

CROWN PRINCE IN ALSACE CRISIS

BERLIN, Dec. 10.—(Special).—The hand of the German Crown Prince was at work in the recent crisis over the incident between the military and civilian authorities in Alsace, according to Dr. George Weill, a socialist deputy in the Imperial Parliament.

GOING BEYOND THE MONROE DOCTRINE.

LONDON, Dec. 8.—In a speech on Mexico on Saturday, American Ambassador Page, said that one feature of America's attitude to Mexico was that no sort of financial control can, without the consent of the United States, be obtained over these weaker nations which would in effect, control the Government.

TUG IMPERATOR HAS BEEN LOST.

BATHURST, N. B., Dec. 8.—The tug Emperor, owned by the Northern Dredging Co., was destroyed by fire.

ARRIVAL OF NEW ZEALAND.

LONDON, Dec. 8.—The battleship New Zealand, arrived at Devonport, today from Halifax, after her world tour.

PROPER FOODS

The end of all feeding is profit, either directly or indirectly. The farmer who knows how to feed for profit is likely to be a prosperous farmer and a good one.

The animal body is a sort of machine. It requires material for its building; it requires fuel or energy to keep it going, and it can use still other material to work up into more concentrated finished products.

All feeds are of interest and value to the farmer because they contain either one or all of the following: proteins, fats or carbohydrates. In the proteins is the element nitrogen and they are of prime value. It is necessary that every animal receive protein in some form or other in order to grow and to live.

The basis of all successful feeding rests on the problem of supplying the protein, carbohydrates and the fat in the proper proportions. When this is done we have a balanced ration.

The scientists take an animal and determine the amount of the various feed constituents required to maintain the body to grow, to do work or to lay on fat. Then they find out the various quantities of these contained in the various farm feeds. By supplying just the amount of feeds of the various sorts to that the total of the proteins and carbohydrates or fat required, they supply what has been termed the balanced ration.

Why Are You So Tired?

THE WEATHER IS NOT TO BLAME FOR THAT "DRAGGED OUT" FEELING.

"This weather simply takes the life right out of me. I can hardly drag one foot after the other," said a run-down, tired-out woman, the other day.

We want to say to every such person in this vicinity. Don't blame the weather, it's your condition. You need a strengthening tonic and the very best we know is Vinol which is a combination of the two most world famous tonics, namely, the medicinal, curative elements of cod liver oil and tonic iron, for the blood.

A case has just come to our attention from Millford, Mich. "Mrs. Julia Barber says: 'I was run-down and hardly able to drag about; my appetite was poor and I was not able to work. My druggist asked me to try Vinol. The first bottle helped me and after taking the second bottle I was able to work and felt well and strong. Vinol is the best medicine I have ever taken.'

Try a bottle of Vinol with the understanding that your money will be returned if it does not help you. E. A. Foster, Central druggist, Charlottetown, P. E. I.

satisfactory speech in Parliament which resulted in the passage of a vote of non-confidence in the government.

Dr. Weill declared that the Chancellor's hazy references on that occasion to the Emperor's anti-military orders to reconcile the wishes of the German ruler and his eldest son, Lieutenant Baron von Forstner, of the Ninety-third Infantry, the instigator of the trouble between the soldiers and the citizens of Zabern, told some friends today that he was as good as retired from the army.

THE BISHOP OF LONDON DENOUNCES MILITANCY BY WOMEN

LONDON, December 6.—A large meeting of Anglican clergymen, presided over by the Bishop of Kensington, was held in Queen's Hall last night, and a resolution passed protesting against forcible feedings. Six hundred bishops and clergymen sent letters expressing sympathy with the movement, but many of them, including the Bishop of London, at the same time denounced militancy by women attempting to secure suffrage.

