FISHERY

(Continued from Page 1)

the years 1924 and 1925 there was a marked increase in the catch and a considerable increase each succeeding year up to the season 1932, when the catch was a phenomenal one.

This industry has progressed also in other lines of endeavor. About the year 1930 it was estimated by my friend, Mr. W. F. Tidmarsh, that the waste from discoloration in the canned products amounted to from \$30,000.00 to \$50,000.00 each year.

Oyster Development

Oyster cultivation work in the Malpeque Bay area was initiated by the Department in the year 1928 and was carried on during that year and in 1929, for the purpose of demonstrating the possibility of oyster development in that area.

Oyster Losses

In 1912, the local Government negotiated with the Dominion Government to have the river bottom transferred entirely to the former having in view the work of oyster cultivation.

Canneries

It was emphasized that absolute cleanliness in the canneries was essential, that all packing equipment should be sterilized at least twice each day, that canopies be erected over the packing tables to prevent the dust from falling on the meat.

Oyster Culture

In 1930, the Provincial Government saw fit to transfer the river bottom back to the Dominion Government, and Dr. A. W. H. Needer was employed to supervise the investigations to be carried out with a view to ascertaining the feasibility of oyster culture in Richmond Bay.

To Set Standard

It is the intention of the Department to bring all lobster canneries up to a certain standard, and with this in view Grading Forms have been prepared and each cannery is being graded.

discovered where small oysters were in abundance. It was also observed that the oysters in this area were not developing to any extent, and as a result, an experiment was carried on whereby a quantity of these oysters were taken up and placed on good growing areas at the head of East River.

CENTRAL GUARDIAN

This column is reserved for Queen's County news of local interest but advertising of a newsy nature may be inserted at 4 cents a word strictly payable in advance.

THE REGULAR WEEKLY CARD PARTY of the Holy Name Club was held in their hall last evening.

In the paper I have just read you will note that I have dealt with two of our most important fisheries only; at some future time I may be privileged to comment on the other fisheries which are also of great importance to the fishing interests of our Province.

PROFITABLE YEAR — The annual meeting of the shareholders and patrons of the Crapaud Creamery Co., was held in Crapaud Hall on Tuesday, Jan. 17th, 1933, at 2 o'clock in the afternoon with a large attendance.

Dr. Needer has been so successful in demonstrating to the public the feasibility of oyster culture in this Province that a large number of applications have been received from the public to lease areas in Malpeque Bay and tributaries, and in several other rivers on the north shore. Instructions will be given the lessees in regard to the proper methods to be adopted in order to obtain the best results in oyster development.

In view of the above, we may earnestly anticipate a greatly increased catch of oysters in this Province during the next four or five years.
