—SENTENCED TO TWO YEARS John Gorman who was serving sentence for vagrancy in the Prince County Jail came before Magistrate yesterday morning and was sentenced to two years in Dorchester Penitentiary. He was charged with demanding money from Mr. S. Perry. Evidence indicated that he was the Perry store from the jail where he was allowed out on the grass.

—CHILDREN'S AID BOARD MEETS—The Regular Meeting of the Board of Management of the Children's Aid Society, was held in the Summerside Town Hall Tuesday evening the president Dr. J. A. Phipps presiding. The Truant Officer reported that there were no truant since the opening of the school, but that ten boys unaccounted for having stayed home in the full knowledge and confidence of their parents and were sent to the station to be sent to school. One boy 11 years had never attended school a day in his life. He was instructed to go to school with the school board, the Department of Education, and the Attorney General to see if some action could not be taken against the parents to compel them to have their children attend school. There had been a case when several boys had been sent to school and he stated that he was required by the Judge that the boys had been giving trouble since.—S.

—PERSONALS
Mr. and Mrs. Howard Waite, Summerside, spent Sunday in the guest of Mr. and Mrs. Maynard.

Mr. and Mrs. Thos. Mowse of P. E. Island, spent the weekend with relatives in Sackville returning home Monday. They were accompanied by Dr. Louisa Mowse, who has been in Summerside some time on the Island.

—OVERS LACK OF RED TAPE
MONTREAL, Sept. 11.—(CP)—Sir Wrench, founder of the Overseas League here today, expressed his appreciation in connection with the Empire Building scheme in Canada.

He said that the former men and women reporters, "I have a number of your flying squadrons and parties in Ottawa. I was impressed by lack of red tape in high office."

—CHURCHILL 510 MILES
Nelson House, Amery, and other points are shown on a map of the route.

—LAURENCE HANSON, Salvator officer at the Pas, bent on a mission. A salwar left the Pas on Monday, in a bicycle on his annual trip to Churchill, a distance of 510 miles. He set out over the road for there is no road to Churchill. Portage, and the railroad track bump over the hills. The map of his route are shown.

—NEW CHEMICAL Miracles Are Announced
By Howard W. Blakeslee
Associated Press Science Editor

DETROIT, Sept. 11.—(AP)—Four new chemical miracles—wall paint which kills disease germs, a terrific explosive, electrical weaving, and the first step in synthetic quinine from oil wells—were announced to the American Chemical Society today.

The antiseptic paints are made with a little chlorine or iodine, result of thousands of experiments. They were reported by S. S. Epstein and Foster D. Snell, Brooklyn, N. Y.

These paints kill typhoid and some other germs for nine weeks and retain some killing power after six years on the wall. They kill molds and yeasts. Uses are children's rooms, hospitals and damp places like breweries where molds and yeasts spoil beer.

The explosive is a combination of butadiene, the stuff with which Germany makes synthetic rubber, and ozone. It was discovered at Syracuse University, and is so sensitive its power has not been measured.

A laboratory explosion showed it

NO MORE PAINS FROM ACID STOMACH

Avoid eruel stomach pains, distressing flatulence, heartburn, hot or sour taste, mid-afternoon drowsiness and other disorders caused by acid stomach... DO ACID STOMACHS DO—use MACLEAN Brand Stomach Powder... to neutralize pain-causing acids... to cleanse your system... to assist in restoring your stomach to normal.

—COUNTY COURT—The County Court September term meets at Summerside on Sept. 17th. On Monday and seventy three summonses were issued mostly for debt some time.—S.

—ATTENDING GRADUATION—Mr. and Mrs. H. C. Chisholm and Elaine of North Tyton left Wednesday morning for Campbellton, B. to attend the graduation of their daughter Helen as nurse. They were accompanied by Mr. and Mrs. Reginald Aitken, Mr. and Mrs. Milton Carter and Mr. and Mrs. Miss Miriam Shaw of Charlottetown.—S.

