TENDERS

SEALED TENDERS will be received by the undersigned until noon on Wednesday, January 27th, 1915, from any person or persons willing to contract for the construction of any one of the following works:—

In King's County:—Wharf at Midgell; Bridge at South Lakes; Approaches to Mink River Bridge; Approaches to Montague Bridge.

In Queen's County:—Shea's Bridge at Iona; Gascoigne Bridge, Flat River; Clyde River Bridge.

In Prince County: Hickey's Bridge, West Cape; Whaleback Bridge, Malpeque; Summerside Road near Summerside.

Plans and specifications may be seen and forms of tender obtained at the Provincial Engineer's office, Charlottetown and of each nearest work at the following places:—

Office of H. D. McEwen, Morell.

Store of John McLean, Souris.

Store of Benj. Clow, Murray Harbor North.

Store of Martin McKinnon, Montague.

Store of Joseph McCabe, Iona.

Store of A. D. Ross, Eridon.

Office of G. M. Matthews, O'Leary.

Store of P. McNutt & Sons, Malpeque.

Office of Hon. James A. McNeill, Summerside.

Each tender must be accompanied by an accepted check on a chartered bank, payable to the order of the Commissioner of Public Works, equal to ten per cent. of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so or fails to complete the work contracted for. If the tender is not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

Tenders to be addressed to the undersigned and marked "Tender."

L. B. McMILLAN,
Secy. of Public Works.
Public Works Office, Charlottetown,
P. E. I., Jan. 12, 1915.

DISTRIBUTION OF GOODS SENT TO BELGUM

HALIFAX, January 16.—A. S. Barnstead, secretary of the Belgian relief committee, has received from the Rotterdam office of the American commission for relief in Belgium a statement of the distribution of the goods sent by the steamer "Dorie."

The lumber and clothing were distributed in Holland, while the provisions were forwarded by lighter, as follows:

300 tons of flour to Brussels; 308 tons of flour and potatoes to Eysien and Burg Leopold; 353 tons of flour, meat, beans, potatoes and various foodstuffs to Antwerp; 353 tons meat, potatoes and various foodstuffs to Brussels for general stock; 232 tons of meat, potatoes and various foodstuffs to Ghent; 270 tons of potatoes to Brussels for relief of Mons.

The printed statements issued by the commission for relief in Belgium show that the "Tremorvah," the first drift ship, arrived in Rotterdam on the 16th of November, being the first ship to arrive from over the seas and the first to reach the country to the suffering Belgians. Some purchases had previously been made in London by the Belgian Government, and by certain municipalities, but the first gift from outside of Belgium itself was that from Nova Scotia.

The next gift ship to arrive was the "Manapequa," from Rochefort, New York, arriving at Rotterdam on the 21st of November. The second ship from Nova Scotia, the steamer "Dorie," arrived on December 22nd.

The statement also shows the number of ships promised and the expected dates of sailing. A further statement gives a summary of the supplies dispatched, and their distribution up to December 4th.

The secretary has received a large number of letters from grateful committees and refugees who have been helped by burghomasters who have interpreted the feelings of the interned and suffering Belgians in Holland. The following newspaper account of the work in one particular village will prove of interest:

Published at Zwolle, Holland.

"The long expected shipment of clothing from Nova Scotia (Canada) destined for the Belgian refugees residing at this town arrived on Monday last. The whole committee (clothing department) assisted by the ladies of other departments of the committee at once separating and sorting the goods and the upper rooms of 'Hulse Eekout' were gradually filled with coats, skirts, costumes, overcoats, pillows, etc., warm underwear, all woolen, as generally worn in that country.

Fortunately, there were also collections of new and very good work shoes. The committee already had hundreds of guldens for shoeing and the repairing has also swallowed up a lot of money.

Up to the present nobody was disappointed, and the committee have the satisfaction of knowing that all Zwolle refugees have been helped as regards shoe repairs also.

With a view to better financial management, this will be discussed at a requested conference with the board of magistrates and the burghmaster.

