COAL AND STEEL BATTLE GOES ON

Plaintiffs Closed Yesterday, Defence Counsel Will Open Today.

SYDNEY, August 8.—(Special) The Steel Co. rested its case at 2.30 this afternoon after nine days spent in advancing its evidence.

There was an adjournment taken until tomorrow afternoon, when Lovitt will open in behalf of the Coal Company.

It is thought General Manager Dugan of the Glace Bay corporation will be the first witness.

Although it is conceded that the Steel Co. have made an exceptionally strong case in their efforts to prove the inferiority of the coal supplied last November and justification for their subsequent course in rejecting the same, it is believed the Coal Company will put up a stiff fight in support of their action in breaking the contract.

From the opening words of Judge Longley last week to the close of this afternoon's proceedings, the keen interest manifested in the progress of the suit never abated.

Considerable progress was made today, the direct examination of the respective witnesses for the plaintiff Company for the most part being condensed and the cross-examination curtailed.

It is probable that the defence will commence at least as much time as the Steel Company in examining witnesses and the Coal Company may be followed by another volume of evidence in rebuttal.

TORONTO SCULLS WILL COMPETE

TORONTO, August 7.—The Argonauts today sent four crews to Philadelphia to participate in the National regatta on the Schuylkill river, which takes place on Friday and Saturday. The great four which cleaned the board at the Canadian Henley and the senior eight, and intermediate double, and senior four is the sculling talent going to the city of brotherly love. The boys are all in the best of shape and of confident of making their presence felt.

BRITISH GUNNERS ARE ENROUTE

MONTREAL, August 7.—The British artillery team is in Montreal, back from a week of sight-seeing in different parts of Ontario. The whole team accompanied by the president of their association, the Right Hon. the Earl of Strathbrooke, Lady Strathbrooke and Mrs. Wisart, who is with her husband, Colonel Wisart, commander of the team, and members of the reception committee of the Canadian Artillery Association, arrived last night, having had a delightful trip down the St. Lawrence.

Today was spent in driving about the city and seeing the sights. This evening Colonel Buchan and officers of the Montreal garrison entertained the officers at the dinner at the Montreal Hunt Club. The team will leave tomorrow evening on the Canadian Pacific express for St. John. There and at Digby, short stays will be made before the team goes to Halifax on Saturday evening, to prepare for the contest for the King's cup on sea ranges.

BOMBARDMENT OF CASA BLANCA

Two Thousand More Troops Landed, Street Fighting, Jewish Quarter Sacked, City Is Full Of Dead Moors.

TANGIER, August 8.—(Special)—French warships yesterday landed 2,000 additional men at Casa Blanca where street fighting continues, judging from the desultory firing day and night.

The Jewish quarter of Casa Blanca has been sacked, and many persons massacred in the streets.

The city is said to be full of the dead Moors and the Moorish quarter is in ruins having been set on fire by shells from the big guns of the cruisers.

All the stores are closed and much hunger and distress prevails among the poor.

This foreign consuls here ordered the stores to be reopened and have established a tariff for foodstuffs designed to mitigate the sufferings of the poor.

Explosives are all safe, either on board the ships or at the consulates guarded by blue jackets.

The warships continue to drop occasional shells into groups of Kabyles on the beach in order to prevent them from approaching the town.

France, upon which the chief burden of restoring security in the disturbed country will fall, may be forced to occupy in turn all the Moroccan ports and then probably be compelled to undertake a punitive expedition to Fez, after which it would be impossible to withdraw, as was the case with the British, stores to be reopened and have established a tariff for foodstuffs designed to mitigate the sufferings of the poor.

MOSCOW POLICE SEARCH SCHOOL

Discover Bomb Factory and Arrest Twenty Male and Female Students There

MOSCOW, August 8.—(Special)—The police today surrounded and searched the imperial technical schools and discovered a central revolutionary laboratory for manufacturing bombs of a new pattern and regular supplies of which were being delivered to various points in the interior.

The police seized a number of bombs, six hundred time fuse appliances, a typographic outfit and some forbidden literature and arrested twenty male and female students of the school.

THE KAISER PREACHES SERMON

SWINEMUDE, Aug. 7.—The Kaiser had the czar as a member of his congregation last Sunday, when in accordance with his custom, he conducted morning service on board the imperial yacht Hohenzollern and preached a sermon. An hour later the Kaiser attended a special service on board the Russian imperial yacht Standard, in honor of the Dowager Czarina's name day.

There was a regatta this afternoon in which the crews of the German and Russian warships competed for prizes given by the two Emperors, who presented them to the winners on board the Standard. There was a large fleet of excursion steamers around the imperial yachts, but patrol boats prevented them from getting in too close proximity.

