, stimulates these white corpuscles in the blood so that they pour out from themselves a material that offsets the poison or irritation.

He first irritated the lungs with mustard gas, then injected some under skin, and also applied some to the skin. The white blood corpuscles immediately began the pouring out of the substances that overcome poison. This meant the breaking up of these white corpuscles themselves, but they suffered in a good cause.

Further the more severe the exposure to the poison, the more pronounced was the increase in this poison destroying power in the blood. This is of course all very wonderful to us as we have only the brain power and vision of man, but it certainly gives us food for thought that in so many ways, in every way, we might say Nature is doing her best for us the whole twenty-four hours of the day.

And what does Nature demand in return? Simply that you and I should use the common sense with which we are endowed. This may mean leaving the table just a little before you have eaten a meal that is really too large. It may mean getting sufficient sleep, but not more than you really need. It may mean also establishing a daily intestinal habit and finally five or ten minutes exercise daily with a walk in the outdoors to complete things. And if we do this, we reap a reward in health and happiness, that is beyond the price of riches.

At the Imperial Conference Canada stands with South Africa and the Irish Free State against the acceptance of the Locarno treaties. Australia, New Zealand and Newfoundland favored acceptance. The Public Forum

This column is open for the discussion by correspondents of questions of interest to the Charlottetown Guardian. The editor does not necessarily endorse the opinions of correspondents.

WHY REV. DR. HARVEY CAME TO CANADA

Sir—Rev. Dr. Harvey, ex-Moderator of the U. F. Church of Scotland, who has been featured for weeks in the Canadian Daily Press as addressing Coast to Coast meetings of the "United Church," has—in an unguarded moment—told the secret of his speaking tour in Canada. At a meeting in Moose Jaw, Sask., as reported in the "Moose Jaw Times," of Oct. 30th ult., he began by saying—"It had been conceived by those at the head of the United Church of Canada that he would be useful to that Church as a foil against the Presbyterians not within the Union in Canada."

This then is the object of his visit to Canada—"to be at the head of the United Church"—after taking unjustly from Presbyterians—all over Canada—their church homes, because they would not surrender to usurped officialism their Presbyterian freedom and the rights of the people; after turning them out of doors to worship where they might in barns, sheds, after shameful confiscation of sacred trusts, left in bygone years to the Presbyterian Church, are still planning and working to "foil" them, and have brought Dr. Harvey to Canada for that end.

It recalls another people escaped from bondage, who were on their way to their promised land, when some desert tribes attempted their extinction and failed. "And Moab was much distressed because of the children of Israel, because they were many."

Then "it was conceived by those at the head of the Moabites, that though their own efforts were of no avail 'against' Israel, some one skilled in magic 'would be useful as a foil against them.'"

Then Balak, King of Moab sent messengers to Balaam, with the rewards of divination in their hands, and said to Balaam, "There is a people come out of Egypt, and behold they cover the face of the earth, and they abide over against them. Come now I pray thee, curse me this people, be 'a foil against them.'"

Then Balaam came to Moab, not in a Pullman but on an ass, and even the ass protested. But though "those at the head of Moab sent him to view-point after view-point and urged him, 'Curse me them from thence,' God met him everywhere with, 'Thou shalt not curse them for they are blessed.'"

How history repeats! When Canada's Presbyterians would not submit to ecclesiastical bondage, "those at the head of the United Church," "were much distressed because of them," and they sent messengers to Dr. Harvey saying "There is a people in Canada who believe that the people, not the officials are the Church, and who will not put their necks under the yoke of clerical autocracy, and they are many, covering the whole land. Now therefore come, we pray thee, foil this people for us." And he came.

But though "those at the head of the United Church" have sent him from one view-point to another all across Canada, bidding him "foil the Presbyterians from thence," and though he has performed his magic rites as best he knew, the only result visible is the growth, multiplication of Presbyterians, new groups organizing and new churches rising everywhere.

And who in Scotland does the "foil" represent? So recently as the seventeenth century, the Presbyterians of Scotland for a generation suffered severe persecution. Because they wished to be a Church of free people, to worship God according to conscience, and would not submit to clerical and prelatic control; they were shot on the moor and burned at the stake.

Does Dr. Harvey represent those Presbyterians of Scotland who suffered thus for loyalty in truth and for the liberty of the soul, not for according to his own statement, he has come "as a foil against the Presbyterians in Canada" who have suffered loss for like loyalty to freedom and to truth.

Or can it be that "those who are at the head of the United Church of Canada," who went as far as the law would allow them—and sought to go farther, in like attempt at coercion, can it be that they wished some one from Scotland to teach them how it once was done; how Claverhouse and Lagg and their "moss troopers" "foiled" the Presbyterians who stood for liberty in the days of old, and "conceived" that Dr. Harvey "would be useful to them as a foil against the Presbyterians" in Canada today?

I am, Sir, etc. Ephraim Scott. Montreal November 19th, 1926.

Englishmen Lazy Says Dean Inge

LONDON, Nov. 20.—Dean Inge, "the gloomy Dean" of St. Paul's Cathedral, returned from his tour of the continent with the conclusion that Englishmen generally are lazy.

A tendency to sloth, and a certain indulgence in eating and drinking were faults other nations saw in Englishmen, asserted the Dean before the Bishops' Conference, and in a way he said he agreed with this.

No Home and no Friends

A n all too common occurrence in the police courts is the sentencing of a helpless old man for vagrancy.

