SWELLINGS

come down, just as soreness and lameness come out, when "ABSORBINE JR." is rubbed in.

Absorbine Jr.

When an accident happens, you want help quick! A bottle of "ABSORBINE JR." in the house is an emergency treatment for cuts, burns, bruises, sprains, strains, it relieves the pain—reduces inflammation—prevents infection.

New Rail Service To Pacific Coast

Canadian National Railways inaugurate New Fast Daily Service Between Montreal and Vancouver—Luxurious Trains in Operation.

From all points in the Maritime Provinces there is the finest of through rail service to the Pacific Coast, via Canadian National Railways.

All that travel comfort can suggest, convey, or devise, is here for the traveller. The most modern of steel equipment—first class coaches, standard sleepers, tourist cars and luxurious compartments cars, are on the through trains between Montreal and Vancouver.

The Ocean Limited leaving Halifax at 8.10 a. m. daily, arrives in Montreal at 9.20 a. m. the day following. Connection is made with the splendid train operating under Canadian National and Grand Trunk management, leaving Bonaventure station at 5.00 p. m. This train, with its equipment of compartment cars, standard sleepers, standard diner, tourist and colonist cars, arrives at Ottawa at 8.00 p. m. and leaving at 8.20 p. m. is at North Bay early the following morning.

Leaving Halifax on Monday morning for instance the traveller arrives in Vancouver on Sunday morning, just six days and a night of travelling under the finest of travelling conditions.

Particulars of this new through service can be now supplied by all Canadian National Railway ticket agents. Rates can be quoted and reservations made. It is a new era in Transcontinental travel that is but the beginning of a greater railway development under the Canadian National system.

Mr. S. J. Hungerford

Samuel J. Hungerford, who has been appointed Vice-President in charge of Operation and Maintenance of Canadian National Railways, is of the type of man, young in years and old in experience.

As a boy of 14, at Farnham, Quebec, he first really became acquainted with a railway locomotive. Metaphorically speaking, he boarded it then and has made it carry him from the halls of the mechanic's apprentice to the chair of the Vice-President of what will be, when the Grand Trunk System is included, the world's greatest railway.

Mr. Hungerford is a man of quick action who never seems to be in a hurry. He has a wide circle of friends in the railway world—friends that he made while mastering his various jobs in the Mechanical Department at important railway points clear across the country.

In 1910, when the Canadian Northern, having a little more than 3,000 miles of railway in Western Canada, required a head for its Mechanical Department, the management approached Mr. Hungerford, at that time Superintendent of the C. P. R. shops at Winnipeg.

He knew the West and also the country served by the C. N. R. He had seen the C. N. R. expand from a system of 4,319 miles in 1886 to one of 11,000 in 1910. He knew also that Canada required a great deal more railway.

The expenses of the Mechanical Department of the C. N. R. increased sharply during the first year of office of its new Superintendent of Rolling Stock, whose motto was in effect "First get your engines in good shape, then use them."

The new C. N. R. official had also a definite idea as to what a real engine on a real railway ought to be. The C. N. R. standard or 100 pc. locomotive was of 23,000 pounds drawbar pull, as against the C. P. R.'s 20,000 pound standard, which shows that the new road was nothing if not ambitious.

At the end of five years, the Mechanical Department of Western Railway was in first class shape, and S. J. Hungerford's jurisdiction was extended over the Eastern lines of the system in May, 1915.

When that work had been completed, a vacancy occurred in the General Management of the Eastern Lines of the Canadian Northern and Mr. Hungerford was appointed to the position, which he occupied until the consolidation of the lines of the Canadian Government Railways with those of the Canadian Northern Railway System affected one year later.

When that work had been completed, a vacancy occurred in the General Management of the Eastern Lines of the Canadian Northern and Mr. Hungerford was appointed to the position, which he occupied until the consolidation of the lines of the Canadian Government Railways with those of the Canadian Northern Railway System affected one year later.

Coal Embargo A Temporary Measure

LONDON, Oct. 18.—Foreign shipping officials here were told by the British Coal controller's Department this afternoon that the order issued today prohibiting the coaling of foreign ships was issued to enable the checking up of available supplies. The officials were given assurance that after this had been done, passenger and mail carrying vessels would receive first consideration in the at-

ing and Maintenance activities. The Job of Operating Vice-President is one of the most important in railway service, and as the Canadian National is easily among the biggest of railway systems, S. J. Hungerford's new job may be classified in like proportion.

He will have the direction of forces that spend more than 90pc of the total operating expenses of the System, and these on the present mileage, (including the G.T.P.) and with the present scale of expenditure amount to 187 million dollars per annum. It is Mr. Hungerford's business to see that the great expenditures of money day by day on the publicly-controlled road are so made as to insure the largest return in comparison of the structures and equipment and the movement of the largest amount of traffic possible. Those who know S. J. Hungerford will have complete confidence in his capac-

ity. He is regarded as one of those men who, with the President, Mr. D. B. Hanna, will set new standards of devotion to duty and loyalty to employers—in this case the general public of Canada.

The officials also were assured that there would be no discrimination against foreign ships in these classes.

get back home—even to the sacrifice of cargo space. Officials of the steamship company's operating passenger liners said that the order would not interfere with their sailings.

The firm of Chandler & Bell are preparing a splendid monument to the memory of the late Rev. D. McLean. It is of dark granite with base of 4 feet 2 inches, by 2 feet 6 inches. The monument when completed will stand at least five and one-half feet in height. It is oblong in shape, and the lettering is striking evidence of the skill of the workman with the mallet and chisel. The monument is being erected by his congregation, including the many churches in which he so frequently and ably ministered.
