CHURCH OF SCOTLAND—Rev. Ewen MacDougall, B. D., will preach Sabbath 13th. at Murray River at 10:30; Brooklyn at 3 and Kinross at 7 p. m.

MRS. J. McLAGAN demonstrator of Canadian Gossard corsets, Gossard line of beauty and Gossard combinations will be here on Friday afternoon and Saturday, May 11th and 12th. Come in and be fitted. Prowse Bros., Ltd. 4370-5-9-41.

GAZETTED—In the list of appointments, promotions, etc., Canadian Militia, recently gazetted appears the following: Canadian Artillery:—1st (P. E. L.)—Med. Bde. The period of tenure of cmd. of Lt. Col. J. P. Hooper, M. C., V. D., is further extended to the 14th April, 1929. The appointment of George S. M. Larter, O. A. S., as caretaker (Public Works Department), Charlottetown, has also been gazetted.

CFCY, CHARLOTTETOWN—The New Glasgow News of the 7th says: CFCY, the Island Broadcasting Station, came in with good volume yesterday. The writer did not hear the forenoon broadcast for the good and sufficient reason that he was better employed, but he did hear the test broadcast during the afternoon when Mr. Rogers announced that they were broadcasting with 100 watts power as compared with 50 watts heretofore. We have heard CFCY just as early in the past, but that was of course, under transmission conditions more favorable than those of yesterday afternoon. CFCY came in clearly in good volume, and there is no doubt that the change in power will help materially in putting Charlottetown on the radio map. The Island Radio Co. are to be congratulated on their progressiveness. Their re-broadcasting on occasions of London, England, is just a case in point.

LOCKHART-CROSSMAN.—A wedding of much local interest was solemnized on Saturday afternoon at the residence of Mr. and Mrs. Howatt Sudbury, 66 West Street, when their niece, Miss Etta Evelyn Crossman, was united in marriage to Bliss G. Lockhart, son of Mr. and Mrs. M. G. Lockhart. The bride looked charming in a powder blue georgette gown with hat to match and carried a beautiful bouquet of Ophelia roses and sweet peas. She was given in marriage by her mother, Mrs. S. B. Crossman, of Central Bedouque, P. E. I. The house was prettily decorated for the occasion with ferns and sweet peas, the bride pair standing beneath an arch of bridal bells. The ceremony was performed by Rev. Henry Irvine in the presence of immediate friends and the wedding march was played by the bride's aunt, Mrs. Percy Sudbury. Mr. and Mrs. Lockhart left for a trip through Nova Scotia and on their return will reside at 135 Dufferin Street.—Moncton Transcript.

CALEDONIA PRESBYTERIAN CHURCH—On Sabbath morning, May 6th, the young people of four Sunday Schools of the Caledonia Presbyterian Church were gathered in the Morning Worship, eager to learn the final results of a contest between the schools. This was a contest in the memorizing of the Scriptures, Hymns, and the Catechism, as outlined by the Presbyterian General Assembly. The contest had been in continuance since October, 1927. The school which earned the largest number of awards according

to the number of pupils was to be presented with a beautiful felt banner and was to be known as the Banner School. The contest had aroused a great deal of enthusiasm and some lively competition. The Banner was finally presented to the Bellevue Sunday School, which with an enrollment of 22 pupils had earned 77 awards, or an average of 3.5 per pupil. The banner was presented by the pastor, Rev. Quincy A. McDowell, to the superintendent of the Bellevue School, Mr. Hugh MacPherson, who responded very graciously to the request to tell how they had won it. The other schools competing in the contest were the Glen Martin Sunday School, who earned 32 awards, Miss Murdina Munn, Supt.; the Lewis Sunday School, which earned 47 awards, Mr. George MacLean, Supt.; the Caledonia Sunday School, which earned 34 awards, Mr. Malcolm J. Stewart, Supt. 190 awards in all were earned by the 66 pupils of these four schools. Each school is to be highly commended for their splendid work.

EDMONTON MAN HEADS LUMBERMEN
 J. F. McMillan Elected President Northern Alberta and B. C. Body

CALGARY, April 25—Conditions in the lumber business of western Canada at the present time are fairly good, it was stated by I. R. Poole, secretary of the northern Alberta and British Columbia Lumbermen's Association, following the annual meeting held here Tuesday jointly with a meeting of the Mountain Lumber Manufacturers' Association. Prospects are deemed fair, he said. Prices during the past six months have been unchanged at a comparatively low level. Building in the west this summer is expected to make a good demand.