MANY EMINENT MEN DO NOT HOLD PROFESSOR LEACOCK'S VIEWS

Some time since Prof. Leacock of McGill set up a defence of moderate drinking. There were many things in the statement that could not be expected to go unchallenged. The defence was undertaken by E. M. Hewson Esq., Barrister-at-Law, Vice President of the Hewson Wollen Mills and President of the N. S. Temperance Alliance. The following is the position taken so ably by Mr. Hewson and is herewith presented to the thoughtful for a careful perusal.

In a recent article in the Montreal Daily Mail, Prof. Stephen Leacock, of McGill is quoted as championing the cause of occasional or moderate drinking and fairness demands that something be said in answer. The people of Canada are asked to judge whether his position will bear the "acid test" of recent investigation.

He says "In their demand that people who make use of beer or wine which shall be put into prison, they approach dangerously near to that prosecuting spirit which has written in the history of mankind the most heinous of its pages."

This requires no contradiction, for neither temperance advocates nor their laws ask that people who drink be put into prison—except in as far as they lay themselves open to the world-wide laws against drunkenness in public places.

He says "Some of them deny the harmfulness of the moderate and self-restrained use of spirits... but in any case I doubt the harm in drinking." The advocacy of moderate drinking used to be in vogue but most thinking men are revising their views in the light of unanswerable testimony.

Were one of us to publicly advocate the moderate use by the masses of arsenic, opium, or strychnine his sanity would be questioned and yet Sir Frederick Treves, F. R. S. C., of London, the physician of King Edward and perhaps the greatest medical authority in the Empire, in a recent speech as reported at Windsor, said "All alcohol is distinctly a poison with certain uses like other poisons but limitations on its use should be as strict as on arsenic, opium or strychnine... It is simply preposterous to say that any young healthy persons need any alcohol whatever. Having spent the greater part of any life in operation... I would say with Sir James Paget that of all people, those I dread most to operate on are drinkers. I hope what I have said will help my hearers to answer such absolute fallacies as 'a glass of port can do no harm.'"

The great 1909 London Conference on Alcoholism, to which most of the nations sent scientific men or other delegates, drew up and issued the following definition of Alcohol. "Exact laboratory clinical and pathological research has demonstrated that alcohol is a dehydrating, protoplasmic poison and its use as a beverage is destructive and degenerating to the human organism. Therefore its use should be limited and restricted in the same way as other poisonous drugs."

From the 1913 standard Dictionary we read: "Alcohol is a poison. It is one of the most common causes of insanity, epilepsy, paralysis, diseases of the

EDITOR MISTAKES MAN FOR DEER

BRUSSELS, Dec. 6.—(Special).—Camille Jenatry, the Belgian automobile racing pilot was accidentally killed today by the editor of a Brussels newspaper during a hunting party.

Mr. Jenatry was mistaken in the twilight for a deer by Mr. Alfred Madoux, managing editor of the Ettoile Belge, who fired an explosive bullet into his thigh. The stricken man soon died from the wound.

CHARGED WITH MURDERING HIS FATHER AND MOTHER.

GARDINER, Me., Dec. 8.—The burned bodies of Wilfrid B. Eldredge and his wife, were found in the kitchen of their farm house in Litchfield and their son Fernald, aged thirty, is under arrest pending an investigation. The police say they were apparently old folks aged about 60.—They had been beaten and keroseene, found over their bodies. Their money and valuables were not disturbed. The fire was put out by neighbors. The police say the son told them that he had been drinking last night, but slept at home, and left again at five o'clock, this morning. He made no reference to his parents' death.

MURDERED FOR HIS MONEY.

LOUISVILLE, Dec. 8.—Rev. John L. Grant, retired Baptist, was murdered for gold coins he is known to have hoarded. Three negroes are wanted, suspected of the murder.

HINDU HABEAS CORPUS DECISION

OTTAWA, December 7.—Whether the recent judgment of Judge Hunter, of the Ontario court, releasing on habeas corpus proceedings a number of Hindus who were to have been deported, was an attack upon the constitutionality of Immigration act or simply upon the order-in-council based upon that act, is the question upon which hinges the action of the government in regard to the problem.

FIRE AT BRANTFORD, ONT.

