ST. PETER'S CATHEDRAL—Ascension Day. Sung Eucharist, 7.30 a. m., Matins 8.15, Evening 5 p. m.

BASEBALL—We the Rovers do hereby challenge the Tigers to a friendly game of baseball to be played at the Victoria Park on Saturday morning at ten o'clock.

A USEFUL CONTRIVANCE—A representative of the Guardian was shown by Mr. D. L. McKinnon, plumber and tinsmith, 3 Spring Street City, yesterday, samples of what he designates the Magnet Underground Garbage receptacle. This receptacle is made of a regular sewer pipe two feet six inches long and fifteen inches across. It is lined with galvanized iron and inside this an immense coil of the same material, large enough to contain some fifteen gallons or more. It is made to fit the apparatus is sunk in the ground and has a conical metal cover which is on a level with the surface and is opened simply by a pressure of the foot. Such a garbage receptacle being sunk to a level with the ground is out of sight and great improvement over the ordinary barrel which in themselves are rather unightly on the streets of a town or wherever they may be placed.

PERSONALS

Rev. Mr. McKay and Mrs. McKay Sours, went to Summerside yesterday.

Miss Penzie Howard graduate nurse, has returned to Charlottetown after spending a few weeks at her home in Springfield.

Rev. J. A. and Mrs. Greenless Georgetown, left yesterday en route to Winnipeg to attend the General Assembly.

Pte. Coleman Rogers of the 105th has returned to the city after spending a furlough at his home in St. Eleanors.

Lieut. Colonel Peake and Lieut. Murphy of No. 5 Siege Battery went to Summerside yesterday afternoon to meet Lieut. Colonel Guthrie upon his arrival.

AFTER SIX YEARS OF SUFFERING

Woman Made Well by Lydia E. Pinkham's Vegetable Compound.

Columbus, Ohio.—"I had almost given up. I had been sick for six years with female troubles and nervousness. I had a pain in my right side and could not eat anything without hurting my stomach. I could not drink cold water at all nor eat any kind of raw fruit, nor fresh meat nor chicken. From 178 pounds I went to 118 and would get so weak at times that I fell over. I began to take Lydia E. Pinkham's Vegetable Compound, and ten days later I could eat and it did not hurt my stomach. I have taken the medicine ever since and I feel like a new woman. I now weigh 127 pounds so you can see what it has done for me already. My husband says he knows your medicine has saved my life." Mrs. J. S. BARLOW, 1624 South 4th St., Columbus, Ohio.

Lydia E. Pinkham's Vegetable Compound contains just the virtues of roots and herbs needed to restore health and strength to the weakened organs of the body. That is why Mrs. Barlow, a chronic invalid, recovered so completely. It pays for women suffering from any female ailments to insist upon having Lydia E. Pinkham's Vegetable Compound.

"DAHLIA BULBS—Carter & Co. Limited have just received by express some choice Show Dahlias, Cactus Dahlias and other named varieties also Gladiolus Bulbs. Plant Dahlias in the open ground after June 15th—so as to escape night frosts that nip the young shoots. Bulbs sent by mail Postage extra. "Use the Island Sheep Dip and get best results. 25c bottle. Foster's Drugstore. 9850-5-30-M31. Spring Sale of Furniture new on at PATONS LIMITED. 9843-5-20Mtr.

KNIGHTS OF COLUMBUS—The announcement is made that the Supreme Convention of the Knights of Columbus will this year be held at Davonport, Iowa, on August 1st, 2nd, and 3rd, and the maritime provinces will in all likelihood be well represented. On July 31st there will be an exemplification of the fourth degree and in the evening a fourth degree banquet to initiate and fourth degree members with the Supreme officers and delegates as guests of honor. Davonport is known as the "City Beautiful" and the local Council have a splendid programme for the entertainment of the visiting Knights, including luncheons, boat rides on the Mississippi, automobiles ride through the tri-cities, open houses at the different clubs and other things too numerous to mention.

