SHORT SUBJECTS **JERRY and JOAN**

Fox Farming In Scotland

Foundation Stock At Ross-Shire Was Purchased 12 Years Ago From Charlottetown Ranch

The following interesting article appears in the Sept. 15 issue of the Aberdeen Weekly Journal.

No one has been bold enough yet to suggest that our northern farmers might adopt fox breeding as a side-line. That this might, with profit, be adopted by some is not, however, beyond the bounds of possibility. At the North of Scotland "Industry Exhibition in Aberdeen" last week I had an interesting talk with Mr. Fred Ballinger, who manages the Silver Fox Farm at Stittentham, Ainess Ross-shire and who was a pioneer in bringing to Great Britain the first breeding stock of such animals from Prince Edward Island. That was done in 1920, and, therefore, his farm in Ainess was the first centre, in this country, of the British silver fox industry, which is now of considerable extent.

Snow Belt Farms is a private company which has as its directors Col. the Hon. L. M. Campbell (managing); the Earl of Leven and Melville, the Hon. I. Leslie Melville, Major J. Stirling, and Mr. M. L. Campbell.

There is a British Silver Fox Breeding Association which controls the industry through the medium of an official register of approved animals. At the end of each year an inspector examines the herd at Ainess, as elsewhere, and picks out those which come up to the recognized standard. Approved foxes are tattooed in one ear and have their registered number marked in the other.

They are bred to provide various types of fur, technically termed pale silver, half-silver and three-quarter silver. On a stand in the exhibition are three choice five-month-old cubs, two showing the beauty of the three-quarter and the other half silver fur markings. They are, of course, specially selected for their quality and for docility also.

One in particular enjoys being stroked and petted. Mr. Ballinger assured me that his foxes are not, as a rule, vicious creatures. But of course there is an art in handling them. There would be just as much excuse for a farmer, accustomed to handling horses being kicked by a colt as there would be for a man who knows about foxes being bitten by a dog or vixen.

Mr. Ballinger, who had wide experience of fox farming in Canada, told me that the climate of Ross-shire was considered to be ideal for rearing fur animals of that kind, being much on a par with that of Prince Edward Island, which is the home of silver fox breeding. The "foundation stock established at Ainess consisted of eight specially selected pairs purchased twelve years ago from Messrs. MacKinnon and McLure, of Charlottetown. For several years afterwards further importations were made to enable the progeny to be mated up. The herd is now entirely British, with the exception of two Canadian vixens, which have outstanding breeding records.

At present there are 'sixty-five breeding pairs on the farm, kept in pens fifty by twenty feet in size. There are close upon 200 cubs, this year's litters having averaged just over four each. These are born in March and April, and in November or December are available for pelting, or for keeping on as breeding stock. Young foxes run in batches of fifty to the acre.

They are easy to feed as they devour with relish rabbits, slaughter-house offal, and cow carcase. Some weeks ago so cheap were lambs that a large number of young Blackfaced sheep was purchased, at very low prices—some, be it whispered, at less than 5s each—and these are being grazed to be slaughtered and fed to the colony of foxes. To such an extent has the industry developed that several firms now manufacture special fox biscuits, just as they do for dogs.

Scientific Breeding

I suggested to Mr. Ballinger that the stock might by now, be showing the effects of inbreeding. But he hastened to reassure me that the flock is being developed on a sound and scientific line-breeding system. As evidence of this he mentioned that the farm is still able to compete successfully on show benches with progeny from more recently imported stock.

220 Feet Under Atlantic Ocean

HAMILTON, Bermuda, Sept. 24.—Two men, protected against 4800 tons pressure by a curious device known as a bathysphere descended 2200 feet into the Atlantic Ocean today to set a new record in deep sea diving. They also described what they saw for those above.

The descent was made by Dr. William Beebe, New York scientist and the inventor of the bathysphere and Otis Barton and was several hundred feet farther down than Dr. Beebe had ever been before.

The experiment was made in the ocean seven miles off Nonsuch Island, Bermuda, from the tug Freedom, which rode in glorious sunshine atop a heavy ocean swell.

The newly perfected bathysphere was lowered over the side and Gloria Hollister took her place at the microphone to relay Dr. Beebe's impressions until he himself could be cut in.

The scientist's voice was heard very clearly on the downward trip and when the bathysphere reached a depth of 2200 feet, Dr. Beebe remarked on the tremendous roll caused by the ocean swell and it was decided to draw up the bathysphere.