W. K. Nichols of Prince George presided. J. F. McMillan of Edmonton was elected President of the Northern Alberta and British Columbia association, Walter Jack of Vancouver, B. C., and A. B. Donley of Edmonton, vice presidents. The Mr. McMillan referred to above was formerly Manager of the Royal Bank of Canada, Charlottetown and Edmonton, Alta.

Sunspots Cause Of Crime

The influence of sunspots on human beings is said to be a probable cause of crime waves, startling discoveries having been made by a Russian scientist regarding the effects of the sun on human conduct. According to this authority the responsibility of a person in the commission of a crime decreases according to the nearness of the period of the sunspots' greatest activity to the time of the crime. Sunspots produce an enormous quantity of electrons that cause strong magnetic disturbances. These electrons also cause notable alterations in man's emotional and volitional centres, rendering him in a certain sense irresponsible for his actions. This should prove as comforting to the Soviet Government as that rhyme of "Hereditas" is to those of lesser peccadilloes:— Our heads within the mesh of Fate are thrust, We do not as we should, but as we must; Consoling thought when we are on the bust! And did not the Soviet Government itself come into power by terrorism far surpassing those of the French Revolution, during the last great Sunspot period, 1918?

The New Peoria Fertilizer Sower

As our original stock of Fertilizer sowers ran low during the last few weeks, we have ordered out another carload of these machines, and these are being unloaded at our western Warehouse in Summerside, to take up our orders in that section. We now have an ample supply in both Charlottetown and Summerside, and are able to meet all demands for these machines immediately.

For those growers who are interested in this simple method of spreading fertilizer, and who are not yet familiar with the points of the New PEORIA Sower, we are attaching the following explanation and remarks.

The New Peoria Sower

is a fertilizer spreading machine which attaches to the end of the wagon box. There are no holes to bore and no cleats to attach and it can be put on without removing the tail board. It is driven from the rear wheel of the wagon. It spreads the fertilizer over the ground very evenly and easily, and can be equipped with several different speed sprockets which will regulate the width of the spread from ten feet up to twenty four feet. It has been specially designed for spreading damp and sticky chemicals such as exist in unmixed fertilizers.

Construction:

This machine has been designed with the idea of perfecting the four most important points in this type of machine, namely: STRENGTH, SIMPLICITY OF WORKING PARTS, EVEN ADJUSTABLE SPREAD, ACCESSIBILITY OF PARTS FOR CLEANING. It contains only one half the chains, fans and gears necessary to other Endgate Sowers. Each of these working parts is from forty to sixty per cent. heavier and stronger than on any other similar machine. It has an adjustable cross throw spread for even application. Each working part is visible, easily removable for cleaning, and fully protected from chemicals.

In the Matter of Strength:

Here is an interesting point regarding the New Peoria Sower. With the exception of the New Peoria Sower with its simple spreading unit, all the older fashioned types of Endgate Sowers are equipped with two fans, two sets of driving gears and two sets of chains. These superfluous parts not only increase the draught, but they also give the owner a lot of extra parts where trouble may occur; a lot of extra parts that will wear out and have to be replaced eventually.

It has been customary to build these machines containing all these extra parts, so that the complete machine weighs between 160 and 170 pounds.

The New Peoria Endgate Sower with only one half the chains, fans and gears, weighs 181 pounds. Strict comparison will reveal that the Hopper, Gears and Fan in the Peoria Sower are built very much heavier and stronger than the corresponding parts in any other machine.

In the Matter of Draught:

The New Peoria Sower is very light in the draught on account of each bearing being protected with a grease cup, and because it has only one spreading unit to be driven.

In the Matter of an Even and Adjustable Spread:

The New Peoria Sower is built with two feeding spouts. Each of these spouts is adjustable, and can be arranged so that the fan will throw the

material either heavier towards the centre; heavier towards the outside edges, or evenly over the entire width. This arrangement of the feeding spouts is one of the most important features of the New Peoria Sower, for the tendency to sow uneven strips has been a common fault with most endgate sowers. The spreading unit is arranged close to the ground and carefully protected against wind wastage.

In the Matter of Width of Spread

While the New Peoria Sower is supplied with gears that will spread up to a width of twenty-four feet where any one specific chemical is used, this practise is not advisable where chemicals of varying specific gravities are used at one time. The reason for this is that the centrifugal force generated at high speeds has a tendency to throw the heavier chemicals a greater distance than the lighter chemicals, and this would result in an uneven spread. After a series of tests in the spreading of several chemicals at one time, we advise for even spreading, a width of from twelve to fourteen feet.