KOREAN COURT IS CORRUPT

WASHINGTON, Aug. 7.—The far eastern mails just arrived contain a pamphlet issued from the Japanese residency-general in Korea entitled "Administrative reform in Korea," designed to vindicate the work of the Japanese in the Hermit Kingdom under the Japan-Korean agreement of 1904. After referring to the financial difficulties which were met by a loan of 10,000,000 yen from the Japanese Industrial Bank, the pamphlet tells of the changes instituted. Roads were reconstructed, waterworks built, an educational system established, banks created and hospitals erected.

The police department, the statement says, has been nullified.

A striking picture of the corruption at the Korean court is given. The administration of justice in Korea, the statement continues, is too revolting to all sense of decency to give in detail. Such administration is regarded as a privilege to be farmed out, bribery is general, innocent persons are convicted and their property confiscated, while the guilty are liberated.

CANADA TO HAVE A NICKEL COIN

OTTAWA, Aug. 7.—It is probable that with the opening of the branch of the Royal Mint here in November or December, next, a nickel penny may be introduced into the Canadian coinage. It is felt that there is a need for a penny piece in Canada, and a nickel coin worth two cents would not have the disadvantages in respect to the cumbersome size and weight which necessitated the discarding of the old copper penny.

The use of nickel in Canadian coinage would soon afford another convenient market for the large nickel ores now being exploited at Cobalt.

The new mint will employ about sixty men, and will turn out about sixty millions coins per year.

At present the British Mint is turning out on the average about sixteen million Canadian coins per year.

Keep Minard's Liniment in the house.

HALIFAX SHOWS NIGHT SPORTS

MINERS LEAVING SPRING HILL

SPRINGHILL MINES, August 7.—The town is exceptionally quiet. A casual visitor would not be able to discover that anything in the nature of a strike was on. Numbers have gone away, others are working at various local works. Judging from the general street talk if no settlement is effected by the 15th there is likely to be quite an exodus from Springhill.

STRUGGLE FOR CABINET SEAT

OTTAWA, Aug. 7.—Archie Campbell, M. P., is in the city today in consultation with Sir Wilfrid and Hon. Mr. Aylesworth in the struggle for the cabinet position lately held by Mr. Hyman is becoming warm. Besides the impression grows that Mr. Emmerson's successor in the railway department may not be from the maritime provinces and Mr. Campbell considers that he is equal to the position.

By Electric Light, and Military Tattoo on Wanderers' Grounds.

HALIFAX, Aug. 8.—(Special)—The principal event of the third day of the big summer carnival was the electric light sports and military tattoo on the Wanderers grounds this evening, which were witnessed by a great crowd of people.

The tattoo is one of the most picturesque ceremonies in garrison life. The music of the massed bands, the myriads of torches and the marching of the torch bearers combining to make a spectacle long to be remembered.

During the day there was a band concert on Provincial Square, excursions on the harbor and cricket and baseball matches.

At two in the afternoon His Excellency the Governor General addressed the Canadian Club at luncheon given in his honor at the Halifax Hotel.

Militia Titles To Be Approved

By the King Before Charges Can be Made Particularly Where Royal or Ducal Name is Made Use of.

OTTAWA, August 6.—Lord Elgin, colonial secretary, has sent a despatch to Earl Grey, setting forth that the attention of his majesty's government has been drawn to the diversity of practice which prevails in various parts of the empire in regard to the granting of honorary distinctions and titles to military units. "I have now, by his majesty's command, to indicate to you, the procedure which it is considered desirable should be observed in such matters."

Changes of titles, which involve the use of words "Royal" or "Imperial," he held to emanate from the sovereign; they should not in any case be granted without his majesty's sanction having been first obtained.

Any other changes of titles need only be formally reported to the secretary of state for information, with a statement of the reasons for the change, where such changes are made on military grounds, e. g., the change of infantry to mounted rifles.

It will be necessary for the above mentioned procedure to be carried out before any honorary distinction or change of title can be recorded in the "army lists" published by the war office.

LEADER BORDEN'S COMING TOUR

OTTAWA, August 6.—T. L. Borden spent part of yesterday in Montreal, and the whole of today in Toronto, discussing with friends the party program matters of organization. He will probably leave for Nova Scotia Saturday or Monday. It is his intention to visit his people at Horton before the first Nova Scotia meeting.

Mr. Borden expects another session before the present parliament is dissolved. He doesn't think there will be two. Mr. Borden arrived in Toronto from Montreal. His visit there is a private one. He does not start on his political tour till August 23rd.

On August 30 he will address a meeting in Halifax at the Empire rink. With him as one of the speakers will be J. G. H. Bergeron, M. P. for Beauharnois, Quebec, Dr. R. C. Weldon and J. C. O'Mullin will also be speakers.

The Cape Breton meeting will be held at Glace Bay, on August 22nd, when Messrs Borden, Bergeron and Tanner will be the speakers.

The western meeting will be held at Middleton on August 24. At this meeting the speakers besides Mr. Borden will be Hon. G. E. Foster, M. P., Mr. Bergeron and F. W. Harrington.

