THE CHARLOTTETOWN GUARDIAN

FRIDAY MORNING, FEBRUARY 8, 1907.

OUR BUSINESS CONDITIONS—NO 2

Prince Edward Island is, as we have said, not poverty stricken. Our people have over two millions of dollars in the Government savings bank in Charlottetown besides their deposits in post office savings banks at a half dozen other centres, and large savings drawing small interest in the numerous chartered banks that have branches in our little Province. These branch banks have multiplied of late years in Charlottetown, Summerside, Alberton, Kensington, Souris and Montague, and they exist largely for the purpose of gathering the savings of our people.

It is safe to say that our people have three millions on deposit at the present time in the various governmental and chartered institutions of the country, a total which would average not less than $150 per family throughout the Island. In addition they have moneys invested in many ventures permanent and speculative at home and abroad. These are not indications of poverty, but they are to a large extent indications of capital denied legitimate and profitable investment at home, such as exists in other Provinces.

We have made progress, too, along certain lines. The cheese and butter industry, although seriously checked by the dry season of 1904 and the pasturage and hay shortage that resulted, has been developed far beyond any other Province in proportion to our numbers. And in the times of good prices our dairy industry has prospered, because its products could be shipped before the close of navigation. On the other hand our potato crop, which would otherwise be enormous and profitable, is largely sacrificed by the handicap of heavy freights, and the impossibility of reaching markets at the right time.

Our winter fisheries and our trade in pork, fresh meats, poultry and eggs still go on, but under terrible handicaps from the interrupted communication; the always existing uncertainty of being able to deliver the goods at a fixed date, if at all; the high freight and express rates, and the "mussing" from three or four times handling which makes meats unattractive and strikes of a cent a pound from their value. It is only the ability, patience and persistence of our business firms, and the economy, industry and resources of the producers on whom these burdensome and crushing charges and losses fall, that enables business to be carried on in these lines,

And yet we are making some substantial progress. Here in Charlottetown within ten years we have put in a complete system of sewerage; we have greatly extended our macadamised streets; replaced miles of decaying wooden sidewalks with solid concrete; built a splendid cathedral, a new provincial college, new churches, market building, many nice residences, vastly enlarged improved our two principal hotels and planted our streets with shade trees. The Government, too has done something, replacing our cumbrous ferry with a million dollar bridge across the Hillsboro and extending the rails to Murray Harbor and Montague.

It would be easy to point out similar evidences of progress made in other towns, and to note that Summerside, sorely stricken by fire, is pluckily rebuilding. Where it is possible our people have attempted to manufacture. Witness our numerous and successful lobster factories, our newly established soap works, our condensed milk factory, the latter pluckily and successfully facing the hard conditions of our winter isolation, our interrupted communications and crushing freight rates—conditions which drove the big pork factory out of business at enormous loss.

Reading this recital some unreasoning member of the human family may rise to ask, Then why are you complaining? We will get down to his level and answer him. You have two horses in your barn, stalled side by side, both well-bred and strong. Turn into the box of one of these horses his accustomed four quarts of oats and give the other none. Will not the unfed horse become uneasy, discontented, and tenfold the more so because you have fed his mate? Even horse nature will revolt at the inequality and injustice that would compel him to work side by side with a mate that has rations of oats while he is denied. Who would blame the horse that would kick down his stall under such conditions?

Prince Edward Island is "kicking" because of like injustice. It is not that we cannot live, but that we are denied equality. Because the solemn compact of equal privileges and opportunity—ours by natural right as well as by the terms of union—has been broken and set at naught by Canada. Because we must pay equal taxes while denied equal privileges. Because the man who barely exists under our present hard conditions would live and prosper under fair conditions. Because the man who is making a little now would become prosperous, and the merchant who is prosperous now would become a merchant prince under the fair conditions laid down in the terms of union with Canada. Because by the neglect and broken faith of Canada, labor and honest industry in Prince Edward Island are denied the just reward accorded them in every other Province of the Dominion. And because these facts are beyond dispute, known and read of all men and nothing is done by the powers that be in the way of remedy.

WORDS OF COMMENDATION.