BRANTFORD, Ont., Dec. 6.—Fire at the Dominion Cannery Limited, farm, early today, destroyed a barn and burned thirty-three horses and six cattle to death. Loss fifty thousand dollars.

BEWARE MOONLIGHT DECLARES SCIENCE.

The observation that the rays from the moon favor putrefaction detracts from the romance which has long been associated with moonlight. It is an old tradition, the Lancet points out, that to sleep in the moon's rays is a dangerous proceeding, and there is such a thing as "moonblink," a temporary blindness said to be due to sleeping in the moonlight of tropical climates, while some observers have reported a devastating action of the moon's radiations on vegetable life.

EAT CABBAGE, FISH SAUSAGE, NEW BREAD

"PAPE'S DIAPPEPSIN" DIGESTS FOOD WHEN STOMACH CAN'T —CURES INDIGESTION.

Child Had Bronchitis

Once people get acquainted with the wonderful control which Dr. Chase's Syrup of Lined and Turpentine exerts over bronchitis, whooping cough, croup and colds it is not easy to persuade them that anything else is "just as good." This is why the imitators never get very far.

In 1902 Mrs. Eugene Iler, King street, Truro, N.S., wrote as follows: "From an infant one of my children was troubled with bronchitis, and the least cold would aggravate the trouble. We could not get anything to help him, and were often greatly alarmed. Hearing of Dr. Chase's Syrup of Lined and Turpentine as a treatment for bronchitis we used it, and are glad to state that it effected a complete cure. If any of the children take a cold or cough I give this medicine, and have never known it to fail to bring relief."

Mrs. Iler now writes that she has since proven this medicine to be a cure for whooping cough, and would not be without it in the house.

DEPUTY WOUNDED IN 23 BOUT DUEL

ROME, Dec. 18.—(Special).—Signor Gambarotta, a liberal Deputy, was disabled today by a slight wound in the forearm, inflicted by Signor Giuseppe de Felice-Giuffrida, a Socialist Deputy, after two parliamentarians had fought twenty-three bouts with rapiers. The quarrel arose out of an incident in the Chamber of Deputies.

A WESTERN LANDMARK

Another historical spot in western Canada has recently been located and marked; says the Toronto Globe. It is in the Province of Saskatchewan, and in the constituency of Pelly, situated about three miles north of the town of Pelly, on the C.N.R. The location is on the site of the old headquarters of the Mounted Police, known as Fort Livingstone, or Swan River Barracks, and in the seventies was an important point in the west.

The woman in question convinced her husband, friends said the general public of the good fortune that had befallen her, and on the strength of the fortune that was to come contracted a large number of bills in this town. Lately the husband became suspicious that all was not straight in connection with the story and began demanding some evidence of his wife with regard to the facts of the case. He was put off from time to time until a few days ago, when he started making inquiries and endeavored to trace the matter out. So far as his knowledge goes there was no fortune ever in existence and his wife disappeared from the home, taking the daughter with her.

The bills were contracted for luxuries absolutely beyond the earning power of the husband and comprised jewelry and other expensive lines of goods, and it is understood that in some instances the woman borrowed money. The husband is a hard-working, honest, industrious man, and it will, of course, be absolutely impossible for him to meet the bills which his wife piled up during the past eleven or twelve months on the strength of the legacy left her by relatives in Great Britain. Where she is now the husband does not know.

ENGLISH VIEW OF NICARAGUA TREATY

LONDON, Dec. 10.—(Special).—The Standard, referring to President Wilson's intention to establish a virtual protectorate over Nicaragua, says:—

"If the new policy is intended to cover the whole of the Central American states and apparently those of at least the northern portion of South America, it is obvious that we have a great and very serious extension of United States imperialism."

WIFE RAN BILLS AND THEN SKIPPED.

AMHERST, Dec. 9.—Over a year ago The Herald reporter received information that an English woman residing in this town had received word that relatives in England had left her some thirty thousand dollars and also five thousand dollars to her daughter to be held in trust by the mother until the daughter attained her twenty-first birthday.

