THE MORNING PAPER

Some Reasons Why it Makes the Best Advertising Medium.

A woman's curiosity to know about society, marriages, births, deaths, forces her to read it.

The Morning Paper is before her all day long, and it is when she is doing her household duties, arranging and improving the appearance of her home, that the missing and necessary articles of furniture, rugs, carpets, curtains or other necessities, show up the plainest, and there could be no more opportune time for a dealer to tell about the new designs, the new styles and the bargains offered, for the day or week.

In a majority of homes the newspaper it practically the bulk of the reading matter, and the long, allday life from 5 a. m. to 10 p. m. of The Morning Paper gives not only the housewife but every member of the family an opportunity to read it.

The Morning Paper is read at the breakfast table, again at home at noon, on the trains, in the restaurants. It is read in doctor's offices, professional offices, clubs, hotels, cafes, barber shops. It is read by daylight everywhere you go by both employer and employee.

It is a known fact that throughout the world, possibly with a half-dozen exceptions, the papers with editorial influence and national reputation are Morning Papers.

With these facts in mind, the business man who is looking after the real money-spenders of the family to interest in his goods will consult his best interests by placing his announcements where the women will read them.

Easy to operate. Easy to clean. Easy to protect.

The Feed Door of a No. 200 Sunshine Furnace is 12 x 13 inches. This means that the largest shovel can safely be emptied into our smallest size, and that good-sized chunks of wood require no chopping in order to be used as fuel.

To keep the correct humidity for sanitary purposes, we place the water pan in

SUNSHINE FURNACE

right over the main door, a place where the heat and the householder can reach it. So in Sunshine Furnace the water never gets stagnant, and the householder never complains about the awkwardness of pouring the water in.

Automatic Gas Damper allows furnace to be checked shortly after coaling. This saves fuel and protects plants in rooms above.

To make "Sunshine" the easiest-to-be-cleaned furnace, we construct two flue doors, and place same not only at an equal distance from each other, but at an equal distance from the large feed door. So the operator with an ordinary soot-cleaning brush can go completely around the radiator without inconvenience; and, what is more important still, can do this without having to put out the fire or take down the smoke-pipe.
