UNDER THE AUSPICES OF THE DAUGHTERS OF THE EMPIRE THRILLS AND LAUGHS

**THREE WISE GIRLS**  
 SHORT SUBJECTS—COMEDY and CARTOON

**"Three Wise Girls" Sparking Comedy**

A story of three girls, who loved not wisely but too well is told in "Three Wise Girls," a Columbia feature, that came to the Capital Theatre yesterday. Mae Clarke, Jean Harlow and Marie Prevost are the three young ladies, who are glorified in this picture, which is one of those smartly produced, sophisticated comedy dramas.

Out for all they can get, Cassie, Dot and Gladys thought they could play with fire and not get burned. They come to the big city in make good. Love hits them all with varying results—for Gladys it is tragedy, for Cassie it is blissful happiness after a great deal of misunderstanding; and for Dot, it hits her so that she doesn't know whether she's coming or going.

The men in question are played by Walter Byron, James Thomas and Andy Devine. Walter Byron, the Jerry Dexter of Cassie's adventure, falls in love with the beautiful Cassie Barnes (Jean Harlow), a model, but neglects to tell her he is married. He is working on his divorce. When Cassie learns what's what, she is advised by the worldly Gladys (Mae Clarke), who is being "kept" by Arthur Phelps, a wealthy, married banker, to give him up. Cassie does so and is convinced of the wisdom of her decision when Gladys commits suicide on learning that Phelps has returned to his wife. Cassie returns home, fed up with city life. Jerry proves that Cassie misjudged him by coming to Cassie with the happy news that his wife has agreed to divorce him.

Sparkling comedy, romantic drama and interesting performance make this a film that should go on your program of entertainment.

**Chemists' Bible**

Very few books are published which are sure of an "automatic" circulation of about 50,000, but at least one volume which is just out is in that category.

This is the revised edition of the British Pharmacopoeia, or "Chemists' Bible" which is published by the General Medical Council. Every chemist must have a copy, and the book is also required by doctors, libraries, etc.

Ten years' work went to the making of the new edition, and even this is by no means final. Preparations are already being made for the next revision. For methods and formulas change constantly.

Public taste in medicines, however, is fairly constant. Mothers, for instance, still put their faith in cod-liver oil, although, as was recently pointed out, the vitamin value of halibut liver oil is over thirty-five times greater.

**Now Cutting Christmas Trees**

(Special to the Guardian)  
 MONCTON, N. B., Oct. 24.—The annual cut of Christmas trees for the United States market has commenced in New Brunswick. Already crews are out in Albert County, according to the Natural Resources Department of the Canadian National Railways cutting for New York buyers.

Several carloads are expected out of Albert County this season. Most of the trees cut average from three to five lengths in length, with some from twelve to fifteen feet for public demonstrations. A feature of the cut last year was "table" trees and a considerable quantity of these will be cut this season.

**New Highway Is Opened In N. S.**

BADDECK, N. S., Oct. 24.—(C.P.)—When Premier Gordon S. Hargrett set off the blast that removed the last barrier of rock from the Cabot Trail he formally opened to motorists a new highway leading through one of the loveliest stretches of country on the continent, and a sportsmen's paradise.

The Cabot Trail extending around the northern part of Cape Breton Island, traverses the picturesque Atlantic shore of Victoria County, including the seascapes of St. Ann Bay, the striking views from Cape Smoky and the magnificent mountain range running up to Cape North. Across the northern part of Victoria County the road extends through a country of majestic wooded mountains and deep valleys.

It proceeds along the shores of Inverness County, skirting the Gulf of St. Lawrence. Here also are towering hills, landlocked harbors and beautiful fertile valleys.

Viewed by sportsmen the trail crosses in Victoria the North River, Brasola River, Indian River, Church Brook, Goose Cove Brook and Matheson's Lake. River trout, sea trout, and salmon are abundant. St. Ann Bay is noted for tuna.

In Ingonish district the road affords access to Ingonish River, Corning's Brook, Freshwater Lake, Ingonish Beach, Clyburn's Brook, Ingonish Centre, Warren's Brook and Lake, North Ingonish.

Near Cape North it leads to South Harbor Brook, Glasgow's Brook, North Aspy Channel, Dingwall, Middle Aspy River and North Aspy River.

Margate River, one of the most famous fishing streams in the country, now is easily reached as the road courses through the western section of Inverness County. Here, too, at Pleasant Bay Brook, Little River, Farm Brook and Grand Etang.

Prominent citizens of Cape Breton attended the ceremony at which the Cabot Trail was officially opened by the premier. Many tributes were paid Hon. Percy C. Black, minister of highways.