The bills were contracted for luxuries absolutely beyond the earning power of the husband and comprised jewelry and other expensive lines of goods, and it is understood that in some instances the woman borrowed money. The husband is a hard-working, honest, industrious man, and it will, of course, be absolutely impossible for him to meet the bills which his wife piled up during the past eleven or twelve months on the strength of the legacy left her by relatives in Great Britain. Where she is now the husband does not know.

COUNCILLORS COME TO BLOWS

PARIS, Dec. 10.—(Special).—The City Council rejected tonight the proposal to restore Sisters of Charity and the members of other nursing orders to the posts they held in the Paris hospitals, prior to the separation of church and State. By a vote of 41 to 35, however, the Council pronounced in favor of the principle of subcontracting private

SO-CALLED FREE TRADE BRITAIN TAKES FOOD, FALLS BEHIND RIVALS

The late Price Collier, the well-known American writer on National and International topics, had a great admiration for Britain on many grounds, but her fiscal policy was not one of them.

To him the British system was neither Free Trade nor Protection, and did not possess the merits of either.

In his book, "England and The English," he expressed surprise that anybody should consider Britain to possess a Free Trade system. Among other things, he said:— "One may note just here the curious fiction that England is the land of free food, a fiction, but firmly believed both at home and abroad by the uninformed. As a matter of fact, the receipts from customs duties upon the things that the English eat, drink and smoke, plus the excise taxation of them, make together much the largest item of the Imperial revenue of the United Kingdom."

NET RECEIPTS FROM CUSTOMS

Table with 2 columns: Item and Amount. Includes Tobacco and snuff, Tea, Spirits, Sugar, Wines, Currants, Corn and grain, Coffee.

NET RECEIPTS FROM EXCISE

Table with 2 columns: Item and Amount. Includes Spirits, Beer.

Total net receipts from customs and excise.

The small war tax on grain has been dropped, but that duty made a difference of only \$12,000,000 in this calculation.

The fact is that the British pay taxes on what they eat, drink and smoke at the rate of \$5,500,000 weekly.

The revenue raised from table necessities is a heavy one—\$494,400,000 per annum on tea, coffee, sugar and currants alone.

In the light of these statistics the contention that England has free trade or even a free breakfast table can scarcely be maintained.

On the question of British tariff reform Mr. Collier said:— "There is always wide advertising of the fact that England still leads in the volume and value of her export and import trade over Germany of the United States or other rivals, but no honest analysis of the facts. What boots it how fast England goes ahead if her rivals go ahead faster than she does? What a silly fellow we should dub the youth who congratulates himself upon having grown so much stronger, 'so much heavier, so much taller in ten years, if all his rivals had during that time grown even stronger, heavier and taller than he. Between 1886 and 1904 Germany increased her exports of manufactured goods \$415,000,000. During the same period England increased hers \$300,000,000."

Far more important even than that, Germany, by her system of protected industries, is keeping her men at work in her industries and on her soil.

In 1894, Germany exported 26 out of every 10,000 men, in 1907 she exported 4 out of every 13,000 men. In 1894 England exported 9 out of every 10,000 men. Between 1903 and 1907 the increase of men leaving England for other countries was 61 per cent."

And there has been no falling off in British emigration in the last six years.

Canada does not complain of the effect of the British system in promoting emigration, for she is now receiving a large proportion of it, but such an effort is far from commendation of the British fiscal system.

Free Trade, "as they have it in England," has sent millions of British men and women to live under other flags.

A proper fiscal system such as the Unionists are now proposing, would have kept most of them at home or sent them to the British Overseas Dominion for the upbuilding and strengthening of the Empire.

Corns? Have You Any?

If so, you want to try Putnam's Corn Extract; it is not a cheap corn salve, but a genuine 25c. cure that does remove corns in twenty-four hours. Be sure and get "Putnam's Extract," 25c. at all dealers.

hospitals, where sisters are attached that expressed their willingness to take as patients a certain number of poor.

