USE BEAVER FLOUR IT IS THE BEST

The Woman in Halifax Who Didn't

A little incident about "Beaver" Flour

MRS—(well, never mind her name) couldn't make good Pies with "Beaver" Flour. The trust was "always heavy", as she told her grocer.

He couldn't understand it, because he was selling "Beaver" Flour to all his customers. In fact, none of his customers would use western wheat flour after trying "Beaver" Flour.

The grocer asked Mrs.—how she made the pies. The recipe seemed all right until she came to the water.

"What kind of water do you use?"

"Why, WARM water, of course", exclaimed the poor young bride.

"Well, just try COLD water, ICED WATER, and you'll have the kind of Pies you read about."

"Beaver" Flour is a better pastry flour than even special pastry flours; because it contains the same choice Ontario wheat from which special pastry flours are made. In addition, it also has a little Manitoba wheat to increase its strength.

This means, more Cake and Pies and Pastry to the barrel, while retaining its whiteness, lightness and home-made flavor.

Being blended in exact proportions, it is always uniform in strength and quality—and you can depend on it to give you the best results every time.

Order a bag at your grocer's and try it when next you bake.
