**CURE SICK HEADACHE**  
Headache, yet Carter's Little Liver Pills are equally valuable in Constipation, curing and preventing this annoying complaint, while they regulate the bowels, stimulate the liver and regulate the bowels. Even if they only cure the headache, they are worth the price.  
Ache they would be almost unbearable to those who suffer from this distressing complaint, but those who once try them will find these little pills valuable in so many ways they will not want to be without them. But after all sick headache is the bane of so many lives that here is where we make our great boast. Our pills cure it while others do not.  
Carter's Little Liver Pills are very small and very easy to take. One or two pills make a dose. They are strictly vegetable and do not grip or purge, but by their gentle action please all who use them.

**Highland Mary Limited, Larder Lake 10 Cents Per Share**

Several months ago we offered Two Million Five Hundred Thousand shares of Blue Bell at 10 cents per share. It was quickly over-subscribed, and thousands of dollars were returned to disappointed applicants. Soon after we placed Lucky Boys upon the market, and offered One Million Shares at 6 cents per share. Applications were received for these shares in such abundance that we were again compelled to disappoint many clients.  
The fortunate purchasers of Blue Bell and Lucky Boys have already witnessed an advance in these shares of fifteen times the purchase price of Lucky Boys and ten times the purchase price of Blue Bell. These advances are insignificant, however, in comparison to the advances that are still to take place in these shares. We are confident of the development, and are advised by our engineers that there are now thousands of tons of rich ore in sight amounting to millions of dollars. We strongly advise every shareholder of Blue Bell and Lucky Boys to keep what they have. Within the next year or so ten times the present value will be reached.  
Never in the history of mining has such an opportunity for making money been presented as is now offered in the Larder Lake gold district. Put your money in the Highland Mary Gold Mines, Limited. One of the greatest opportunities that have ever been offered for investment in a gold mining company. The Larder Lake district will be the wonder of the world, and Highland Mary is in the heart of it. Miners and prospectors from all parts of the world are flocking to Larder Lake, bringing with them millions of dollars worth of mining equipment. Their representatives and mining engineers into the field, and are rapidly snapping up everything that can be purchased. This is the time for investors to get in on the rock bottom is NOW - THE PRESENT TIME.  
The opportunity offered in Highland Mary will probably never occur again in this country. Investors should accept this opportunity and buy in one of the greatest mining companies that will be known in this new Eldorado at the present rock-bottom price of 10 cents per share.  
We have gone to great expense, and have used every method available to learn and know the exact situation in the Larder Lake district. We have sent a number of reliable mining men in different directions and to different locations. We have established our own assaying office on the ground at Larder Lake, putting in charge of it mining engineers of known ability and reputation. We have not taken over a single claim that has not shown actual merit; that is to say, with free, viable gold there has never been a gold district known that has shown the wonderful wealth of quartz veins containing free, viable gold as now actually existing in the Larder Lake district. We have quartz veins assaying gold from \$200 to as high as \$12,000 to the ton, that vary in width from 8 feet to 160 feet.  
The Highland Mary properties consist of 1,200 acres, being 33 well-selected 40-acre gold claims, undoubtedly and unquestionably the choicest of the district in this country.  
Now, we want to make this plain. In the gold fields of Nevada, where the gold camps have gained renowned reputation - in camps as well known as Tonopah, Goldfield, Searchlight - and other camps where millions upon millions have been made from claims varying in size from 10 to 20 acres. Just think of it. Ten or twenty acres running into values as high as from \$50,000,000 to \$100,000,000 each. Mining men we have in the Larder Lake district who are well acquainted with the Nevada camps, claim that the Larder Lake district is so whatever. Even the Rand in Africa, it is believed, will not come up to the wonderful gold district of Larder Lake.  
We have received in our office in the past week many samples taken from every claim owned by the Highland Mary Company. Out of these we have had a great number of assays made by our own assayer on the ground. These assays run all the way around \$200 - the lowest - to \$20,000 - the highest. Our assays on the ground, of course, cannot obtain as high assays as in laboratories in Toronto, where we have obtained the highest assays, running from \$27,000 to \$42,000 to the ton. Therefore, it is safe for us to state that the assays made by our own engineers on the ground are considerably under what we would actually receive were the stamp mills that the Company will install on the property. And upon this point we are in a position to state, by the use of which every particle of gold produced will be saved.  
Could every investor come to our office and see the wonderful quartz samples, with gold showing in every portion, they would need no further urging or any further argument to convince them what Larder Lake is and what it is bound to be.  
Investors who do not take advantage of this wonderful opportunity will, in a year from to-day, see and realize the great opportunities that they had to invest their money with great profit. We are in a position to today, and we feel that we are judging rightly when we say to these investors: "Put your money into Highland Mary now. Every hundred dollars that you invest in this present time will, in a year from to-day, bring you many times that amount." This may seem to be a broad assertion, but consider well the great amount of territory and consider well the millions that are made from properties consisting
