The charity lecture given in the Lyceum Hall last night by the Rev. F. C. Kelly proved to be most enjoyable as well as elevating and instructive. Considering the poor weather the building was well filled with a representative audience. The subject, "Chasing The Springtime" was in brief an account of a trip taken by the Reverend gentleman from New York to the lands beyond the seas. From the start the lecturer charmed and held the attention of his audience. His remarks abounded in wit, and his anecdotes were capital to say the least. At the conclusion every one present felt that they knew something more than before of the great outer world. Without any overdue praise it may be safely said that this address was one of the best ever delivered in Charlottetown, when Rev. Mr. Kelly delivers another lecture, be the subject what it may he can rest assured of a large and enthusiastic gathering.

Yesterday morning Franklin Boyer, Mt. Herbert, shipped to Sydney and other markets, 4,000 boxes of strawberries which were all picked on his fruit farm the previous day, the pickers not working more than nine hours. The Guardian received a sample box and they were the largest berries ever received here, being well developed, firm and delicious in flavour.

The Physiology class was taken by the Instructor Prof. Starrat for a boat sail on the harbor and spent a most enjoyable afternoon.

The lectures last evening were one of the most interesting yet delivered, of the series. Dr. Bailey, of Fredericton N. B. in a lucid manner described his trip to England made two years ago. Passing over the ocean voyage, with the relation of a few pleasing incidents, the lecturer took his audience to Liverpool with its commingling of equal and unequal, thence to London, the unparalleled City of the world both for its population, wealth, magnificence, etc. All great national points of interest both historical and monumental in character, from London to Stratford Chester, etc. the lecturer took his audience. The description of scenery, construction, social conditions, etc. were exceedingly clear and life-like. The illustration were from ordinary picture post cards illustrations from magazines, which were thrown upon the screen by the use of the Reflectoscope. These illustrations were very clear indeed, being equal to the very best of lantern slide illustrations. The use of this instrument will enable lectures to be easily illustrated. On motion of Mr. MacKinnon and J. B. Seman the thanks of the audience were tendered.
