W. C. T. U. NOTES

THE JUDGEMENT DAY

I dreamed that the great judgment morning had dawned. And the trumpet had blown. I dreamed that the nations had gathered to judgment before the White Throne. From the throne came a bright shining angel. And stood on the land and the sea. And cried with his hands raised to heaven: "Time is no longer to be." The rich man was there, but his money had melted and vanished away. A pauper he stood in the judgment. His debts were too heavy to pay. The great man was there, but his greatness when death came was left far behind. The angel that opened the record. No trace of his goodness could find. The widow was there, and the orphan, God heard and remembered their cries. No sorrow in heaven for them. God wiped all the tears from their eyes. The gambler was there and the drunkard, and the man who had sold them the drink. With the people who gave him the license. Together in hell they did sink. The moral man stood in the judgment. But his self-righteous rage would not do. The man who had crucified Jesus. Passed off, as moral man, too. And the soul who had put off salvation. "Not tonight, I'll get saved by and by." No time now to think of salvation. But alas! It had found time to die.

YOUTH TALKS BACK TO ALCOHOL ADVERTISEMENTS

By BERT H. DAVIS
That say "There's Nothing for You to Regret"—If You Use This or That Brand.
So often the drinker wears the expression of sorrow and remorse. "I didn't know it was loaded," one drinker says. "He cutted out in front of my car. I couldn't stop in time." Another: "I hadn't realized I was so unkind to my family." No wonder that the invitation, "Let's have a drink!" is so frequently met nowadays with, "No thanks, I don't drink. I'd be certain to regret it by tomorrow morning." Presently an advertising copy writer took his turn at trying to dull the sharp edge of that word "regret." He would apply "regret" not to all use of intoxicants, but to the occasion when someone buys a cheap, "impure," unknown brand of whisky, or gin, or beer, or wine. But it wasn't some low-grade

Discharging Cars This Week Brad'Or Lump COAL

A well Screened Coal suitable for both kitchen and furnace use. Many customers are using this Coal and find it very satisfactory.

Bullets Can't Sink New Life Raft

The newly invented life raft has been approved by the British ministry of shipping for the merchant marine. Said to be bullet-proof and unsinkable, it is designed for use when ships are attacked and sunk by submarines or surface raiders.

Resistance To Nazi Growing In Norway

A crisis is rapidly developing in Norway. On all sides, the Nazi puppet government is faced with growing resistance. Unemployment, stagnation of production and paralysis of trade are daily becoming more acute. According to reports, the Nazis have tried quelling to put its house in order or else.

Briar Pipe Mystery

An English wood has been discovered, after months of research to take the place of the bryer root from which briar pipes are made. But the name of the wood is a secret.

The WEEK at S. D. U.

The G.F.C.S. Convention was a great success. The feelings of satisfaction and jubilation among our students over its success have made them forget the fatigue experienced as a result of the work of the Convention. Visiting delegates paid the Committees in charge of the Convention many high tributes for their well-planned program and careful organization of the Convention. The next Convention will be held at St. Francis Xavier University and will consider various aspects of the topic "Christian Democracy".

Our students are very grateful to Notre Dame Academy, Dr. and Mrs. W. F. MacMillan, Mr. and Mrs. Ernest McCarey, Mrs. F. P. Hennessy, Mrs. John F. Murnaghan, and Dr. and Mrs. I. E. Croken for providing accommodations and entertainment for visiting delegates, R. T. Holman Ltd. for loan of furniture, and Ed's Taxi for prompt and courteous service.

Yesterday the feast of St. Thomas Aquinas was observed by our Senior and Junior students at St. Philip's Day. High Mass was celebrated by Rev. J. P. E. O'Hanley P.D.

Hockey: The Saints won the P.E.I. Intercollegiate championship on Saturday night by defeating P.W.C. 3-2 in the final game of the series. Dale was retired from the force after due inquiry by a court of officers and repurchased from the force by his first owner.

