CLEANS BREATH AS IT CLEANS TEETH

Handled Record Pulp Shipment

MONCTON, N. B., Jan. 22 — A record shipment of pulpwood was handled by the Canadian National Railways last year. Figures released here today show in 1944 it required 88,494 CNR cars to transport 169,908,480 feet of pulpwood, while last year 106,981 cars were needed to handle 205,866,120 feet.

The increased movement of this commodity over CNR lines, according to railway officials, indicates the cord quantity produced in Canada last year. As in previous years, the large percentage of it was exported to the United States.

During the first nine months of the year, much of the pulpwood used in Canada went into the making of containers, cartons and packages for war materials and explosives.

Last year's record production will be maintained this year, an official of the Canadian Pulp and Paper Association believes. But, unless the men needed to fill 20,000 jobs in the industry come forward soon, not enough pulpwood will be produced to ease materially the wartime restrictions on paper. There may be a slight increase in the amount of newsprint available towards the end of the year due to the discontinuance of the use of pulpwood for war purposes.

COMPOSER DIVORCED

RENO, Nev., Jan. 21 — (AP)—Vincent Youmans, composer of such popular songs as "Yes for Two" and "Without a Song" was divorced today by Mildred Boots Youmans on grounds of mental cruelty. She was awarded \$280, a monthly allowance for the next 10 years or until she remarries.

Refresh Yourself with a Palmolive Beauty Bath!

Feel tired? Then take a Palmolive bath. Yes, whether you prefer a tub, a shower, or a partial bath at the wash basin, a Palmolive bath leaves you refreshed—comfortable again!

Palmolive, giant Bath Size, gives you loads of gentle lather that brings new loveliness because Palmolive is made with Palm and Olive Oils, Nature's finest skin conditioners.

The Mulberry Bush

by HELEN TOPPING MILLER

CHAPTER XV

There were seven big sheets on the typewriter of the Great Hotel Bolivar, typed hastily, with words crossed out and letters transposed, as if Mike's mind had been flying frantically ahead of his fingers.

It began "Darling, darling Ghini!" "A dirty heel to have put off writing so long," Mike began. "But there haven't been enough hours in a day for all I've had to do."

"I've been thinking about you every minute and mad as myself because I didn't bring you along (Mike went on). There are so many things I want you to see. All the old ones—"

Three pages of that Virginia found herself skipping words, lines, the lines, the dancing in the moonlight, in the silent spaces of the temples, buried for years, excavated again the goatherds sleeping in the sun—Mike's column! she said in Mike's column! she was thinking, as she ran through the typed pages, seeing someone's things that were written for her alone.

Dave Martin is here. (And who was Dave Martin?) "I told you about him—did I forget you, Mike, you forgot. You forgot so many things! Dave was with me in Spain and at Domben. The time the plane broke down—I told you about that. Today we went back into the mountains to an old town, half merrily, half old that no one knows who built it—"

"And I'll read about that tomorrow in Mike's column!" she said aloud, half bitterly.

Then, at the end, a paragraph. Emphasis on the word "I". Mike had been worried and uncertain about telling her what he had to say.

You're the only girl I love Ghini. (He had underlined the word "only". No matter what happens, remember that you're my wife and I'm counting the days till I come back to you. And when the mail comes again, someone's no letter I feel lost and lonely all day long.

After that, a line had been crossed out. But it was possible to read under the X's what Mike had started to type and then thought better.

"If you should hear any odd stories," she read the obscured words, "do not believe them. I know that she had seen that item in the papers. And after he had been out, I remember that you're my wife and I'm counting the days till I come back to you. And when the mail comes again, someone's no letter I feel lost and lonely all day long.

Ralph M. Murray

who has been appointed Sales Supervisor, Flooring Division, of Building Products Limited, Montreal. Born in Saint John, N.B., and completing his education at the University of New Brunswick, Mr. Murray joined Building Products Limited in 1934 and has served in various sales capacities since that time.

British Roads to Mander on House Decides

LONDON, Jan. 21 — (CP) — German "autobahnen" — wide, straight, concrete-surfaced highways — reminiscent of the Roman roads which left their marks on Britain — will not serve as a model for this country's post-war system.

Mr. Barnes, Minister of War Transport, discussing road improvements in the House of Commons said: "Our roads must be designed to enable the motorist, cyclist and hiker not only to reach their destinations swiftly and in comfort, but to enjoy every moment of the journey."

This involves preservation of the amenities, with sweeping curves that bring the traveller in sight of beauty spots; the continued passage of a British road will in 1936 the trunk roads act transferred to the national government.

The new bill empowers the minister to make substantial changes in road design, improve side roads to increase the safety and convenience of their function, with a trunk road to take responsibility for the construction of bridges on the trunk roads.

The trunk roads under national control represent only a small fraction of the British road mileage—180,000—and some members said in debate they believed the government should take charge of a far greater share. They noted an estimate that these roads would be carrying 12,000,000 motor vehicles by 1962.

The government should enforce some uniformity in surface as motorists often found themselves in a bit of trouble when the road surface had been changed. A member said the London-Birmingham road 170 miles long had 23 types of surface.

Mr. R. H. Turton, Conservative member for Thirsk and Malton, objected to any suggestion that roads should be allowed to deteriorate.