DEVELOPMENT COMMISSION YESTERDAY'S SESSION

(Continued from page one)

The public and this method proved so successful that it has been followed with gratifying results elsewhere. The fact that our principal source of supply for toys—Germany—was closed to us gave strength to the movement which began to take practical shape in many of our industrial centres. The Canadian Handicraft Guild, with headquarters in Montreal, made it a prominent feature of its work. Prizes were offered for the best specimens of toys, with the result that hundreds of designs were submitted, many evidencing a high order of merit. Exhibitions have been held at Vancouver, Edmonton, Winnipeg, Toronto, Montreal and other places, and the originality and general excellence of the exhibits has been a surprise to all concerned.

But in view of the magnitude of the toy trade, it was realized that the problem of producing the machine-made toy in Canada had to be faced and solved. Sir George Foster, Minister of Trade and Commerce, took the matter up. Under his direction Watson Griffin, Esq., Superintendent of the Commercial Intelligence Bureau, arranged for a toy fair on a larger scale than had been before attempted. This was at Toronto and was followed by a public meeting of all interested, at which Sir George Foster presided.

He directed attention to the facts: that before the war Germany and Austria exported over \$26,000,000; that in addition to toys imported from Germany and Austria, Canada imported over \$1,000,000 from the United States; and that there exists no economic reason why a large proportion of all the toys required should not be produced in this country. At this meeting it was decided: first, that a Toy Manufacturers Association should be formed; second, that an annual Toy Fair should be held each spring on the lines of the toy fair held annually in Leipzig, Germany. Dealers from all parts of the Dominion would be asked to visit this fair and place their orders here; third, in the fall, third, it was decided to have a big exhibit of toys at the Annual Toronto Exhibition in September.

In view of the fact that Prince Edward Island is, by its geographical position and its lack of materials, at a disadvantage, in comparison with other parts of Canada, in the matter of establishing large manufacturing industries, it behooves us to seize eagerly any special opportunities that are offered to us. This Toy Industry seems to be one in which we could succeed on a favourable basis with any other part of Canada, but immediate action is called for.

As a beginning we suggest that a branch of the Canadian Handicrafts Guild be formed in Charlottetown to work in conjunction with that already formed in Summerside. These branches should take up this matter of toy making. Samples of the best hand-made toys procurable should be given them, and an effort made to have an exhibit of island-made toys at the Provincial Exhibition this fall and one best specimen sent to Toronto Exhibition as well. Some of these toys might later serve as models for machine-made ones.

Further, the most suitable person procurable should be sent to visit such toy factories as are in operation and his report, when obtained, laid before a meeting of our capitalists with a view to establishing a manufactory here.

Fisheries

Mr. A. J. McFadyen, chairman of the sub-committee on the Fisheries submitted his report, which follows: "The Fishery Committee beg to report that although the waters surrounding our Island are alive with food fishes, comprising in part, Herring, Mackerel, Codfish, Haddock, Hake, Alewives, Salmon, Trout, Smelts, etc. we are not reaping the harvest of the sea that we should. That the chief cause of this is the lack of Deep Sea Fishermen. When the mackerel fishing failed some 25 years ago, our province suffered from a large immigration of deep-sea fishermen to the United States, the majority of these never returned. The lobster branch of the fisheries is amply supplied with fishermen, but a few only of these men will engage in deep sea fishing. The fact that hundreds of fishing vessels frequent our coasts from the United States, Nova Scotia and New Brunswick is sufficient and evident reason that the fishing business is profitable. That fishermen can engage in our fisheries with smaller capital than is required in the other provinces for reason that we are situated on the fishing grounds, therefore, expensive boats and vessels are not a necessity. Our harbors are safe to enter, the distance fishermen have to go off shore being one to five miles, they can harbor of land every night and dress their catch ashore.