**O'Leary And And Vicinity**

Mr. Nathan Ramsay and daughter of Kinkora were recent visitors to Knutsford.

Miss Albina Harris and Miss Jean Harris were recent visitors to Knutsford.

Mr. William Harris, Knutsford, is visiting relatives in Attleboro, Mass.

Mr. Brewer Auld visited Montgomery School on October 18th. This school re-opened after the fall vacation on that day.

Mr. Walker Cannon, St. Eleanor's spent a few days recently in Knutsford, the guest of Mr. and Mrs. Allison Harris.

The many friends of Mrs. George Woodside, Mount Royal, are sorry to hear of her recent illness, all join in wishing her a speedy recovery.

Mr. and Mrs. Arthur McFarlane of Bebedue, were recent visitors to Glenwood, where they were the guests of Mr. and Mrs. Webster Boulter.

Mrs. William Turner, O'Leary, was a recent visitor at the home of her sister, Mrs. Thomas R. Harris, Knutsford.

Mr. and Mrs. Daniel Smallman, accompanied by Mr. Harry Harris and son Leighman were visitors to Summerside on October 14th.

Among recent visitors to Knutsford were Mrs. Howard Livingstone, Mr. Kenneth McKendrick, Mr. Grover McDonald and Mr. Roy Campbell.

The Dublinne Women's Institute was entertained at the home of Mrs. Bessie McIsaac, on October 20th. Despite the inclemency of the weather, a large number of members were in attendance and had as their guest, Miss Catherine McLean, who gave an interesting talk on Junior Red Cross Work.

Mr. Melvin McWilliams, Cape Wolfe, accompanied by Mr. and Mrs. Neil Boulter, Glenwood, motored on October 16th to Summerside, where they were the guests of Mrs. Boulter's mother, Mrs. E. Schurman. They were accompanied on the return trip by Mrs. Fannie Hoggood, who had been spending the week end in Summerside.

The Glenwood Women's Institute held their October meeting at the home of Mrs. Albert Gorrill.

The meeting opened by singing "The Land of the Maple Tree"; The Club Woman's Creed was read in unison. Roll call was responded to by fifteen members, with a "Tongue Twister." The School and Sick Committees gave their report. The monthly committees were appointed as follows:—Sick, Miss Dorothy McDougall, Miss Hazel Currie. School, Mrs. Jack Currie and Mrs. Eimer Betts, appointed for a three

**MR. JOHN PETER LYNN**

On October 12th, the death of Mr. John Peter Lynn occurred in the General Hospital, Somerville, Mass., following an operation for appendicitis.

The deceased was a son of the late Mr. John Lynn and Mrs. Lynn, Auburn. He was in his 37th year. Of splendid physique and strong constitution the announcement of his death in the full vigor of manhood was received with surprise and regret. During his two weeks' illness, however, he received every possible attention, from the faithful nurses of the institution, from his devoted wife, and from other dear relatives and friends who waited upon him with tender solicitude and care. His spiritual director, too, was with him to the end and administered the last rites of the Church. All those are most consoling thoughts which should lessen the great sorrow that has come so unexpectedly to his people and to his friends here and elsewhere.

The body arrived in the city on Saturday evening, October, 15th, and was immediately conveyed to the old home at Auburn by undertaker Mr. Frank Hennessey. Many mourners were in the sad procession, including his widow, Eimer Betts, appointed for a three

**35,000 PLAYERS ENTER BRIDGE OLYMPIC**

NEW YORK, Oct. 24.—The National Bridge Association announced today that about 35,000 players will take part in the American bridge olympic tonight in various parts of the country.

The players will all play the same 16 hands and the score cards will be sent here for scoring according to secret pairs of bidding and play. The principal contest in New York City will be at the Martinique Hotel where 300 tables of players are expected to take part.

More than 200 trophies will be distributed to winners.

The evening consisted of a reading on "Child Welfare" and a contest. Meeting adjourned by singing "Red Wing" after which luncheon was served, and a very pleasant evening was spent. Proceeds \$235.00.

**Book Club For Dal. Students**

HALIFAX, N. S., Oct. 24.—(C.P.)—A Book Club, to provide its members with the opportunity of reading contemporary volumes not ordinarily available in the University library, has been organized at Dalhousie.

The aims of the club were outlined by President C. A. Leighton. "There is on the part of both professors and students," he said, "an appetite for reading books of the day which our library hardly satisfies. Some of our professors think the greatest need of all, which has not been attended to, is just this: contemporary literature. And so they have planned a book club, which will contain only books of this kind.