—KENNEDY - Waite Nuptials
A very pretty September wedding took place at the Presbyterian Manse in Summerside on Friday morning, September 4th, when Doris Edna, daughter of Mrs. Earl Kennedy and the late Mr. Kennedy was united in marriage with Keith Leonard, son of Mrs. K. L. Waite and the late Mr. Waite of Kensington. The ceremony was performed by Rev. William Verwoerd. The happy bride was charmingly trimmed with sable fur, and accessories to match. Immediately after the ceremony the happy newlyweds left on a honeymoon trip through Nova Scotia. The happy couple will reside in Kensington where the groom is one of our many progressing merchants. Sincere wishes for a long, happy and prosperous wedded life is extended to the happy young couple by their many friends here.—H.

—AIR TRAINING
(Continued from page 1)

ed in schools established under the plan for the training of instructed in the United Kingdom recently.

As a ninth month after four months of training, the first group of air training schools centered in Canada the training plan is on the threshold of completion. All air observers and air gunners are being trained.

The first British students arrived in August and more are arriving in groups of 22 with regularity. These groups constitute classes for the elementary flying training schools. Progress of the plan was speeded up by bringing more schools into operation and by shortening the total training period for pilots from 28 to 25 weeks.

This month a total of 4,500 men are in training for air crews and 7,500 are serving in maintenance troops. The principal administrative and instructional staff numbers about 9,000. In all some 16,000 men are working in the operation of the schools and the servicing establishments supporting them. By Sept. 20 the schools operating will number 43 and by the end of the year will be 48 out of a projected total of 83.

—CHUNGKING, China, Sept. 10.—(AP)—Chinese authorities reported tonight they had cut off the rear guard of a force of 2,000 Japanese troops who advanced last Saturday from Mingkiang, in western Kwangsi province, to Hsien on the Chinese side of the border with French Indo-China.

The Japanese apparently intended to establish a new base on the Chinese side. The Chinese said, but the fighting is continuing.

—A little exploded in a metal apparatus. Fifteen feet away stood a water bottle. A bit of metal drilled two clean holes, one through each side of the bottle, something no bullet could ordinarily do.

The electrical weaving machine makes the velvet type of fabric. Velvet is ordinarily made by sewing in threads and cutting off their ends like mown grass. In the new way electrostatic forces pick up short threads, and shoot them like arrows, to stand on their heads, their tips sticking into a new type of resin coating the base fabric.

The resin will wash and iron after drying and the electricity strikes each thread arrow separately like the hairs on the head.

The quinine discovery vital in war because the United States supply comes from the Netherlands East Indies. Out of natural gas and other oil well gases they make a molecule known to be the essential thing in the synthetic quinine, atberin and plasmanchin. Both these synthetics were discovered in Germany.

Record Crowds At Alberton Fair Yesterday

The 14th Annual Exhibition at Alberton, Prince County, was held yesterday and broke all records for attendance and exhibits. The weather was kind, dull skies in the morning cleared by noon and lovely to day, as they thronged round the various exhibits.

His Honor Lieut.-Governor LePage was present, and was called upon by Mr. A. D. O'Brien, the president, to open the fair.

The Lieut.-Governor, with the address, expressed his pleasure at being present, and congratulated the people of Prince County on the way they have demonstrated the spirit of holding their fair. He said that the fair has been a success in spite of the fact that it is purely agricultural and educational, and should be an inspiration to those who produce to the world. The people of the Island have not lagged behind in their efforts to do their duty, and there have been more exhibitors from the Island to join the forces than from any other province.

Mr. J. W. Waugh, Mayor of Alberton, extended a very hearty welcome to the visitors on behalf of the town. He was very grateful for the response of the people to the fair, and the great numbers who were present showed that the effort was well worth while.

Hon. Dr. Thane A. Campbell, Premier of the province, in a short speech, spoke of the very high quality of the exhibition. The Alberton Fair continues to grow and improve, and the organizers should be proud of their efforts in raising such high standards. Premier Campbell then referred to the high quality of the exhibits, and the morning, linking the east with the west in a continuous paved highway.

