THE AMATEUR BOLSHEVIST

The shades of night were falling fast
When through the crowded highway
passed
A youth, ill shod and habited,
Who carried high this sign in red;
"Whatever is 'wrong."

His trousers bagged, his hat was cracked,
His vest important buttons lacked,
His Windsor bow was tied askew,
That slogan seemed to fit him, too,
"Whatever is 'wrong."

"What makes you bear that thing, my lad?"

I asked, "Is life so really bad,
The game of chance so wholly lost,
That you must flaunt this awful frost,
"Whatever is 'wrong."

He glared at me through bloodshot eyes:
His glance was one of pained surprise
That there could live a wight so slow,
So crass, so dense, as not to know,
"Whatever is 'wrong."

He groaned, "I wish I had my way!
This world should be remade today,
I'd run it on a different plan
And prove to you or any man,
"Whatever is 'wrong."

I asked him what that plan might be,
But out of all he flung at me—
A cross between a whine and hiss—
I clearly gathered solely this:
"Whatever is 'wrong."

He raked me with a wicked leer,
"Bourgeois!" I thought I heard him sneer,
Then, lifting high that sign of red,
He stalked away, but parting said,
"Whatever is 'wrong."

SOVIET ORDERS THEM TO LEARN TO READ AND WRITE

LONDON, Nov. 18.—A wireless despatch from Moscow says the Petrograd Soviet has decreed that all illiterate persons between the ages of 12 and 50 must learn to read and write within six months otherwise they will be deprived of their work and placed in a lower "food category." The decree provides for deduction of two hours from the daily working period in order to permit attendance at school.

NEW ZEALAND PLANS MILITARY TRAINING

WELLINGTON, Nov. 18.—Before the close of the war, the New Zealand Minister for Defence proposed that provision should be made for putting the youth of the country into military training camps for a period of three or four months in their nineteenth year.

A short period of intensive training camp, he said, was worth several years of weekly or monthly parades from the point of view of efficiency, and he believed that the proposal would be in the interests of the boys, as well as of the Dominion, which must have an adequate defense force in the years to come. As New Zealand adopted universal military service in 1909, with an obligation of training on all young men, the change advocated was only one of practice. The camp system apparently is not going to be adopted by New Zealand. The leaders of both the chief political parties have indicated their disapproval of it. The Labor Party is hotly opposed to it, on the ground that the perpetuation of the training camps brought into existence during the war would create a standing army and a military caste. Some of the churches have condemned the system on account of the allegedly low moral tone of the camps. The farmers, who are a big factor in politics here, are alarmed at the prospect of losing their young men for several months on end. The public generally appears to think that since the old system, without standing camps, enabled New Zealand to play a worthy part in the great war, there is no need to undertake increased military preparations under present conditions.

There is no doubt that the military authorities want the camps. They are making a special effort, in any case, to improve the training of the cadets. Every New Zealand boy becomes liable to service with the cadets at the age of 14 years. He is given a uniform, taught to drill and shoot, and receives some physical training. He is drafted into the territorial army at the age of 18 years and into the reserve seven years later. The demands made upon the time of the youth and young man during this period are not large, and exemption can be obtained if due cause is shown. The latest training syllabus for the cadets cuts down the military work by about one-half, gives increased attention to shooting, and doubles the time allotted to physical training and character building.

The scheme has been proved, and if administered by enthusiastic officers it may do much to benefit the youth of the Dominion. The boys are en-

That even when times are dull in Charlottetown it pays to look sharp.

That a little change in the pocket is relished even more than a little change in the weather.

That the music which some singers make is really better than it sounds.

That though a man may live a life of integrity yet he invariably lies on his death bed.

That some people are good because of their lack of opportunity to be otherwise.

That the young man that gets up with the sun should not sit up later than 11 o'clock with the daughter.

That a man is foolish to get hot just because some people like to roast him.

That those people who are manufacturing new and deadly home-made booze are brewing trouble.

That money besides being the root of all evil according to scripture, is also the root of a good many family trees.

That the skating season is almost here again but that some chaps carried their skates with them all summer.

That those gentlemen who are back at the job of issuing liquor certificates to certain thirsty ones need adjusting once more.

That although the Provincial Exhibition is long past and gone some people will continue to make an exhibition of themselves.

NEW YORK PRINTING SHOPS AGAIN RUNNING

NEW YORK, Nov. 18.—Although Typographical Union Number 6 voted on Sunday that compositors "on vacation" in sympathy with the locked-out printing pressmen and feeders should not return to work until their demands for a 44 hour week and a \$14 wage increase were granted, George L. Berry, president of the International Printing Pressmen's and Assistants' Union, says that more than two-thirds of the printers of the succeeding locals have reneged with the international organization and that practically every printing shop in the city is operating, although not in every case with a complete crew. Mr. Berry says a committee has been formed of former conservative officers of the succeeding unions who have always fought direct action and Bolshevism and that they have always succeeded in opening up several printing houses with full crews.

BRITAIN PLANS INTENSIVE WARFARE AGAINST TRIBESMEN IN INDIA

LONDON, Nov. 19.—Opening of aerial warfare against the Mahsud tribesmen on the northern frontier of India has been ordered, it is stated in advices from India today. The order was given on November 13 after the Mahsud had failed to comply with the terms laid down in the British ultimatum late in October in which the tribes were informed that unless they discontinued their continual attacks on British posts and convoys and their raids into British territory, they would be subjected to an intensive aerial bombardment. The British airmen have now been instructed to bombard the villages of Kanigurum, Makin and Marohi.

The Waziri tribesmen in the same district who were similarly notified in the ultimatum had been given until today to reply, and this morning the notification was still unanswered. The effects of the air bombardment have not yet been reported.
