THE GUARDIAN

COVERS THE FIELD

The Guardian covers the City and Province within which it is published more fully and completely than any other newspaper printed in Canada.

With a daily circulation of its morning and rural edition now about 8,000 and growing from day to day, it has broken all records for a daily publication in a small community.

Charlottetown has a population of 12,000 and Prince Edward Island has 108,000. The Guardian's daily circulation is therefore as 1 to 1 1/2 of population in the city in which it is published, or 1 to 13 of the population of the Province. This is the

management believes, unequalled by any daily newspaper published in Canada.

St. John has a population of 40,000 and the Province of New Brunswick 320,000.

Or again: Toronto has a population of some 250,000 and the Province of Ontario about 2,225,000.

The point is this, that The Guardian covers this field of its circulation three and a half times as well, if compared with population of the city, and over three times as well, taking the population of its Province, as the best New Brunswick and Ontario newspapers.

These facts are printed in no spirit of boasting, but for the satisfaction of Guardian readers and advertising patrons alike. They have a right to know how completely their favorite Journal is endorsed by the reading public among whom it circulates and how completely it covers the field as an advertising medium in this City and Province.

But the strongest point about Scott's Emulsion is that you don't have to be sick to get results from it.