It was a graphic story that Dr. Beebe related as he watched the black as night depths around him. Often he exclaimed at some of the undersea life, all of which carried its own apparatus to light a pathway.

Responding sometimes to the questions of Miss Hollister, he

A \$500.00 CAR FREE

We have on hand ten guaranteed cars, all re-conditioned and painted which we must sell this year. One of these cars will be given away free.

The list is as follows:

A 1928 Dodge Standard Six Sedan 12000 miles \$450.00, a 1929 Dodge Six Sedan 12000 miles \$500.00, a 1931 Willys Six Coach 13000 miles \$450.00, a 1930 DeSoto Six Sedan 6000 miles \$450.00, a 1930-31 Dodge "49" Sedan 8000 miles \$750.00, a 1930 Marmon Eight Sedan 17000 miles \$650.00, a Buick Eight Sedan 17000 miles \$750.00, a 1930-32 Chrysler Six Sedan 22000 miles \$550.00.

The number 1 car and the number 10 car of this list were sold last week, which leaves 8 now. Take your choice quickly. The prize of \$500.00 is worth winning.

Our plan is, that as soon as these cars are sold, we will call the purchasers together and they will make the decision as to who gets his car free, we handing back the settlement given us and allowing him to keep his car. This is up to \$500.00. The decision of the ten purchasers may be made in any way they desire so long as it is a fair way. Should they not be able to agree then we will decide a method to be employed. But you can be sure that one of these ten cars will not cost anything to the purchaser up to \$500.00 as we will hand that amount back to him if his car costs that much.

All these cars are priced 20% below Montreal or Toronto prices for the same cars and at least 50% below their real value. But we must sell in order to pay our debts. We will tell you as each car is sold.

"FIRST YEAR" IS CROWDED WITH LAUGHS

"The First Year," Frank Craven's blue-ribbon comedy farce of the stage, neatly spiced with wisecracks and alternate heartaches, brings Janet Gaynor and Charles Farrell, Hollywood's first string couple team, back to the screen. A delighted audience yesterday at the Prince Edward Theatre greeted this Fox version of the popular romance with all the fervor usually reserved for the opening of a Gaynor-Farrell picture.

The plot of "The First Year," briefly, is the drama of young love during the first twelve months of married life. In the picture, Farrell plays the Prince Edward Theatre's first string couple team, back to the screen. A delighted audience yesterday at the Prince Edward Theatre greeted this Fox version of the popular romance with all the fervor usually reserved for the opening of a Gaynor-Farrell picture.

Atton Hall School Fair

The Annual School Fair of Long Creek, New Dominion, Rice Point, Fairview, Ringwood and Nine Mile Creek Schools, took place on Sept. 14th. There was an attendance of over 200 persons. To Miss Jean Gorveatt, chairman, Nine Mile Creek, great credit is due for having so capably taken charge of the meeting. The meeting opened with remarks concerning the School Fair Work by the chairman. Physical Drill Competition by Nine Mile Creek, Fairview, Ringwood and Rice Point, took place and these were judged in the order named by Mrs. Albert McDonald, Long Creek, Miss Helen Doull, N.W. Dominion. The judges for Public Speaking were then appointed, namely: Mr. E. D. McPhail, Supervisor, Cornwall, Mrs. Ernest Turner, Long Creek. Their decision was unanimously in favor of Doris Currie, Fairview who gave an exceptionally fine talk on Patriotism. Lillian Darrach, Nine Mile Creek, gave a talk on The Planning and Preparation of a Vegetable Garden.

Mr. Brenton, Charlottetown, Judge of grains, roots, live stock and poultry, then explained what the qualities of grains, etc., should be. Mrs. Harper, East Royalty, also explained qualities necessary for prize winning articles in fruits, flowers, cooking and needle work. Mr. E. D. MacPhail discussed the great advantages of School Fair work. He also explained how he had judged the school work. He informed us that Hillsborough Hockey team had offered a silver cup to the Relay Race prize winners of the P. E. Island Schools. He then moved a vote of thanks to the chairman, Miss Jean Gorveatt.

The next feature was the sports which caused very keen excitement and provided much amusement. Mr. MacPhail was assisted in timing sports and giving out ribbons by Mr. Hector Currie, New Dominion, Mr. J. J. MacDonald, Nine Mile Creek, Mr. A. K. MacPhee, New Dominion and Mr. N. MacEachern, Long Creek. A special prize of \$1.00 was offered by Mr. Brenton to the prize winning poultry. Thanks is due Mr. William MacEwen, New Dominion, for providing a field for sports.

