To Insure Prosperity at Home Markets Abroad Must be Found For Hundreds of Millions of Dollars' Worth of Canadian Products

After several years of poor crops in the West, the news of a good one this year was acclaimed all over Canada. It meant production valued at over a quarter of a billion dollars for the grain growers. Big freight business for the railways and steamship companies. Stimulation of trade throughout the Dominion, provided that a market can be found for our wheat crop. It is one thing to grow a big wheat crop and another thing to find consumers for it. Our own people here in Canada will not be able to use as much as one-third of this year's wheat crop before next harvest time. That leaves us, including last year's carry-over, with 280 million bushels for export or carry-over. With the aid of our trade agreements, the experienced organization maintained by the Canadian Department of Trade and Commerce, the Canadian Wheat Board, and the work of grain exporters it is expected that the crop, that means so much to Canada's prosperity, will be successfully marketed.