To succeed him are other dog policemen of note, among them Tell, Black Lux, Sullina, Tuft, Pecky, Chief, Egon and Bacchus each of which has his own record of good service.

A rifle range has been set up on the fourth floor of the Old Building, and members of the C.O.T.C. began target practice during the week.

Rev. Phelan McKenna, P. P. Morell and Rev. J. D. MacNeil, P.P. North Rustico visited the college during the week.

FAMOUS CANADIAN POLICE DOG BEING RETIRED TO LIFE OF EASE

A Government blue-book tabled in the Commons Wednesday, recorded the retirement of Canada's most famous four-legged policeman.

Commissioner S. T. Wood in the annual report of the Royal Canadian Mounted Police for 1939-40, said that the shepherd dog, Dale, born in Alberta in 1932 had suffered from rheumatism and strained heart and was retired to a life of ease.

Dale was the property of a member of the force and when little more than a pup saved the life of his master and a comrade, lost in a blizzard at 35 below zero. Placed on a leash the dog was told to search and led them to a cabin where they took shelter.

In 1935, after a frantic posse had searched for hours for a missing two-year-old child, Dale caught the scent in a rain-drenched field and led the child to his mother's arms.

On the way to this search, Dale assisted in the check of a suspicious car and located stolen articles in a field. Dale had a part in protecting Their Majesties during their tour of Canada. He was employed in searching box cars and

see that the seed-sprouts deliver the seed behind the discs and have covered not more than one half inch deep.

Body of Distinguished Scientist Lies in State

Guarded by officers of the University of Toronto contingent, C.O.T.C., the body of Sir Frederick Banting lay in state in Convocation Hall while a long line of citizens passed by the casket of the great scientist. An even greater procession, including representatives of army, church and state, followed in the funeral procession to Mount Pleasant cemetery after a service led by Dr. H. J. Cody, president of the university. This picture shows the guard of honor standing by the casket amid great banks of flowers.

Ferguson's All Star team

(Following is the seventh of a Canadian Press series of National Hockey League All-star selections by hockey writers in N.H.L. cities. A consensus will be prepared later.)

LONG RIVER W. I.

The regular monthly meeting of the Long River Women's Institute was held at the home of Mrs. Elmer Paynter on the evening of February 18th, with an attendance of 17 members and 3 visitors.

In the absence of the president, the vice-president, Mrs. A. C. Johnston very capably presided. Meeting opened by singing "O Canada" and repeating the Creed in unison.

Minutes of last meeting were read and adopted and the Roll call was answered by an exchange of Valentines.

The Secretary reported having received the grant of \$2.50 after which the school committees gave their report. Several articles were needed for the schoolrooms, including window shades for Primary Rooms, and also soap and paper towels and coffee for "First Aid Kit". It was moved, seconded, and carried that these articles be bought for schoolrooms. Mrs. M. O'Connell was appointed to purchase same. Sick committee reported having made several calls.

New committees were appointed

as follows: Sick - Mrs. Elwood Campbell, Mrs. W. J. Proffitt and Miss Mae Found. School - Mrs. Oliver Paynter and Mrs. Edwin Bernard. Program - Mrs. W. E. Johnston, Mrs. Heath Campbell, and Miss Myrtle Wigmore. Lunch - Mrs. Bruce Bell, Mrs. Edwin Bernard and Mrs. Ralph Bernard. Committee to scrub school - Mrs. A. A. Campbell, Mrs. Heath Campbell, Mrs. Elwood Campbell, Mrs. W. E. Johnston, Mrs. A. C. Johnston and Mrs. Elmer Paynter.

Letter from Red Cross Society was read by Red Cross Secretary, Mrs. A. A. Campbell, regarding the making up of 60 yards of flannel received. This is to be made into women's nightgowns and babies garments. A committee consisting of: Miss Rosella Paynter, Miss Mae Found and Mrs. Heath Campbell, were appointed to meet at an early date and cut out garments. Mrs. A. A. Campbell kindly invited the cutting committee to her home the next Tuesday afternoon to cut garments.