In the Matter of Free Feeding Qualities and Easy Cleaning:

Fertilizer chemicals are very gummy and sticky substances as a rule; hence the clogging up of fertilizer sowers has long been a bug-bear to the average owner of such implements, and many a man has spent many an annoying and profitless half hour in the field, trying to remove the gummy fertilizer from the working parts of the sower he uses. This unpleasant feature has been eliminated almost entirely from the New Peoria Sower. This has been accomplished in the following manner:— There are no worm or augur feed gears to bridge up and bind. There are no internal working parts to clog up and stick. All the driving gears are protected from the fertilizer and each bearing is equipped with a grease cup. It is within the realm of possibility that the feeding spouts might get more or less clogged up. However, these feeding spouts are common on all fertilizer sowers. The difference is that the spouts on the Peoria Sower are easily removed in a few seconds while the spouts on most endgate sowers are rigid and unremovable.

Compare the ease with which these removable spouts can be cleaned, with the struggle attached to getting at the inside of a spout that is not removable.

NOTE: We have secured the services of a Peoria Sower factory representative who will explain and demonstrate the new Peoria Sower both at Charlottetown and Summerside, for the benefit of our customers and interested prospects.

TERMS: Any responsible farmer can secure one of these New Peoria Fertilizer Sowers on very reasonable terms at ordinary interest charges.

DEMONSTRATION!

The New Peoria Fertilizer Sower

will be explained in detail and demonstrated on the

EXPERIMENTAL FARM CHARLOTTETOWN, Friday, May 11th
 AT 9 A. M. AND 2 P. M.

On the farm of Mr. A. S. McKay at Stanley Bridge.
MONDAY, MAY 14th
 2.00 P. M.
 Local Agent, Mr. F. D. Bennett.

The Factory Representative will be present Everyone interested is cordially invited.

 CHARLOTTETOWN SUMMERSIDE

MR. DANIEL COLLINGS

On April 6th, 1928, after an illness of several months, Mr. Daniel Collings, of Sturgeon, P. E. I., departed this life to participate in the higher service of the Redeemed who have entered into the Mansions of Light to be forever with the Lord. During his days of active service Mr. Collings formed a large circle of friends who appreciated his sterling qualities and Christian character. For a number of years he owned and operated a saw and also a carding mill at Sturgeon. Arising out of the occupation he was brought into contact with a large number of the inhabitants of the surrounding country. Rendering faithful and satisfactory service to all he became not only widely known but also highly esteemed and respected for his integrity and obliging manner in conducting his business with the public. He proved himself to be a man who was diligent in business, fervent in spirit, serving the Lord. Born in Sturgeon 77 years ago he exerted a beneficial influence on those with whom he came in contact in business and in private life. During his early life he united with the Methodist Church erected at Sturgeon, and for many years he was not only a faithful and devoted member, but also one of the capable and efficient officials in the church. The Kingdom of God and all that pertained thereto had first place in his life. When the United Church of Canada became an accomplished fact, he continued to render valuable and consecrated service. Being a man of vision he anticipated greater results and inspiring triumphs in the Kingdom of God. His place is vacant in our midst, and we miss him in our church life as well as in the home and community. He leaves to mourn the loss of a devoted husband and father, his wife, one son, Hugh living at Sturgeon, and two daughters Mrs. Charles Hicken of Gaspereaux, and Mrs. Arthur Thompson of Sturgeon, also one brother John A. Collings, of Sturgeon, and two sisters, Mrs. W. B. Clegg, Murray Harbor North, and

Two Cent Stamp Paid Income Tax

(Special to the Guardian)
HAMILTON, May 8—The smallest payment for income tax in Canada is believed to have been remitted here by a taxpayer of this district whose tax came to two cents, so officials of the federal income tax dept. stated today, the man in question paid with a two cent postage stamp. His taxable income it is said was less than \$1.
 To obtain evidence against automobile speed a law violator an Ohio policeman has invented a record speeder made in pursuit motorcycle speedometer which and preserves the figures for later use.

Mrs. E. W. Collings, Alberry Plains, and several grand children. The funeral services conducted on April the 9th by Rev. N. Pierce, was very largely attended. He was laid to rest in the family plot at Sturgeon. The pall bearers were six nephews of the deceased, Lu Wright, A. R. Clegg, J. W. Clegg, Ray Clegg, John Collings, Russell Collings, W. B. Clegg, Murray Harbor North, and "The memory of the Just is blessed."
