TREATMENT OF SEED POTATOES

It pays to have the BEST. To have the BEST SEED POTATOES you must treat your seed before planting. The best material by test for treatment is CORROSIVE SUBLIMATE. The Experiment Station in Maine insists that growers of foundation seed potatoes MUST USE CORROSIVE SUBLIMATE.

Our representative at your station will have a supply of CORROSIVE SUBLIMATE in eight ounce bottles, or you may get it direct from us by writing

TRIPLETS ARE WELCOMED — The many friends of Dr. James Kickham, formerly of Souris West, now living in Ontario, will be pleased to hear of a happy event in his family, the birth of triplets, which took place more than one month ago. The babies, two girls, and one boy, are of normal weight and quite healthy and are gaining steadily. Dr. Kickham is a graduate of the University of Toronto and visited the Island four years ago, along with his wife and Dr. Larry, his brother, who practices medicine near Edmonton. They drove to the Island to visit their old home and were the guests of their brother, Mr. T.J. Kickham, who is one of our successful Islanders at home. Before this addition to their family they had had a baby daughter whose death at the age of two years made them very sad indeed. Burke's Falls, where Dr. Kickham practices is in the neighborhood of Callender where the famous Dionne babies live. (Patriot please copy).

GORDON TRIBUTE TO HIS MOTHER

WINNIPEG, April 23—In "Postscript Adventure" the late Rev. C. W. Gordon (Ralph Connor) wrote of his mother, Mary Robertson: "She had a courage that never flinched. In the wilderness of Glengarry in Upper Canada she rode horseback with a baby on the pummel. She gathered up the lambs on spring mornings, that had been torn by the wolves in the night. Her face, wet with tears, is still a poignant memory."