Hon. J. P. McIntyre, Minister of Public Works, addressed the gathering, and referred to the new highway. Hon. W. H. Dennis, Minister of Agriculture, and Hon. H. H. Cox, Minister of Education, also spoke briefly.

Mr. O'Brien, in his remarks, said that in the new highway, the name "Campbell-Belt Highway" had been suggested. Never before had Alberton been such a crowd, and never before had there been such a marvellous showing of livestock. Exhibitors from east and west, and all the great co-operative air training schools, were present. The quality of the livestock, and the quality of the show, were excellent. The show was a success, and the quality of the livestock, and the quality of the show, were excellent.

—HORSE EXHIBITS
Alberton has been steadily gaining ground in the showing of horses at the Fair and county fairs. Many ways been kept in this department. These years ago, the quality of the horses, and the quality of the show, were excellent. The show was a success, and the quality of the livestock, and the quality of the show, were excellent.

—CATTLE EXHIBITS
There were a number of outstanding animals in the cattle ring and the juniors held the spotlight for a splendid showing in the "breeders' young stock" class. His herd was a strong one, and with Fred Ramsay very strong fourth. The Juniors showed up well in the calf clubs, and there were many new exhibitors in all classes.

Albert Boswell and Sons, of Summerside, had a remarkable exhibit of Jerseys and in the opinion of Mr. L. W. Roper, who judged them, Mr. Boswell had made wonderful strides in breeding this class in the short time he had had them. Mr. Boswell won the junior champion female for a very fine beast which would have taken grand city honors had there been such an award. Mr. Boswell also won junior male champion and senior male champion. Jesse Matthews, of Alberton, was awarded the senior female champion. This cow is a pronounced type and the most outstanding animal in Prince County.

—CHECK DISCHARGES FROM THE BOWELS
Bowel troubles, although happening at any time of the year, are more prevalent during the hot summer and early fall months.

Summer flu is one of the worst troubles, but diarrhoea, dysentery, colic, cramps and pains in the intestine, or any looseness of the bowels should have immediate attention.

The action of Dr. Fowler's Extract of Wild Strawberry is pleasant, rapid, reliable and effectual in helping to check the unnatural discharges.

It has been on the market for the past 94 years, so why experiment with new and untried remedies? Get Dr. Fowler's and feel safe.

The T. M. Barron Co., Ltd., Toronto, Ont.

Freetown Man Made President Of Council

NAPPAN, N.S., Sept. 11.—(CP)—Austin A. Scates, of Freetown, P. E. Island, was elected president of the Maritime Fertilizer Council at the annual meeting held today at the Experimental Farm here.

C. F. Bailey, of Fredericton, N.B., was named vice-president, while E. MacIntyre, Moncton, N.B., was re-elected secretary-treasurer. Directors for the term are: Dr. W. S. Blair, Kentville, N.S.; J. A. Murphy, Charlottetown, L. A. Murphy, Halifax, Kenneth John, N.B.; with W. H. MacEwen of Moncton, N.S., as the alternate.

John Clarke, of Sackville, N. B., was the principal speaker of the day, dealing with policies relative to the fertilizer industry throughout the dominion.

—SILVER FOX FURS Decline At Montreal
MONTREAL, Sept. 11.—(CP)—A variety of silver fox furs offered today at the closing session of the regular fall sale of the Canadian Fur Auction Sales Company. Of the total offerings 40 per cent were sold at an average price of \$12.58. The three-day sale opened here Monday.

Results of today's sale, with price changes from the June sale, follow:

Silver foxes, selected, 1-2 to 3-4 silver, 45 per cent of offerings sold, regular price \$24.65, nine per cent decrease on the June sale; regular 1-2 to 3-4 silver, 30 per cent \$16.03 average, six per cent decrease; selected full silvers, 18 per cent \$25.00 average, nine per cent decrease; regular full silver, 38 per cent, \$19.18 average, nine per cent decrease; inferior types, 45 per cent, \$12.59 average, eight per cent decrease; low grades, 40 per cent, \$4.48 average, unchanged.