Mrs. Campbell then reported the following articles had been sent in to Red Cross at Charlottetown, 12 sweaters, 4 scarfs, 11 hair mitts, 2 caps 51 pair socks, 8 hospital gowns and 6 pairs pyjamas.

Next meeting to be held at the home of Mrs. Cecy Johnston on March 18th. Roll call to be answered by "Irish Jokes" Collection amounted to \$127. One member paid dues.

Programme of the evening, consisting of two contests, "Bird Romance" by Mrs. A. A. Campbell and "Cake Contest" by Mrs. Edwin Bernard, was greatly enjoyed by all.

Meeting closed by singing the National Anthem. Lunch was served by the committee in charge, assisted by the hostess and a social hour enjoyed.

Just arrived some new "Osom" House-dresses in the new Spring Prints and several attractive in new styles. Sizes 14-44. Price — \$1.59

MOORE & McLEOD Limited

Versalite Fire Fighter

SUBDUES NAZI BOMBS AND OTHER PESTS

Britain's fire fighters have a new appliance for dealing with incendiary bombs which is also being used by their wives for their cars and by gardeners for spraying fruit. This new fire fighter, called Versalite, is a Scotch firm operates on the spray and jet principle. It is the size of a cricket ball and has the shape of a hand. It is carried and worked by one person. It can be filled from any tap where the pressure is more than 30 lbs. and thrown a jet of water some 30 feet for five minutes or a continuous spray for 15 minutes without refilling.

Losses In Seeding Grasses and Clovers

(Experimental Farms News)
The results of experiments conducted by the Field Husbandry Division, Central Experimental Farm Ottawa, show that there is considerable loss of seed when grasses and clovers are sown by some commonly used methods, says P. O. Ripley of the Division. Various seed mixtures were sown at the Farm in Ottawa in 1939 and 1940 with an ordinary grain drill which dropped the grass seed broadcast on top of or immediately behind the discs. The land was not harrowed after seeding but the seed was covered by stony chains attached behind the discs. Counts were made of the number of seeds which had germinated one month after seeding and again one month later. There was only a slight difference in the number of seedlings at the two periods.

When the seed mixture was made up of 10 pounds of red clover, 2 pounds of alsike, 6 pounds of alfalfa and 6 pounds of timothy only 30 per cent of the seed sown had germinated and produced seedlings 2 months after seeding. With a mixture of 5 pounds of red clover, 2 pounds of alsike, 10 pounds of alfalfa and 3 pounds of timothy approximately 38 per cent of the seed had germinated. Where 3 pounds of red clover, 2 pounds of alsike and 3 pounds of timothy were sown 26 per cent of the seed germinated. None of the mixtures sown showed the first pousetage higher than 38 per cent 2 months after seeding. While this amount was sufficient to produce a good stand of sown 1 1/2 tons of hay per acre there was, nevertheless, a loss of 62 per cent or more of the seed sown, although a previous laboratory test showed that the seed in all cases germinated over 90 per cent.

Other experiments conducted recently have shown that the seed of red clover, alsike, timothy and alfalfa will produce the best stands when sown 1 1/2 to 2 inches deep. With many of the common methods of seeding much of the seed is covered more deeply. Experiments have disclosed the need of care to

WOMEN LIKE IT HOT MEN PREFER IT COLD

KANSAS CITY Mo. — Science has proved a fact which men have suspected for a long time—that women like the room temperature considerably higher than is comfortable for the men.

F. C. Houghton, director of the American Society of Heating and Ventilating Engineers' research laboratory, spent a year recording the reactions of men and women under different temperature and heating conditions to prove the contention. The reason he said, is obvious. Women just don't wear as many clothes.

Minard's kills pain.