"Some friends of the University have come to our aid, and made it possible to begin with 200 volumes."

The president said all membership fees would be applied to purchasing new books, and he hoped to have 500 volumes in a short time.

**WEDDING BELLS—A quiet but pretty wedding was solemnized at the United Church parsonage, Cornwall, by Rev. D. K. Ross, on Friday morning, Oct. 14 when Elsie Soph, a daughter of the late Mr. and Mrs. George Brown, New Haven, was united in marriage to Herbert Ross, only son of Mr. and Mrs. John A. Ross, Strathcona. The bride looked very winsome in a gown of white crepe and radium lace with the conventional veil and orange blossoms and carried a bouquet of roses and maiden hair fern. The couple were unattended.**

After the ceremony the bridal party motored to the home of the bride where a wedding luncheon was served, only the immediate relatives being present. The happy couple afterwards left by motor for a honeymoon trip through the Maritimes, visiting many places of interest. On their return a reception was held at the home of the groom and a band of serenaders tendered their good wishes. The couple were the recipients of many beautiful and valuable presents, including a substantial cheque from the bride's sister Minnie. The groom's gift to the bride was a white gold pendant. The many friends of Mr. and Mrs. Ross wish them many happy years of wedded life. (Patriot Please Copy.)

**WEDDING—The wedding of Joseph Bowman, daughter of Mr. George D. MacKinnon and of the late Mrs. MacKinnon of Sherbrooke, Que., to Mr. Eric George Adams, son of Mr. and Mrs. Claude Adams, of Granby, Que., took place Thursday last at St. Stephens Anglican Church, Champlain, where the bride's parents were married thirty years before. The Rev. J. H. Thomas officiated. Autumn leaves and chrysanthemums were used as decorations in the church. The bride, who was given away by her father, was attended by her sister, Mrs. J. M. S. McDonald of Sherbrooke, as matron of honor, and Mr. Russell Barrett was best man for Mr. Adams. Following the ceremony Mr. and Mrs. Adams left by aeroplane for Albany, N. Y., and thence by motor for the Adirondacks.—Montreal Gazette. (The bride is a niece of Mr. J. J. MacKinnon of this city and has visited here on several occasions.)**

**AUTUMN WEDDING—The wedding of Joseph Bowman, daughter of Mr. George D. MacKinnon and of the late Mrs. MacKinnon of Sherbrooke, Que., to Mr. Eric George Adams, son of Mr. and Mrs. Claude Adams, of Granby, Que., took place Thursday last at St. Stephens Anglican Church, Champlain, where the bride's parents were married thirty years before. The Rev. J. H. Thomas officiated. Autumn leaves and chrysanthemums were used as decorations in the church. The bride, who was given away by her father, was attended by her sister, Mrs. J. M. S. McDonald of Sherbrooke, as matron of honor, and Mr. Russell Barrett was best man for Mr. Adams. Following the ceremony Mr. and Mrs. Adams left by aeroplane for Albany, N. Y., and thence by motor for the Adirondacks.—Montreal Gazette. (The bride is a niece of Mr. J. J. MacKinnon of this city and has visited here on several occasions.)**

**BLINDNESS THREATENS**

PARIS, Oct. 24.—After twelve years of suffering from eye trouble, James Joyce, author of "Ulysses," where vision has been despaired of on more than nine occasions and who is again threatened with blindness, has been informed by his physicians that they believe his troubles are the result of abscessed teeth, it became known here today.

Mr. Joyce has been obliged to interrupt his literary work and may be forced to undergo another operation, according to advices received here from Nice. The Irish writer already has undergone more than ten operations on his right and left eyes, on several occasions regaining his sight after he was virtually blind by his own confirmation.

**BARLEY IN EXPORT TRADE**

The production of barley in Canada is rapidly increasing and now amounts to nearly 150,000,000 bushels a year. The principal uses for barley in the export market are: Feed for Livestock; Pot and Pearl Barley; Rolled Barley; Barley Flour and Barley Meal, Breakfast Foods; Malt Food Products; Malt Coffee and Barley Coffee; Malt Flour; Malt Extract; Fermented Alcoholic and Non-Alcoholic Beverages; Distilled Alcoholic Beverages and Solvents; Industrial Alcohol; Malted Stock Food and Yeast.

A special study of the particular needs of that section of the market which the producer seeks to serve is essential to the satisfactory development of the export trade.—Dept. of Agriculture, Ottawa.