That encouragement should be offered fishermen to locate in this Province and devote their time to deep sea fishing entirely. That publicity of our province's fishing advantages should at once be made in the fishing districts of the North Sea, in order that intending immigrants would become familiar with the privileges obtaining.

That the Government should undertake a system of education for the fishermen similar to that extended to the farmers by giving short courses at fishery centres—in the best and latest methods of catching, dressing and curing their fish, and in navigation and in the proper handling of marine motor engines. Technical education or vocational training, is desirable for fishermen. If the young men were trained it would be a surety of the future of the industry. There is a scarcity of trained men for curing and treating fish. In consideration of the fact that a small percentage of the lobster fishermen engage in the other branches of the fishery we are strongly of the opinion that vocational instruction would help relieve the situation and give these fishermen a knowledge and inclination to engage in deep sea fishing.

That means should be adopted to meet the Dog Fish Pest, by reducing them to fertilizer and oil, or instruct the fishermen to cure and dry them for fox feed. They have been experimented with, and have been found to make very good feed for foxes. Our fishermen lose much gear and a great deal of time from this pest during their season. We recommend fishermen to cooperate by forming combinations of about ten men and work jointly and together, sharing expenses. Let part of their outfit be a codfish trap, and fish it while the fish are ashore. Then when the fish move to deep water follow them with trawls; two men in a lobster boat with a trawl of one thousand hooks. Such a company of smart men would pay a dividend worth having.

Scots and New Brunswick is sufficient and evident reason that the fishing business is profitable. That fishermen can engage in our fisheries with smaller capital than is required in the other provinces for reason that we are situated on the fishing grounds, therefore, expensive boats and vessels are not a necessity. Our harbors are safe to enter, the distance fishermen have to go off shore being one to five miles, they can harbor of land every night and dress their catch ashore.

LOBSTERS

The present regulations governing the lobster fishery were set forth. According to these it will be seen that in the districts where the shipping of live lobsters is the principal feature of the lobster industry, the season is 100 days longer than in those sections where canning is carried on exclusively, this suggests the idea that the influence of those representing the live lobster industry dominated the council that formulated the regulations. In the greater part of the Island under the most favorable conditions 61 fishing days is the maximum limit. This is a short season as compared with other parts of the Maritime Provinces, but when ice conditions prevent fishing operations as they did in most parts of the Island until after the 1st of June 1915, and this year, until the present time, the burden of the industry is intolerable in the district between St. Peter's and East Point, there were in 1915 only 16 days fishing and indications point to a similar condition this season. If the present regulations are continued, the smaller concerns will be obliged to give up operating, canneries on their own account, and the industry will eventually fall into the hands of monopolists which would be decidedly detrimental to the interests of the community.

The Committee, strongly recommend their best efforts to have the season of 1916 extended, in the early district by July 10th, the late district appears to be satisfactory. It was also suggested that during the fall and winter the different interests be consulted and regulations formulated that will meet the natural conditions and give to the Province an opportunity to operate the canning industry at least on an equal footing with the other parts of the Maritime Provinces. If a season of reasonable length is permitted and regulations strictly enforced there is no fear that lobsters will be exterminated. What is wanted is a rigid enforcement of the close season.

OSTER FISHERIES. The Committee find the condition of the oyster fisheries the most serious of all. After dealing with the depletion of the fisheries at the rate of 900 barrels per year since 1896, and stating that this depletion is due to a large extent to reckless methods of fishing, the Committee recommend that steps should be taken towards assisting private cultivation and the placing of this enterprise on a practical and operational basis. The improvement of the natural beds is of the greatest importance to the future of the industry, as on the conservation of the oyster still remaining on our natural beds we must depend for spat production, which is the source of supply for the replenishment of these beds. If the Dominion Government considers this an asset worthy of conservation, a close season for a term of years in conjunction with an active campaign against the enemies of the oyster along with the removal of all deposits from the beds, would bring these beds back to a maximum of their producing capacity. If there should be no close season a strong patrol system should be in-

Prince Albert is such friendly tobacco

that it just makes a man sorry he didn't get wind of this pipe and cigarette smoke long ago. He counts it lost time, quick as the goodness of Prince Albert gets firm set in his life! And P. A. can't bite or parch. Two cut all day by the patented process by which it is made. Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

Get on the high ground that soon as you know how! Ask your dealer for Prince Albert. If he cannot supply you ask him to secure it through his wholesaler. Quick as you can, understand yourself how much you'll like it!

