## Many Factors Enter Into Final Results

To the average consumer, Bacon is Bacon. Actually, however, there is no product where so many factors enter into the final results, and for this reason there is an extremely wide range of quality and grades. H. A. and Perfection Brands are only selected from the very best type of bacon hogs. The sides are carefully trimmed. This is itself increasing the cost two cents per pound over the ordinary commercial bacon. The sides are then cured in special boxes wherein the sides are cured in their own juices. This results in a much finer flavor. After coming from the curing boxes only those sides which have cured perfectly are selected. These are again re-trimmed and given a special smoke, and only those sides which take the smoke perfectly are finally selected to be shipped out under our H. A. and Perfection Brands. Only about fifteen per cent. of the Harris Abattoir total bacon production is shipped under these top Brands. "Convince yourself that H. A. and Perfection Brands are better and well worth the small additional premium over the price of ordinary bacon by trying either of them for breakfast tomorrow morning," is the message from Harris Abattoir. The product is for sale at the following stores:—R. T. Holman Limited, F. W. Strong Company, Mark Gaudet, Brace, McKay & Company, Ltd., Summerside; R. Devereaux, Burhoe's Grocery, A. R. Wise, R. T. White, P. N. Manuel, Reaney Gay & Co., Harry Craig, W. J. Brawders, J. J. Storey, Cudmore Bros., Charlottetown.

## Have Supremacy In Electrical Reproduction

Miller Bros. Ltd., whose ads have been appearing regular in this paper wish to call their patrons attention to the fact that they will this season be in a better position than ever to supply their radio requirements. Since its entry into the radio field some years ago this firm has

always aimed to make and hold for radio the name which has kept it for half a century in the fore front in the musical business. As a radio must always be considered as primarily a musical instrument it is only natural that its best outlet should be through a music house where musical reproduction has been the main consideration for a great many years. Next season as in the past they intend to present as their leader the New Victor. The close alliance of the Victor with Miller Bros. since the days of the talking machine has taught the firm a respect for the quality of their goods and the fairness of their dealings. Victors had proven themselves leaders beyond comparison in the field of mechanical sound reproduction and it only remained for the merger with the Radio Corporation of America to complete their supremacy in the field of electrical reproduction. To get an idea of the rapidity with which radio is advancing one should hear the new Victor Super-Electrodyne mantle set with its entirely new circuits and find out for himself the hitherto undreamed of sensitivity and selectivity of this new radio. This done the greatest surprise remains in the price.