The following is the prize list:

Sidney And March In "Jerry And Joan"

Here is a drama of tense realism, a drama depicting modern youth, reckless, burning life swiftly, laughing uproariously, dissipating thoughtlessly. Youth with everything to win, flaunting the conventions, playing with love, gambling with destiny. Sylvia Sidney and Frederic March in "Jerry and Joan" now playing the Capitol give splendid portrayals of a young married couple caught in the tragic grip of misunderstanding, wild living, the usual triangle interspersed with humor, pathos. A startling climax which brings them to their senses before it is too late. Jerry and Joan is a picture you will like, a story of people who tried to be bad and failed. Don't miss seeing Jerry and Joan.

FALLS FIFTY FEET AND WALKS AWAY

TULSA, Okla., Sept. 24.—After falling 50 feet from a tower at the Mid-Continent Petroleum Company refinery here, Dan Murphy, Kansas city steel worker, walked away today with only a dislocated shoulder.

If you find it hard to push the curtain rod through starched curtains, slip your thumb on the end of the rod and it will go through quite easily.

- Wood—1 Fairview, 2 Ringwood, 3 Nine Mile Creek.
- Plant Diseases—1 Doris Currie.
- Insects—1 Doris Currie, 2 Chas. Betts, 3 Ralph MacLean, 4 Alton Burdett.

CLASS XII—SCHOOL WORK

- Exercise Book (a)—1 Vera Al-

commented:

"I can't see a thing. It is absolutely black. Now there are fish about two or three feet away. I can make out their forms from their own light. There are a great many of them. They are double. I think the double ones are fish coming head on. Those double lights. It is the most amazing thing now, the amount of light down here.

"It varies from pale blue to pale green, but on the very pale side—no deep tone. It must be the normal luminescence of these creatures."

When the sphere had almost reached its maximum depth, Dr. Beebe reported it was rolling like the dicens." The device is an airtight metal ball having steel sides an inch and a half thick. Before the descent, doors were battened down with sledge hammers.

The reason Dr. Beebe was unable to reach a 3,000 foot depth this afternoon was that at the 2,200 foot level water started to leak through a stuffing box where the electric light cables entered the bathysphere.

Previously the device had been sent down to a level of more than 3,000 feet without anyone in it.

Most Paralysis Among Children

QUEBEC, Sept. 26.—Of the 138 children affected by infantile paralysis in Quebec City and district since the outbreak of an epidemic early in August, ninety-four were under 7 years of age, thirty-four were between 7 and 10, and only six were more than 10 years old. This statement was made early tonight by Dr. V. Martin, Director of Municipal Hygiene, who announced two more cases had been reported in the last twenty-four hours, but the death list had not been increased. Almost one-third of the cases reported had been treated at the Civic Hospital here. Dr. Martin said, and the cures had been fifty per cent perfect. Sixty-nine cases were reported during August, and sixty-seven became known this month.

Spread newspapers under and around baby's chair. You will then find it much easier to clear up the crumbs and crusts that all babies hurl about during meal-times.

Eye Specialists Discuss Cataract

MONTREAL, Sept. 26.—Diseases of the eye engaged the attention today of ear, eye, nose and throat specialists who are here to attend the convention of the American Academy of Ophthalmology and Otolaryngology. Numerous technical papers were read and laboratory demonstrations given.

Cataract of the eye with reference to diabetes and other disturbances of metabolism was dealt with by Dr. Daniel B. Kirby, of New York. Under discussion, it was brought out that cataract opacity of the eye—was found in all ages from children to old persons. Every one over 60 showed traces of cataract, but not of the progressive type which requires surgical treatment.

The cause of trachoma is still unexplained, according to Dr. Harvey J. Howard, of St. Louis. It was

Spinning and Weaving

Send me your wool to be spun into yarn and wove into Blankets. The charges are: Single yarn 23 cents, doubled 26 cents per pound. Blankets \$2.00 and if unlanded \$1.85. It takes five lbs. of wool per blanket. Wool must be well washed and all dirt and burrs picked out. The size of single yarn is medium and doubled yarn fine, medium and coarse. Put shippers name on all parcels and owners name, address and instructions inside. Send by mail or freight. Freight will be paid on 100 lb. lots.