The distribution of the clothing is arranged by the ladies, who are charged with taking care of the refugees at the riding school and various institutions, and by the committee in the neighborhood; while if some interned soldiers' wives are in want of clothing for themselves or for their children, they will not apply to them in vain.

One fact was not known to the population of Canada, viz., that twelve young Belgians will be born at Zwolle, whose mothers have got pleasant homes with private people (through the committee) for the last months before their accouchement, this being, especially for them, a more suitable place than in the camps.

Baby linen was not sent with the clothes, and yet the mothers hope the women at Zwolle will once more inspect their stock. Swaddling clothes are especially necessary.

On arrival of the future mothers from Oldebroek we were agreeably surprised by six child-ben baskets, and just later by a nicely packed box containing all necessities for a baby, but it is not sufficient, and we sincerely trust the nice example will be followed, especially seeing that the first Belgian child was born yesterday and the mother was glad of the baby linen presented to her. Among the future mothers there is one expecting her seventh child. She lives with her husband and six children at the riding school, and her six babies always look clean and healthy.

To conclude we are printing some letters which were attached to the clothing. These are of a divergent nature.

A letter was attached to a pillow of which we, for briefness' sake, will give you the translation:

"These pillows are destined for a dear old lady who has lost her relatives in the terrible war. May God help you all in the sender's prayer, and if at any time you will write us, telling what you have experienced, please address."

And another letter fastened to a boy's coat (already replied to by a Belgian boy of the same age) was written in French, the translation of which is as follows:

"My dear friend, I am an Englishman, twelve years of age. I am at school and learn French. Where are you going to live? Have you seen big battles? Everyone in Canada is feeling for Belgium and is proud of that country. Will you please write to me. I remain,

NEWCOMB LAYTON,
New Glasgow, Nova Scotia, Canada.

THE SEARCH FOR RUBBER.

The recent privateering exploits of the cruiser Emden cost the rubber trade in the United States a million dollars. During her riotous career in the Pacific Ocean, among the ships she sank were three merchantmen, carrying an aggregate of thirty-nine hundred tons of crude rubber. With the price of rubber seventy cents a pound in the London market—and London is a world centre for the manufacturer of rubber—this industry was thus robbed of five and a half million dollars. With a consequent rise in insurance rates, due to the hazard of transport, the commodity advanced twelve cents a pound in the American market. Coincident with the destruction of the gallant cruiser, the price rapidly fell toward normal.

It was only a year or so ago that the results obtained by chemists encouraged industry to believe that the day was not far distant when the laboratory would supersede the rubber plantation. Artificial or synthetic rubber was to satisfy all our present commercial needs and to take charge of a hundred newly-created demands. That, at least, was the hope of the enthusiast. In their mind's eye they saw the doom of the natural product written large on the wall. They foresaw the rubber forests of Brazil and the Congo revert to their primeval state.

LIFE AND LOVE.

Alas, how easily things go wrong;
A sigh too much or a kiss too long,
And there follows a mist and a weeping rain
And life is never the same again.

Alas, how hardly things go right;
'Tis hard to watch on a Summer's night,
For the sigh will come and the kiss will stay,
And the Summer's night is a Winter's day.

And yet how easily things go right,
If the sigh and the kiss of a Winter's night
Come deep from the soul in the strongest ray
That is born in the light of a Winter's day.

And things can never go badly wrong
If the heart be true and the love be strong;
For the mist, if it comes, and the rain
Will be changed by love into sunshine again.

—George Macdonald.

APPOINTMENT FOR MAJOR INGS

ST. JOHN, N. B., Jan. 18.—Major Ings of Charlottetown, has been appointed to command a squadron of Maritime mounted rifles.

SUBMARINE FLEET BUILDING IN CANADA.

MONTREAL, Jan. 16.—A fleet of submarines for the British navy is under construction at Montreal. An order for twenty under-water craft of the English design has been placed with the Canadian Vickers Company of Montreal and work has been started on ten of the boats.