**CHURCH OF ENGLAND** services in the Parish of New London on the 30th inst. will be as follows: 2.30 P. M. Kensington 7 p. m. School 2 p. m. G. T. Spriggs, Rector.

**BARN RAZED AT ORWELL COVE**—A barn owned by Mr. William Cook, Orwell Cove, was burned to the ground at 5.30 yesterday morning. The fire was not noticed until Mr. Cook awoke in the morning, and no cause could be advanced as to the origin of the fire. The barn was covered by a small amount of insurance.

**MUSICAL HOBOES**—There are different kinds of hoboos just like there are different kinds of most other things. A trio of the different kind was in Truro this week on their way from Charlottetown to Saint John. This trio, Art, Les and Tex, are known as Radio Hoboes. They are versatile musicians playing with much skill the violin, guitar and banjo. The boys while in town were guests of Ralph Chambers and were heard with rare delight in two invitation concerts held at Mr. Chamber's residence. While here courtesies were extended by Deputy Mayor Barnhill, Town Clerk MacDougall, D. S. Crocker and others.—Truro News.

**OUTLOOK BRIGHT FOR FOX BUSINESS**

(Special to the Guardian)  
 MONCTON, N. B., Oct. 24.—Several directors along with R. G. T. Hickman, Registrar Canadian Live Stock Records Branch, Ottawa, passed through Moncton this morning via the Canadian National Railway enroute to attend the adjourned annual meeting of the Canadian National Silver Fox Breeders Association to be held in Summerside, Prince Edward Island today (Tuesday).

Among the directors were Major G. B. S. Cousins, Georgetown, Ont. W. H. C. Ruthven, Allston, Ont. Chas. Fremont, K. C. Quebec, Que. Sven Klingberg, Winnipeg, Man. L. Leeman, Salisbury, N. B.

Among the matters to be brought up for discussion at the meeting is permission for members of the association to keep unregistered foxes under special conditions, such as separate keepers, also provision for advanced registration in the case of litters from registered foxes which have previously produced litters coming under registration regulations.

Mr. Fremont stated the outlook for the pet market is good. At the recent sale in London, Eng., there was an increase of from thirty to thirty five percent in prices for all except poor flat skins for which there was no demand.

Mr. G. R. MacQuarrie of Summerside, P. E. I., who was a passenger on the same train enroute from St. Paul, Minn., where he had been on business in connection with his fox business, stated the demand in the United States was advancing and prospects looked bright. He stated there is every evidence that business had turned the corner in the United States and factories were opening up on all sides giving employment to numbers of people. He is returning to St. Paul next week.

**Increased Traffic On St. Lawrence Canal**

Total traffic on the St. Lawrence canals during September amounted to 1,061,042 tons as compared with 710,753 tons in 1931. Wheat was the heaviest commodity and it increased from 203,159 tons to 483,680 tons, or by 280,521 tons or 9,350,700 bushels. Pulpwood also increased by 29,545 tons and anthracite coal by 37,475 tons. Passengers numbered 334 compared with 3,993 a year ago. From the opening of navigation to the end of September the total freight tonnage amounted to 4,888,905 tons in 1932 and 4,546,613 tons in 1931, which was an increase of 342,292 tons for this year.

**DANCE IN HOME IS NOW ILLEGAL**

WEST FRANKFORT, Ill., Oct. 24.—It's quite all right to swing your partner across the floor of any properly authorized dance hall in West Frankfort. But just try dancing a few steps with your sweetheart in her own home! It's a misdemeanor punishable by a fine of \$10 to \$100.

**ALL LOCKED UP TO GO PLACES**

NEW YORK, Oct. 24.—Fashion has joined hands with love to laugh at locksmiths. But the locksmith may have the last laugh, at that, if the luckless lady in the newest French sports frock has lost the key with which the dress is fastened.

Varied and clever have been the fastenings on the Autumn costumes but the machine key fastened is perhaps the most unique and amusing. Buttons of all descriptions are used for trimming on many frocks, but their prime use as fasteners is not as important these days when tugging, pinning and clipping the clothes on is the vogue.

Huge horse blanket safety pins of metal and other compositions immense brooches, and bar pins are favored especially for sports wear, while many day and evening dresses of softer, more supple fabrics are tied at the shoulders and waist.

**Poison Gas A Peril To Town**

Thirty thousand people, visitors and residents at the Lanchashire seaside resort of Fleetwood, had been sleeping soundly for several nights while a deadly peril lay at their doors.

It was revealed that a massive brass cylinder weighing 14 cwt., 7 ft. long and nearly 3ft. in diameter, washed up by the sea a few days ago contained enough poison gas, believed to be chlorine, to kill everyone in the town.