—AIRPLANE FIGHTS Without Fighter
NEW YORK, Sept. 11.—(CP)—Plans for a living Bumblebee, a tiny anti-airplane of a new type for defence against bombers, were announced by Edward Chandler, Marine engineer.

The bumblebee plane would steer itself automatically by the sound of the attacking bomber and then buzz along with it dropping sound-directed bombs on its tail.

The bumblebee design calls for a plane which would be launched from a bombing defence station. When the course of a flight of attacking bombers had been charted with fair accuracy, the bumblebee would intercept the bombers until they were well within the range of the noise of the big ships. At that point a sound device would take over the steering and the little ships to the invader. The bumblebees, however, would not strike these ships.

—WORKING GADGETS
Mr. Chandler plans a set of four sound controls which would lead his bumblebees to buzz into line above and slightly ahead of it. The controls would also tend to keep the little bee at a pre-determined distance above the ship it intercepted.

Either the sound waves from the bomber or certain electro-magnetic radiations from the big ship could be used to trip from time to time an automatic bomb release in the bumblebee. These bombs, Mr. Chandler said, could carry devices which explode when wherever they reached an effective distance from the bomber. These detonating devices would be set off by sound waves or normal radiations from the large ship.

—WILL BE INDUCTED INTO MONTREAL CHURCH
MONTREAL, Sept. 11.—(CP)—Rev. Quincy McDowell, formerly of Sydney Mines, N.S., and formerly of P. E. Island, will be inducted as Minister of Masson Avenue Presbyterian Church here today. Dr. Geo. H. Donald, moderator of the Montreal Presbytery, will conduct his service.

Production of fertilizers and fertilizer material in Canada totalled 540,300 tons during the year ended June 30, 1939, compared with 516,459 tons in the preceding 12 months. These totals do not include calcium cyanamide, the figures for which are not available for publication.

DULL EDGE

—but Britain beat the offensive to the punch. The Admiralty officially announced that light British naval forces had begun "strong and repeated offensive action" against Nazi shipping movements and ports which were "vital" to Germany in the "event of an attempt to invade England." (By Douglas Amaron, Canadian Press Staff Writer)

LONDON, Sept. 12.—(Thursday)—(CP Cable)—The heaviest anti-aircraft defence barrage in this city's history—indicating an apparent change in defence tactics against sky raiders—today broke Germany's fifth nightly "all-out" aerial attack on London into scattered and for the most part ineffectual bombings.

One German plane was shot down in north London and its crew captured, as the hail of metal poured from the guns in an unending stream.

A second Nazi plane was brought down south of London.

(The technique of air defence of London has been altered, A. G. MacDonell, British writer, reported in a broadcast from London picked up by the Columbia Broadcasting System in New York.)

(MacDonell said the change was adopted for "a technical reason.") He added that new batteries were in action at different points and that the guns kept up their barrage instead of trying to find the Nazis before aiming at them.)

Twice the German planes approached the city in massed formation ready to deal the same death and destruction of the previous nights.

Each time the thunderous barrage, fired with the aid of only a few searchlights, scattered the Germans.

The Air Ministry, giving indication of the heavy resistance of the German raiders, announced that at least 90 enemy planes were destroyed Wednesday in the increasingly-heavy resistance to the air side.

Squadrons of German bombers were lashed about by the massed anti-aircraft fire, the most intense ever thrown up here.

Some of the guns in action appeared heavier than any heard before. The banging was so vigorous that sometimes not even the anti-aircraft fire could be heard. Shrapnel showers started last Saturday in the building housing the office of the Canadian Press.

As the firing went on without interruption, it seemed that a Nazi attack even stronger than past nights was being launched.