The company is a branch of the English Shipbuilding firm, Vickers, Sons & Maxim of England, which built the first dreadnought and many other powerful boats for the Admiralty. They commenced the construction here of a floating dock and a shipyard five years ago. The dock has been in commission for some time, but the yard is just being completed. It has one feature which is found in no other shipyard in the world. This is an immense shed of steel and glass large enough to permit two first class cruisers to be built simultaneously.

The building shed was thought to be necessary if construction work upon ships built first abroad and many other powerful boats for the Admiralty. They commenced the construction here of a floating dock and a shipyard five years ago. The dock has been in commission for some time, but the yard is just being completed. It has one feature which is found in no other shipyard in the world. This is an immense shed of steel and glass large enough to permit two first class cruisers to be built simultaneously.

The company here has recently brought out a large force of experts from their British yards and several hundred workmen. It is proposed to build both the engines and the hulls of the submarines in the Montreal yard.

As the St. Lawrence River is closed by ice in November each year and remains closed for five months, a special effort will be made to complete the construction of the ten submarines now under way before the season of navigation next closes, so that delivery of the craft may be made to the Admiralty in time for use next Winter.

FOR FREEDOM, HONOR, JUSTICE.

But when the character and motives of this war became fully known and realized, the Moslems of India, any such sentiment were not behindhand in demonstrations of attachment to the Throne and

A SEWING MACHINE.

Let future sufferers from appendicitis take heart, while incidentally yielding up their veheminent appendages. Instead of being "sewed up" by hand-operating tables, they may fight out their troubles on a surgical sewing machine. A Chicago surgeon, Dr. E. W. Vyllys Andrews, has designed an apparatus to repair automatically surgical incisions.

For a number of years Dr. Andrews tried to perfect a sewing machine for wounds, constructed with platen, fixed needle and bobbin or shuttle. Yet in spite of the fact that several models and toy machines are made small enough to handle easily, none of them is capable of being brought into cavities or depths of wounds, nor is it possible to sterilize them easily. Moreover, the needle in question places only what are called cross stitches, whether one or two threads are used, and they cannot be readily adapted to overhead or glover stitching.

Dr. Andrews became satisfied that there never could be designed a shuttle machine that would be anything but clumsy, heavy and inefficient, and therefore dangerous about a wound. With forceps, however, is it different. Surgeons are familiar with these and know that they can place them in all sorts of deep and superficial locations even more readily than the hands or fingers. Dr. Andrews accordingly set about to design a forceps, carrying insert stitches by merely opening and closing their blades, thereby combining some of the speed and accuracy of the sewing machine and the nicety and safety of hand-sewing.

Dr. Andrews' device consists of a forceps with a needle at the end of one of the blades. When the handle of the forceps is closed the needle passes through the flaps and is auto-

MOSLEMS OF INDIA HAVE SWEEP ASIDE ALL FEELING BUT LOYALTY TO EMPIRE

LONDON, Jan. 16.—A special dispatch from Delhi, India, says—His Excellency Lord Hardinge, the Viceroy, delivered a striking speech before the Vice Royal Council here on the participation of the Empire of India in the war. The galleries of the Chamber were crowded, and the address of the Viceroy was listened to with the most intense interest. Lord Hardinge, at the outset, expressed regret at the participation of Turkey in the European conflict as an ally of Germany, and reviewed the events leading up to that event. His Excellency proceeded:—

A STRIKING FACT.

"I am well aware that many of the leading Moslems of India have done their duty to the utmost to avert war, but the authorities at Constantinople turned a deaf ear to all pleas. It is a striking fact that while thousands of Moslems are now fighting in the ranks of the British, French and Russian armies, not a single Moslem ex-aggeration to say that Emperor Russia's military clique, under Germany's compulsion, betrayed the interests of Islam, and that the Turkish Government, in submitting to it, has abdicated its sovereignty, and Turkey must now face the consequences of those actions. But however the tide of no event may shape, there can be no doubt that the Holy places shall remain inviolate and that Islam will still be one of the great world forces.

FOR FREEDOM, HONOR, JUSTICE.