PRINCE ALBERT the international joy smoke

It stands to reason, doesn't it, that if men all over the world prefer P. A. that it must have all the qualities to satisfy your fondest desires?

Men, get us right on Prince Albert! We tell you this tobacco will prove better than you can figure out, it's so chummy and fragrant and inviting all the time. Just realize that you can smoke all you want without a comeback!

Prince Albert is sold throughout Canada, generally in the 1/2 lb. tinned tin, also in pound and half-pound tins.

ida was only in the thirteenth year of her age, and was a very sweet and lovable little girl. She had been ailing for some time, but only a week ago was her condition felt to be serious. On Monday morning she was taken to the Charlottetown Hospital and operated upon for appendicitis but, sad to relate she only lived an hour after the operation. She was one of the most talented pupils in music at the Notre Dame Convent, and her teachers and companions will be greatly grieved over her early death. Besides a mother six sisters, and four brothers are left to cherish her memory, and to sorrow over this the first member of the family to be taken.

MRS. DONALD CAMERON. There departed this life at the home of her son-in-law, Mr. Philip H. Howatt of Cape Traverse, on April 12th, 1896, Mary, widow of the late Donald Cameron at the advanced age of 83 years. She had been a great sufferer for many years and on several occasions it was thought that she was about to pass from this "valley of tears," but she was spared through many trials to show forth the beauty of a life, culled and upheld by the Good Shepherd and to manifest the comfort derived from a strong and enduring faith in a crucified Redeemer. She was a faithful and devoted member of the Church of Scotland in whose services she delighted and in whose doctrines she found strength and comfort. During her long and pressing illness all that skill and kind nursing could do was done for her, and when the end came at last, she passed peacefully away to her eternal home. The funeral was held on Monday the 3rd and notwithstanding the almost impassable state of the roads a large number attended in person. The last tribute respect to the departed and to express their sympathy for the bereaved. The services at the house and grave were conducted by her minister the Rev. Jas. MacDougall and interment was at Cape Traverse Cemetery. She leaves to mourn one brother, Artemas Williams of Carleton Place, Ontario, four sons, MacDougall of York Village, Maine; Samuel of Pittsfield, Maine; Lawrence of Mahone Bay, N. S.; and McCall of Berwick, N. S., and two daughters Mrs. T. C. Hall of Ipswich, Mass and Mrs. Philip H. Howatt of Cape Traverse. (Other papers please copy.)

MR. JOHN STEWART. The oldest land mark and one of the most highly respected citizens of Mount Albion and the surrounding

IN MEMORIAM MRS. S. N. EARLE The news of the death in this City yesterday of Mrs. (Prof.) S. N. Earle, came as a great shock to her many friends. She had only been ill a week and but a few weeks away that her son, Gilbert had assured her, so far as respect to her bereaved husband and family to whom she was so devoted and by whom she was held in fondest affection, the sympathy of the community goes to. The family consists of six daughters and three sons. The daughters are Mrs. W. E. Bentley, the Misses Marion, Amy, Kathleen and Lillian at home and Helen in Vancouver, while the sons are William in Brockville, Ont., Ernest in Vancouver and Charles of Montreal, (who arrived in Charlottetown last night). In the death of Mrs. Earle who was 73 years of age, a tender and sympathetic Christian woman and a noble mother has been called away. The funeral will take place on Thursday. To the bereaved husband and family the Guardian extends its sincere sympathy.