Just before midnight, as the noise of anti-aircraft and bomb explosions grew higher, the rolling thud of bombs could be heard in the north. A thick barrage hung in the sky in front of seven planes.

There was a shrill whistle of a dive bomber and shortly afterward many planes were aloft that their roar rose above the sound of the guns.

At the height of the burst 48 separate gun reports were heard in one minute.

As Londoners combed through shattered buildings for the merciful raiding the Air and Home Securities Ministries announced 18 killed and 280 injured in Tuesday night's raids, according to incomplete reports.

Casualties Monday night were placed at 400 killed, 1,400 injured. Raising the total dead since night-long bombings started last Saturday to more than 1,000. Total injured in the same period was placed at more than 4,000.

Searchers were still probing the ruins of the East End where the majority of Monday night's casualties occurred. The school was used as a temporary shelter for families whose homes were destroyed. It collapsed after being hit by a bomb.

Several streets in London still were roped off where time bombs were reported to have fallen. A number of these exploded during the day and buses and taxicabs followed circuitous routes to keep clear of the danger areas.

No plans for their organized removal had been made, it was said officially, and not even the 200,000 school children still remaining here would be sent away unless the de-

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile does not flow freely, your food does not digest properly. You get constipated. Your poisons go into the body, and you feel sour and the world doesn't look pink.

A mere bowel movement does not clear the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up." Harsh and gentle, they make the bile flow freely. They do the work that no other medicine can do. Ask for Carter's Little Liver Pills by name. Stubbornly refuse anything else. 25c.

mand becomes greater than it has thus far.

The day's first three raids brought hundreds of German planes into the action—as many as 125 at a time.

"Archie"—the many guns of the anti-aircraft—was firing at least 25 rounds a minute; the tremendous concussion forced pedestrians still abroad to run for the nearest shelter, were all but knocked from their feet.

—EXPERTS Discuss Post-war Period Product Problem
By HAROLD FAIR
Canadian Staff Writer

LONDON, Sept. 11.—(CP)—Establishment of a government-controlled and financed corporation to regulate price of primary products in the post-war reconstruction period was advocated by L. St. Clair Grondona, British economist and author, in an address delivered to the Royal Empire Society.

Mr. Grondona suggested that such a corporation, if given authority to make trades in wheat, nuts, seeds, metals, and other basic commodities as well as in textiles and fibrous raw materials could keep prices reasonably stable at a level fair to buyer and seller.

At present, such a body might establish depots in certain overseas countries to remove surpluses now accumulating due to loss of European sales. These surplus products would be reserved for use in the overseas countries paid part of their capital debt to Britain.

Grondona spoke after Sir Frederick Syles, chairman of the council, asserted: "We all recognize that the British Empire is the main instrument of defeating Nazi Germany. Equally, we must appreciate that the British Empire will be the principal agent in building a new world order in the post-war period."

Grondona said his system was an adaptation to primary products of the "gold points" policy of the Bank of England prior to 1914. This has stabilized the price of the world's supply of raw materials, the world applied to raw materials would have a similar effect.

—AN Elastic Policy
The corporation's policy would be elastic to the extent that it could always alter a datum line and its buying and selling price on a rest notice so as either to stimulate or retard production in accordance with the requirements of the world.

In order to preserve tariffs and imperial preferences all depots would be bonded stores and duties would be payable only when goods passed into consumption in Britain. In peacetime, the corporation would sell to buyers of all nations. By this system, Grondona contended, the minimum price would safeguard the producer against loss, the average would give him a profitable return and the average would not be beyond the purchasing power of the average consumer. It would eliminate the speculator in commodities.

For possible early application by proposed the plan for removal of overseas countries to remove surpluses provided the countries concerned paid part of their capital debts to Britain. Such debts owed by the Dominions and colonies and the South America republics had a nominal value of \$12,582,500.

Under this plan the corporation would buy debtor bonds in Britain to an appropriate amount and surrender them to the governments concerned in exchange for local currency. This would be obtained by these governments issuing internal loans to replace what had been overseas loans.