"You see me here—a poor old man, As full of grief as age; wretched in both." He had money at one time. He earned good wages. He had his chance as other men had. But, repeatedly, any little surplus he managed to save was swept away.

Not at all a surprising condition when statistics show that 97 out of 100 men are still dependent on their daily wages or upon charity for support when they are 65.

Can you look ahead with confidence to your financial condition when you reach 65? Deposit a small sum each year on an Imperial Endowment Policy and it will pay you a guaranteed monthly pension to keep you in comfort and independence after you are 65. Or it will provide a monthly income for your family should death call you early.

Why not look into this vital matter now? Tomorrow you may be uninsurable. Send in the coupon today.

THE IMPERIAL LIFE ASSURANCE COMPANY OF CANADA HEAD OFFICE :: TORONTO, ONTARIO

Branch Office: 70 Princes Street CHARLOTTETOWN

Youths And Smoking (W. L. Cotton) "Where did you get that cigarette, my little man?" was the question put by a lady a few days ago to a boy of about nine years, who was puffing away manfully on one of our streets. The question was answered— "and in courtesy to the cigarette seller, no action was taken. In point of fact the sale of cigarettes to boys is so common that most of the dealers in such things seem to have forgotten or to have never known, that there is a law in our statute book which reads: 'Any person who either directly or indirectly sells, or gives, or furnishes to a minor under sixteen years of age cigarettes, or tobacco in any form, shall, on summary conviction before a stipendiary magistrate or justice of the peace, be subject to a penalty not exceeding twenty-five dollars, or to imprisonment with or without cost, or to both, for any term not exceeding thirty days, or to both fine, with or without cost, and imprisonment to the said amount and to the said term in the discretion of the convicting magistrate.'"

Further, the law is that "any person under sixteen years of age who has in his possession, or smokes, or in any way uses cigarettes, cigars, or tobacco in any form, shall be liable to a penalty not exceeding five dollars, or to imprisonment for any period not exceeding seven days; but the act does not apply to a sale to the minor for his parent or guardian, under a written request or order of the parent or guardian."

After the passage of this law two ladies prominent in the C. W. T. U. were active in the prosecution of offenders against it; but when they left this Province, prosecutions ceased.

It is to be noted that this law is in a class different from that of the by-law which forbids cycling on our sidewalks. The latter safeguards the right of pedestrians to the sidewalks, and so long as the pedestrian is not interfered with by the cyclist no one is injured or has cause for complaint. But the former is for the safe-guarding of our brightest boys and girls against that which is held to be injurious to their health. Grown men and women obtain, by the use of tobacco, a gentle exhilaration soothing and social comfort, for which they are willing to pay money and which does them no harm when not used in excess—may even be beneficial in some cases. But when used by growing boys and girls, the testimony of physicians is that the nicotine in tobacco has the effect of "decreasing bodily and mental vigor and specially produces symptoms of anaemia palpitation, intermittent pulse and other affections of the heart and circulation." Of course the doctors differ in respect to the use of tobacco as respects other things, and, of course, there are differences in the effects of the use of tobacco as there are differences in the organization of individuals. But for the young it is generally admitted that cigarettes, only our workmen, but the employes, are not good—are, in respect to most youngsters, bad. It is even said that one effect of the use of

toilet articles will be included in your list of gifts to be bought. This is the place to come for them. Our stock is full of new things—many of them just on the market for the first time. A line of toilet articles, such as ours, affords wider choice of useful things than almost any other line to be thought of. You can find something in this superb showing at any price you can wish to pay. Here's just a partial list. DUSTING POWDERS, BATH SALTS, TOILET WATERS, PERFUMES, TOILET POWDERS, FACE POWDERS UP TO \$3.50 A BOX, ATOMIZERS, MANICURE SETS, COMBATS.

DAILY LESSONS IN ENGLISH By W. L. Gordon

WORDS OFTEN MISUSED: Don't say "the child has a right to be commended." Say "deserves to be commended." MISPRONOUNCED: government. Pronounce the "ern," and not as if "er." NOT AS IF "ER." NOT MISSPELLED: stomach; stomachache. SYNONYMS: education, learning, knowledge, tuition, training, instruction, culture, schooling. WORD STUDY: "Use a word three times and it is yours." Let us increase our vocabulary by mastering one word each day. Today's word: ILLUSTRIOUS; greatly distinguished; renowned. "He is the son of an illustrious father."

Daily Selections FOR Guardian Readers

November 22, 1926 SET THE SOUL—"Now set your heart and your soul to seek the Lord your God." 1 Chron. 22:19.

PRAYER—"O Lord my God, in Thee do I put my trust."

THE QUEST I sought for God within a stately church, I heard the organ note, the pealing song, And yet the long and diligent my search I could not find Him in the praising throng And as I wandered forth my heart was cold With fear that God had left the world alone, For if His Church His presence did not hold Nor earth contain Him, then His Great White Throne War too far off for mortal to attain I sought to country, fresh with new-born spring, With rapture suddenly a full-tuned strain Soared up to Heaven. The lark was on the wing And up its cadenced stairway my soul trod And fell and worshipped at the feet of God. —Amanda Bebbington.

ALL-WHITE WEDDINGS. All-white weddings again are fashionable. One was chosen by Miss Joan Southey for her marriage to the Master of Falkland. Her dress was of "mouen age" white satin with a beautiful train embroidered in madonna lilies. She wore orange blossoms in her hair. Her nine young bridesmaids were attired in white frocks and wore wreaths of jasmine in their hair.