It is expected by Mr. Borden that the whole Canadian tour will be over by November.

HIBBERT TUPPER IN SAINT JOHN

Will Spend Some Days in Nova Scotia, Does Not Deny He May Re-enter Public Life—Lady Tupper Seriously Ill.

St. John, August 6.—Sir Hibbert Tupper and Lady Tupper, passed through St. John today on his way to Halifax from his home in Vancouver.

After spending a few days in the Nova Scotia capital, he and Lady Tupper will go to Quebec to meet their son, who is returning from the naval colonies in Great Britain. Speaking of the anti-Japanese feeling in British Columbia, Sir Charles said the whole trouble is that the Japanese, like the Hindus of whom there are a number in the province, furnish cheap labor. This arouses the antagonism of the white laboring people, and so the

REMEMBER—That everybody reads the morning paper as the news is then fresh and up-to-date, and that at some time during the day everybody is likely to buy the goods advertised, while their mind is still bright and active.

THE NEW WORKS AT CHIGNECTO

OTTAWA, August 7.—Senator Mitchell is in the city this evening on his way to Toronto. He is greatly pleased with the prospect of the power works at Chignecto and says that many American industries will find it to their advantage to use it. The senator also promises a complete re-organization of the Joggins mines system of operations, opening up better and more profitable coal areas and working them in a more advantageous way.

NEW BRUNSWICK IMPORTS HORSES

MONCTON, August 7.—The sale of horses imported by the local government took place at the exhibition speedway this afternoon, and was largely attended by horsemen from surrounding towns. Prominent stock breeders were here from Nova Scotia and Prince Edward Island. The whole consignment of nineteen horses was sold, and good prices realized. King's College, the Clydesdale stallion, brought \$1,275 and was purchased by the Springfield, Kings County agricultural Society. The highest price paid for a Clydesdale mare was \$350, by Walter Bulmer, of Westmoreland Point. The prices ranged in the vicinity of \$300. The French coach mare Dalbergie was purchased by Mayor Smith, of Shediac, for \$335.

ART SUFFERS BY HIGH TARIFF

NEW YORK, Aug. 7.—Sir Casper Clarke, director of the Metropolitan Museum of Art, declared on his arrival here after a several weeks tour of Europe that the present American tariff on objects of art is handicapping the development of art and artistic culture in America.

"I believe the American tariff on art objects has exasperated a good many wealthy Americans who like artistic things," said Sir Pardon. "I know personally of a number of instances where wealthy Americans have gone abroad and purchased houses in London and Paris and surrounded themselves with works of art, and then have decided to reside abroad permanently because they could not bring their things home without paying a tariff that is almost prohibitive."

THE PROVIDENT FUND MEETING

MONCTON, August 7.—The provident fund board of the I. C. R. composed of D. Pottinger, chairman; John H. Stewart and J. W. Nairn, representing the employees; W. A. Dupe, of River Du Loupe, and T. C. Burpee, appointed by the government, is holding its first meeting here.

W. C. Paver is secretary of the board. Today's session was wholly taken up with consideration of the rules governing the board. The framing of rules and regulations will probably be finished tomorrow morning, after which application for a retiring allowance by employees will probably be taken up. At present there are about 150 applicants for pensions. About fifty, it is stated, are employees of the Moncton shore. Some four or five conductors and about the same number of drivers running out of Moncton are among the applicants.

LOW MEADOWS ARE OVERFLOWED

St. John, August 7.—The intervals along the St. John River, which supply practically all the farmers in the upper part of Queens County, and adjoining districts with hay, are seriously threatened by the existing wet weather and water conditions. The river is so very high that great areas of interval land are almost under water, and within the next twenty-four hours, if the present rain continues will be flooded. That St. John, which is on the main river about three miles from Jemseg, is already partly submerged and eight inches of water will put the whole island out of sight. The island west of the head bay growing eight pieces of land in the district and the standing crop was bought this year for the largest price on record. On this island and on the Queens county intervals it is estimated that fifty three thousand tons of hay are in danger. If however, the flood should extend along the river as far as Mauderville, the loss will be immensely greater and scores of farmers will be ruined, for they will be unable to get any hay elsewhere.

Everything is coming at once, and heavy losses will be the result. There is as yet no indication that the rain is over, and the river continues to rise. The conditions in the St. John valley, the most fertile section of New Brunswick, are extremely grave.

ADVERTISING IS BROAD.

Advertising in itself means publicity and publicity is a very broad and comprehensive term. It does not mean simply a word whispered to a favored few. It is, rather, synonymous with a general, broadcast declaration, and the broader the scope of the announcement, the better the advertising. No occupied space that directs attention along given and desired lines can be reasonably regarded as wasted; nor can any funds expended to this end be adjudged extravagance.—American Medical Journal