The debate on the subject was a stormy one, and the conservative, Mr. Fony Michaud, came to blows. The combatants were parted with difficulty. They have appointed seconds and a duel is likely to follow.

SEEDLESS APPLES FOUND AT LAST

After years of search and experimenting by students of pomology at college on the old farm to produce a seedless apple with success, a former New York man, Julian A. Dorrance, has discovered it in his orchard in the Village of Scotland.

Mr. Dorrance is a retired jewelry manufacturer. Two years ago he bought a farm in Scotland. He had read of the experiments by pomologists for seedless apples but thought little of it. His find was purely accidental. The apples, which are of the Porter variety, were picked from a tree that produced six bushels, and of the apples differed in shape, and on opening one of these Mr. Dorrance perceived that it had no seeds. He picked out a bushel of these new-fangled apples. He says the seedless apples have the same flavor as those with the seeds, but the meat was much more solid; also, while the apples with seeds are practically all gone, those without seeds are in perfect condition. Mr. Dorrance is going to store them to see how long they will keep.

News of the discovery soon reached the Agricultural department at Washington, and A. D. Shomes, head of the pomological division of the department, has written to Mr. Dorrance, saying that the department wanted all the information obtainable in regard to it. Mr. Shomes wrote that he had never seen a seedless apple and asked to have samples shipped. Mr. Dorrance has done so.

As to how this type of apple came Mr. Dorrance does not know. He thinks that this tree has long had the habit of yielding a seedless apple and that the phenomenon was overlooked by the natives. So many things of unusual nature happen in Windham Co. that the inhabitants think little of, let alone telling about them.

It is expected that the Agricultural department will send a representative to Scotland to inspect the tree.

The Dorrance apple, reduced to "seeds" or used in pies, the flavor of the seedless apple is declared to be finer than that of the seed apple.

HOW TO AVOID COLD WEATHER DISEASES

To prevent cold weather diseases, put your body into a proper healthy condition to successfully resist them. Colds, grippe, bronchitis, pneumonia, catarrh, typhoid fever, rheumatism and other ailments may be escaped in most cases, if this is done. Build up your health and strength—your nerves and blood and entire body—into such shape that you can count on good health all during the winter months—by taking Rexall Olive Oil Emulsion, the ideal blood, nerve and body builder.

This is a remarkable medicine, but a common-sense one. It doesn't stimulate, so-called "tonics" that stimulate give you no permanent relief; but leave you worse off than before. Rexall Olive Oil Emulsion contains none of these harmful, stimulating ingredients, such as alcohol and dangerous and habit-forming drugs. Its great benefit to you is through its real nerve and blood and body-building effects. It nourishes, builds, strengthens. Its merit does not rest on making you feel better for a few minutes at a time after taking it, but on making you feel better as a result of making you well.

Rexall Olive Oil Emulsion is the ideal blood and nerve-food tonic. You who are weak and run-down, and you who are apparently well now, but are liable to suffer from various cold weather ailments, use Rexall Olive Oil Emulsion to get and keep well and strong. For the tired-out, run-down, nervous, emaciated or debilitated—the convalescing—growing children—aged people—it is a sensible aid to renewed strength, better spirits, glowing health.

Rexall Olive Oil Emulsion—King of the celebrated Rexall Emulsion—is for freedom from sickness of you and your family. You'll be as enthusiastic about it as we are when you have noted its pleasant taste, its strengthening, invigorating, building-up, disease-preventing effects. If it does not help you, your money will be given back to you without argument. Sold in this community only at our store—The Rexall Store—one of more than 7,000 drug stores in the United States, Canada and Great Britain.—McKinnon Drug Co., Charlottetown, P. E. I.

ACCIDENT TO MR. PUGSLEY.

ST. JOHN, Dec. 8.—Hon. Mr. Pugsley is unable to go to the Fielding banquet at Montreal, Tuesday. He has sprained his ankle and the doctor advises him to spend several days in the house.
