Oil City Team and Rovers Tonight

The first game of the City Hockey League will take place tonight at the Arena Rink, when the Oil City team will cross sticks with the Rovers.

If the interest in the city league hockey matches create as much interest among the players and the backers of the different sections, as was shown in baseball, it certainly will be a great boom for hockey.

When the different teams get into action, as it is the teams competing have on their lineups a number of senior players, and the games will be well contested. The game tonight will start at 7.45 sharp.

Canadian Cattle Will be Blocked

WASHINGTON, Jan. 5.—Efforts of Canadian cattle growers to obtain free admission for their livestock into this country are encountering the opposition of the United States Protective League. That organization, through its official publication, the American Economist, has served notice that the efforts of the Canadians to get a free market for their cattle in this country will be blocked.

Western Canadian cattlemen have been active recently in trying to have duties relaxed and this has aroused the high tariff interests to oppose the movement.

Beauty is an Aid To Long Life

OXFORD, England, Jan. 5.—Listen to music, look at beautiful things, chat with friends, wear your best clothes and talk all you can to pretty girls, if you wish to live for many years.

This is the advice given by Prof. Friar Bacon of Oxford, where the average age of the heads of all the colleges has reached seventy years.

Among the educators a council spirit prevails, however, that longevity is an accident rather than an achievement.

Prince's Argentine Visit Bearing Fruit

LONDON, Jan. 5.—The recent visit of the Prince of Wales to the Argentine Republic, seems to be bearing fruit already in a commercial way.

Four trainloads of British steel window frames are now ready for shipment to the Argentine and the exporters attribute the orders for the window frames to the Prince's visit.

"There is not the least doubt that the Prince of Wales has captured the South American market for Great Britain," said one of the exporters in question. "These contracts, until the present time, have been going to the United States and Germany."

Freak Bird Proves 'Hit' of Boston Poultry Show

BOSTON, Jan. 5.—A bird, which poultrymen say, looks more like a buzzard than a turkey, crows like a rooster, and hasn't a gobble in his bag of tricks, has been the "hit" of the current poultry show without knowing it.

Mr. Nether, of Green Harbor, who entered the curiosity, called it a "turken." From crop to top-knot it is entirely without feathers. The body is that of the ordinary barnyard fowl but experts say it clearly is not a turkey, a hen or a cross between the two.

Mr. Nether lamented the idea that the feathers were picked for exhibition purposes. He says he got his first eggs in Pennsylvania and now has "turkens" of all colors. The turken is said to be a freak.

Britain Prepares for Industrial Strife

LONDON, Jan. 5.—British capital and labor are quietly preparing for the epic fight which both sides are convinced will submerge the country in industrial warfare on May 1.

The conflict is expected to take the form of strike of 4,500,000 workers in support of the coal miners who verged on strike last August but upon receiving a government subsidy of \$50,000,000 agreed upon a truce till the end of April. This impending struggle probably will provide a decision in the contest between labor and capital, the one jealous of the standard of living, which is none too high, and the other clamoring for lower wages and longer hours of work.

The Conservative Government is preparing independently to cope with the struggle and probably to participate in it, if need be. Plans for emergency transport services are being perfected and thousands of special policemen are being recruited secretly.

THE MARKETS

(Canadian Press) MONTREAL, Jan. 5.—The export trade in Canadian coarse grains on the Montreal market today was quiet, only sales of odd lots of oats and barley being made. The feature of the domestic cash grain trade was the stronger feeling that developed in the market for Ontario and Quebec oats and prices were advanced 1/2 to 1 cent per bushel. The export trade in spring wheat flour showed an improvement and prices were steady. The winter flour situation was quiet but firm, in most lines of mill and flour. Demand was steady. A fairly active trade was transacted in rolled oats and prices were unchanged.

The egg market was inactive but firm. The butter market remained steady under a quiet demand. Cheese prices eased 1/2 to 1 cent per pound.

Sir Hugh John Macdonald Thought Out of Danger

WINNIPEG, Jan. 5.—Reassuring reports on the condition of Sir Hugh Macdonald, were given out by his home tonight.

Primogeniture Ends in England

LONDON, Jan. 5.—Under an act effective soon, dealing with the administration of estates the owners of which die intestate and whose will possess no advantages, Sir Hugh Macdonald, and the hoary word "primogeniture" probably will be eliminated from legal language in this country. The new act gives male children no preference over female.

This law is largely the work of the Earl of Birkenhead, Secretary of State for India and formerly Lord High Chancellor.

England is the last of Western Civilized Powers to abolish primogeniture. The law, ever since it became firmly established in the time of Henry III has in general applied to inheritance of land of intestates among male children, but there have been many exceptions. Primogeniture was a growth of feudalism and designed to keep fiefs together, and in England at first it was customary for the youngest rather than the eldest son to inherit the fathers land.

The next step logically will be the abolition of the law to entail which limits succession.
