A Paramount Picture

Clarence Burton
in the cast

Supposed to be a wealthy heiress and really flat-broke and friendless—that's pretty Agnes Ayres in this picture. A lively love story with plenty of tense, dramatic moments. The star was never so lavishly gowned and vivacious.

FEAR EMBARGO ON PULPWOOD
NEW YORK, July 15.—With a view to relieving the problem raised by the threatened embargo on pulpwood exports from Canada to the United States, a number of leading paper manufacturers from all sections of the United States met today at the Union Club and organized as the committee for the perpetuation of the paper industry in the United States.

Henry W. Stokes, of the York-Daven Paper Company, Philadelphia, was elected chairman of the executive committee. A. G. Payne, Jr., of the New York and Pennsylvania Paper Company, was named Vice-Chairman, and Dr. Hugh P. Baker, Executive Secretary of the American Paper and Pulp Association, was elected Secretary.

The new organization will not confine its membership to the American Paper and Pulp Association, but will include nearly all the big companies, both organized and unorganized. Manufacturers already enrolled represent more than half of the total productive capacity of the country, it is said.

Commenting on the proposed Canadian embargo, Chairman Stokes said: "If made effective, it will involve the entire paper and printing industry in the United States. The price of unbleached wood pulp is now rising toward war-time levels and more than a million cords of wood a year would be added to the drain on our fast-diminishing pulpwood resources.

"The paper and printing industries every branch of which would be affected, have a total product valued at three billion dollars a year and employ more than half a million wage earners."

In securing labor for the harvest the provincial authorities estimate the number of men required, the railway officials prepare to take care of their transportation and the immigration officials are in a position to say where the harvesters can be secured.

A very nice and well acted program consisting of recitations, reading, flag drill was rendered. Mr. John J. Campbell acting as chairman. Notes By The Way
Continued from page 4
The announced policy of the Opposition to repeal the poll tax and reduce the seasonal indemnity is undoubtedly popular in both the rural and the town districts. It strikes at two of the most unpopular and obnoxious measures of the Government. It is the first step in the direction of reducing taxation. The farmers have just now learned what had not before been pointedly brought to their attention—that they as a class were paying four-fifths of the poll tax and a like proportion of the salary grab. The Bell Government stands to maintain both these measures as they are and this attitude cannot fail to accentuate their defeat.

The Health Value of Blood Medicine
By "Blood Medicine" was meant for instance, Hood's Sarsaparilla for nearly 50 years the standard remedy for blood disorders. Working through the blood, the great distributing agency of the body, it carries purity, health, strength, vitality to every organ. The general health quickly responds to the powerful influence of this good blood medicine. One old friend wrote us: "I seem to feel a thrill of new life just as soon as I begin my annual course of Hood's."

Upon one measure of importance both parties were in substantial agreement in 1919. That was that the teachers' salaries ought to be further increased. In regard to the Government's very costly road policy their performance was the precise opposite of what they had expected. Not only their taxation policy failed their every promise and profession. In office they outraged the loud promises and professions of economy they had made before the last election, and gave the Province a lavish and wasteful expenditure undreamed of before. It was such deception and breach of faith between public men and the electors who trusted them could now be condoned or allowed to pass unscathed our public life would be tarnished and degraded.

The men in power have forced this issue upon the electorate: shall public men keep faith with the people or shall they be permitted to break faith and deceive the people with impunity? They would gladly evade that issue now if they could, but they cannot. It will not do. By their own acts they have sealed their condemnation. That is why they meet the people now with scant courage and without hope.

Surely it is high time to begin the reduction of taxes when even The Patriot admits that "the working people, laborers and others find it hard to make ends meet!" Let the reduction begin by repealing the poll tax. Yes, and shortening the rations of the profiteers also.

Many People Wonder

why it is that glasses are worn more commonly in the present generation than in the past. Some say that the race is deteriorating, some that it is forgetting, but the real reason is that our modern civilization requires the eye to do more work than was even the case before.

Consequently, the eyes, if in the least defective, may give you a lot of trouble though in reality they are no worse than those of your grandfather who did not wear glasses till he was an old man.

If you feel the least symptom of eyestrain, remember that it is nature's warning to you and consult us at once.