"As I see it the modern road, the trunk road is not the road our ancestors made, that dawdled from village to village that would round the lives of our children, and does not succeed in bringing the produce from the factory to the port quickly," he said.

Mr. Barnes, with these qualifications in mind, received house franchise of a British road will in 1936 the trunk roads act transferred to the national government.

Turned Down Idea of Atomic Bomb

TORONTO, Jan. 22 — (CP) — Canadian scientists turned down the atomic bomb as "unworkable" when it was suggested as a research project early in the war, but now Canada has some of the world's most advanced atomic equipment.

Dr. C. J. MacKenzie, National Research Council president, said Saturday night: "Dr. MacKenzie, who presided over the Dominion's wartime research in Canada's Department of Scientific Defence in the Royal Canadian Institute's program of Saturday evening lectures.

When the use of atomic energy for power was first suggested in 1938-40, he said, Canadian scientists showed only "casual interest" and a project for "de-icing the wings of carrier pigeons seemed more important than making bombs of uranium."

"One project we turned down was the atomic bomb," said Dr. MacKenzie. "It seemed a very impractical thing at that time. It was not until the development for the next 50 years."

He said the research council's plutonium plant at Chalk River, Ont., has some of the most advanced equipment in the world for nuclear research with this equipment. Canada can build up a national research program unequalled anywhere in the world.

Ask Increase in Basic Butter Price

NIAGARA FALLS, Ont., Jan. 22 — (CP) — The Canadian Dairy Farmers Association in a meeting here Saturday agreed on a statement of policy asking an increase of four cents a pound in the floor price of butter in order to stimulate production.

The statement said that the Association supported the declaration by Agriculture Minister Gardiner during the agricultural conference at Ottawa last month that agricultural prices would be maintained provided the cost of commodities to the farmer remained the same.

The January meeting of the "Milling Workers' Institute was held on January 21 at the home of Mrs. Fred MacQuarrie in the absence of the Pres., Mrs. Judson Blackmore, the Vice-President presided. Six members responded to Roll Call and one visitor was present. Minutes of previous meeting were read and adopted. Report of sick and school committees were heard. Bills for Christmas school treat, "smut-ins" boxes and fruit taken in one sick member were paid. A vote of thanks was extended to the Christmas Party Sale Com., for the capable and courteous way in which they handled the sale, proceeds of which amounted to \$21.78.

New business consisted of arrangements for a crokinole and weighing party to be held in the near future. It was moved and seconded that we send \$10.00 to the Crippled Children's Fund. \$5.00 was received for the sale of a crib quilt.

Mrs. Kenneth Muirart conducted the program on "Recreational Activities" and Ruth Wright was appointed to take charge of program for next meeting. Collection amounted to 40 cents. The King and a delicious lunch by the hostess brought the meeting to a close.

BOOST ASSISTANCE FUND FOR ARTISTS OTTAWA, Jan. 21 — (CP) — A drive to obtain an adequate capital endowment for the assistance of outstanding Canadian authors who find themselves in pinched circumstances through age or infirmity is an objective of the Canadian Writers' Foundation.

The Foundation, organized in 1931, was incorporated last year. One of the originators and chairman of the present executive is Dr. Pelham Edgar of Toronto. Its first annual meeting as an incorporated body will be held in February.

In the lifetime of the literary artist, even the man of high talent, neglect and the poverty it engenders are the fate he not infrequently encounters," writes Wilfred Eggleston, honorary secretary of the Foundation. "Until 15 years ago, if a Canadian writer fell upon days of adversity when his productive years were over he was entirely at the mercy of such casual or discretionary aid as might appear. Since then a national organization has been seeking modestly at first more ambitiously now, to grapple with the problem on a scale commensurate with the need."

At the time the Foundation was organized, the economic depression discouraged a public appeal, but from 1933 to 1943 a small annual appropriation was obtained from the Dominion government. At present there is no government assistance. For 10 years the chief beneficiary was Sir Charles G. D. Roberts, whose prose and poetry had done much to make Canadian literature known to the nation's own people and abroad. Present beneficiaries include an outstanding poet who is just recovering from a two-year illness and a novelist who for two years has been ill and unable to use his hands.

LADY'S AID A waterproof plastic clothes line that will not rust, corrode or rot has been invented.

in Memoriam

ERNEST ADAMS

A sad gloom was cast over Bloomfield and vicinity when it became known that Mr. Ernest Adams had passed away on Thursday night, December 20th at the age of 75 years.

He was born in Campbellton in the year of 1870. He and Mrs. Richard Adams had a host of friends wherever he went. He was a devout member of the United Church of Campbellton. He was a member of the Bible and other religious literature. On Saturday afternoon a largely attended funeral home and was conducted by his pastor Rev. Wm. McDonald.

He is also survived by two daughters, Hymns sang were: Nearer My God to Thee, Safe in the Arms of Jesus and Abide with me. The deceased is survived by his wife, the former Sarah Graham of Bloomfield. Three daughters, Mrs. Maudie, Mrs. Mary and Mrs. Annie. He is also survived by his wife, the former Sarah Graham of Bloomfield. Three daughters, Mrs. Maudie, Mrs. Mary and Mrs. Annie.