Mr. W. Melville, the borough surveyor and engineer, reported the find to the War Office, and an expert, arrived. After a brief inspection he ordered the cylinder's removal at once to Burscough ordnance depot.

"The cylinder contains enough poison gas to wipe out Fleetwood," the expert said. "The town has had a wonderful fluke. If anyone had tampered with the cylinder, and released the gas, there would have been disaster.

"The prevailing wind would have blown the gas right over Fleetwood."

It is believed that the cylinder is one which had been dumped at sea after the war, and has by some means become detached from the weights used to sink it.

**Secret Of Life May Be Revealed**

NEW YORK, Oct. 23.—(A.P.)—Chemists may have the key to artificial life already in their hands in the "catalysts" common in modern chemical industry.

The possibility was explained tonight to the American section of the Societe De Chimie Industrielle at Columbia University by Dr. Jerome Alexander, a New York chemist of world-wide scientific reputation.

"Should we ever discover," he said, "how to synthesize an autocatalytic (self-reproducing) catalyst, the strain might be kept alive for years under laboratory conditions, as Carrel has done with a fragment of chicken heart, but such artificial life would stand a small chance of survival.

"In any event, our Frankenstein's would be ultra-microscopic, probably molecular in size, to be feared only if they were to exhibit a predatory and persistent life."

Industrial catalysts are minute substances which cause chemical changes without themselves being affected. Silver, for example, does not ordinarily affect water much. But silver powdered very fine becomes a "catalyst" capable of purifying large volumes of water, yet itself apparently not used up or altered.

Already in real life an autocatalytic catalyst, one reproducing itself, probably has been found by science in the gene, said Dr. Alexander. Genes are particles the size of one or, at most, a few molecules. They exist in every living being controlling size, shape, characteristics and in men even affecting disposition and mentality.

**CONFLICTING STORIES TOLD OF DISASTER**

Evidence Of Sinking Of The Bright Fan In North Is Heard

OTTAWA, Oct. 24.—Conflicting evidence was adduced at yesterday's sessions of the Bright Fan inquiry before Mr. Justice Humphrey Melish, of the Supreme Court of Nova Scotia. Captain R. E. Oliver, master of the British freighter which struck an ice-berg and sank Oct. 1, last with 233,000 bushels of western grain loaded at Churchill, was the chief witness both morning and afternoon.

Steward Frank Gee, apprentice Edwards and Pugh, Able Seaman Feeney and Lewis, Boatswain Patrick Hendrick, all gave brief evidence prior to their departure for Montreal to take a steamer to their homes in England and Wales.

It was in the evidence of some of these men that conflict arose, particularly in regard to the size of the iceberg which sent the Bright Fan to the bottom in Hudson Strait, and in regard to drinking among officers and crew.

Captain Oliver, who was decorated for his war work in the patrol and transport services, passed through a long ordeal on the stand weakening only at noon when he begged to be excused from describing his war experiences.

From the day's evidence it appeared that the Bright Fan struck while following within two miles the course laid down for her by the Government patrol steamer N. B. McLean, that the iceberg was a "small growler" with a long projecting ledge submerged, that the time was just before daybreak with fair visibility apart from drifting banks of mist, that the steamer was proceeding within one knot of her top speed of eight knots, that the regular watch was being maintained but without any special person assigned solely to keep a look-out that navigation of the Straits with the aid of a gyro compass would be as safe as any other route, that the Bright Fan did not carry a gyro compass and that her magnetic compasses were greatly affected by the magnetic influence of those latitudes, and that there was no drinking on board ship after leaving Churchill seven days before the mishap.

**BRIDGE RULES TO BE CHANGED**

NEW YORK, Oct. 24.—New rules for contract bridge will go into effect today Nov. 1, and it is the hope of the sponsors that the nature of the changes will be kept secret till then.

Announcement was made today by Walter Belnecke, Vice-President of the Whist Club, of New York acting in the absence of Charles M. Schwab, the President, that an agreement had been reached with the Portland Club of London and the Commission Franchise du Bridge to publish the new code.

Presumably penalties for non-vulnerable sets will be increased to deter psychic bidding. Long agitation for such changes preceded meetings of the committees.

**Increased Traffic On St. Lawrence Canal**

Total traffic on the St. Lawrence canals during September amounted to 1,061,042 tons as compared with 710,753 tons in 1931. Wheat was the heaviest commodity and it increased from 203,159 tons to 483,680 tons, or by 280,521 tons or 9,350,700 bushels.