"From the moment that the intervention of Turkey appeared probable, it was clear that amongst the Moslems of India there would be a natural sentiment of sympathy with a great Mohammedan power. But when the character and motives of this war became fully known and realized, the Moslems of India, any such sentiment were not behindhand in demonstrations of attachment to the Throne and

EMPIRE, AND A TOWERING WAVE OF PATRIOTISM AND LOYALTY SWEEP OVER INDIA FROM SHORE TO SHORE.

GERMANY'S MISCALCULATION.

It has been a source of gratification to me to witness this universal demonstration of the loyalty of all classes and creeds of the people of India. This has been one of Germany's miscalculations which will bring about her ruin.

"What has been particularly satisfactory to us has been the splendid behaviour of the Indian troops at the front. No troops could have behaved more gallantly. This is recognized by all. We know it could not be otherwise. It has also been a source of pride to us that in accordance with the boon announced at the King-Emperor's Durbar, two Victoria crosses have already been awarded to brave Indian soldiers—this much coveted decoration having in one case been bestowed by the hand of the King-Emperor himself.

FOUGHT IN FIVE THEATRES OF WAR.

"On a previous occasion I announced that India would send forces over numbering 70,000. Since then we have done much more, thanks to the energy and powers of organization of the commander-in-chief and the military authorities. British and Indian troops have been fighting side by side in theatres of the war—France, Egypt, East Africa, the Persian Gulf, and China. We have despatched, or are despatching nearly 200,000 men overseas to fight for the Empire of which we are proud to be a veritable living unit. We have heard of the requirements of a number of fresh troops from England so that at the same time we have maintained our military forces on the frontier unimpaired.

"We are all proud of our military forces, and of their gallantry. The fact that the Government of India was able to help the requirements of the supreme mark of my absolute confidence in the fidelity and gallantry of our troops and in the loyalty of the Indian people. That confidence is being every day more and more justified. We need feel no doubt regarding the ultimate triumph of right over might."

disadvantage in this respect. While some surgeons suture wounds rapidly, the majority of the time of the entire operation for final closure. Where the time of an operation is so unevenly divided between the internal and external closure, the former is actually much briefer than the latter, and rapid interior work is robbed largely of its value to the patient by prolonging the operation and anaesthesia.

matrically seized by the opposite blade, at the same time carrying the thread through the tissues. By pressing a catch near the middle of the forceps the needle is released from the second blade, returns to its original position in the first blade, and is thus made ready by a fraction of a second. While no machine can have the delicacy and tactile sense of the human hand, the speed gained in the majority of operations by the use of the new invention more than offsets and

The Joy of Good Health Is Now Experienced

Nervousness, Dizzy Spells and Sleeplessness Are Now a Thing of the Past.

This is a cheerful letter from Mrs. Peacock, and it should bring joy to the heart of many a reader of this paper. Dizzy spells and sleeplessness are symptoms of exhausted nerves, and are the bugbear of many women, who do not know just what treatment to use.

You can read Mrs. Peacock's letter and take courage for she has proven that Dr. Chase's Nerve Food is a complete cure for these troubles. So pleased was she with the results obtained that she wants other women to know about this food cure.

Mrs. Thomas Peacock, 23 Hiawatha Street, St. Thomas, Ont., and whose husband is conductor on the Wabash Railway, states:—"I was quite run down in health, was very nervous, did not sleep well, and had frequent dizzy spells. Believing this to be the result of an exhausted nervous system I began using Dr. Chase's Nerve Food, and can say that this medicine did me a world of good. It entirely freed me of the symptoms stated above, but my health generally, so that to-day I feel that I am quite well again."

In a more recent letter Mrs. Peacock writes:—"Dr. Chase's Nerve Food has done me a world of good, and I would be pleased to tell everybody so."

In nearly every issue of this paper you will find letters about Dr. Chase's medicine. If this one does not describe your case watch for others or write to us. Dr. Chase's Nerve Food, 50c a box, 6 for \$2.50, all dealers, or Edmondson, Bates & Co., Limited, Toronto.