We print elsewhere in this issue one only out of very many of the letters of commendation The Guardian has recently received. Our friends will please accept our thanks coupled with the explanation that it is impossible because of the number of these commendatory letters to print even one half of them. None the less they are greatly valued. And it is quite as well worth while to tell the editor your opinion of his course when you think he is doing good service as to remind him of his error when you think he is going wrong. In either case the public writer, like the politician, likes to know what the people are saying and thinking. There is no longer a doubt on that point!

We have another object in view and it is the principal one, in thus calling attention to these flattering encomiums The Guardian is receiving from day to day. It is to point out to every public man and to every newspaper on Prince Edward Island how they may share with us, even at this late hour, the great and flowing tide of popularity. This way is still open. Become champions of Island rights! Fight the battle of our Island for equal rights, equal trade privivileges, equal freight rates for equal distances, the fulfilment of the terms of union by the construction of the Tunnel! That way lies popularity success, prosperity, for each and all.

The Legislature is about to meet. Speak to your representative or write to him to fall in line and battle for Island rights and help get relief from our crushing winter disabilities. Two cents in postage and three written lines will do the trick.

— —

Parliament is in session at Ottawa and our members there, of both parties, are becoming more and more convinced that the Tunnel is the only ultimate and practical solution of our present trying situation. There is no postage to pay. Drop your representative a line and tell him what you think.

— —

Those who place their faith in ice-breaking steamers are invited to take stock of the present situation. Canada has four of these craft. At this writing the Stanley and Minto are out in the ice of the straits while the Montcalm and the Lady Grey, the two new ones, are frozen in at Quebec, having attempted little and actually done nothing all winter! We help to pay the cost of these boats and the hire of their captains and crews while they lie at their docks in idleness. This may be satisfactory to the office holders, office seekers and rank partisans of the powers that be, but honest workers, business men and taxpayers are not quite so well pleased.

WHY DO WOMEN WORRY?

First Sign of Failing Health

Worry is a disease—and it's more—it produces other diseases, because it breaks down the nerves and saps the vitality of the body.

What a pity women don't realize that if they were well—if the blood was nutritious—if the nerves were strong—if all the organs were active—then the little things that irritate and prey on the mind wouldn't receive a moment's thought.

The woman who worries has a poor appetite—she sleeps poorly. If it only lasted for a day or two it might be of small consequence—but she grows limp, miserable, unhappy—worse day by day.

She needs Ferrozone which cures worry by curing the conditions that render worry possible. For nervous, weak women, no tonic is so good; thousands it has cured just like Mrs. M. E. Etherington, of Troy, who writes: "I am quite willing to give a public testimonial for Ferrozone believing it to be a tonic of superior excellence and one that will rapidly build up strength and supply new energy to anyone not feeling well. Last spring I was in a very poor condition of health. I was nervous, felt tired, and completely worn out. No doubt it's quite a common complaint with ladies of my age, but I placed great reliance in Ferrozone, and took it for several weeks. It made me quite strong, and in fact I have been in better health ever since. I can heartily recommend Ferrozone."

Ferrozone cures by making good blood strong nerves and a healthy body.

This is why it gives color, clearness to the skin, buoyancy to the step, brightness to the eyes—because with good digestion and activity of the body in all its parts there's health. Price 50c a box at all dealers.

ADVERTISING IS BROAD.

Advertising in itself means publicity and publicity is a very broad and comprehensive term. It does not mean simply a word whispered to a favored few. It is, rather, synonymous with a general, broadcast declaration, and the broader the scope of the announcement, the better the advertising. No occupied space that directs attention along given and desired lines can be reasonably regarded as wasted; nor can any funds expended to this end be adjudged extravagance.—American Medical Journal

A Habit to Be Encouraged.

The mother who has acquired the habit of keeping on hand a bottle of Chamberlain's Cough Remedy, saves herself a great amount of uneasiness and anxiety. Coughs colds and croup, to which children are susceptible are quickly cured by its use. It counteracts any tendency of a cold to result in pneumonia, and if given as soon as the first symptoms of croup appear, it will prevent the attack. This remedy contains nothing injurious and mothers give it to little ones with a feeling of perfect security. Sold by all druggists.
