Pimples Festered and Caused Disfigurement. Cuticura Healed.

"I had been troubled with pimples all over my forehead for almost two years. They were hard and red and burned badly, and at times were very itchy. Many a night I would wake up scratching the pimples, and then they would fester and caused disfigurement. This lasted about a year and a half.

"I read an advertisement for Cuticura Soap and Ointment so purchased some. After a couple of weeks I could see improvement, and after using three boxes of Ointment and two cakes of Soap I was healed." (Signed) Miss Margaret Cloake, New Waterford, Cape Breton, N. S.

Cuticura MADE IN CANADA

Soap 25c. Ointment 25 and 50c. Talcum 25c. Sold everywhere. Sample each free. Address Canadian Depot: Lymans Agencies, Limited, 286 St. Paul Street, W., Montreal.

SEES MARKET PROSPECTS IN NEWFOUNDLAND

Opportunities For Marketing Island Products Reviewed By Federal Official.

Favorable prospects for marketing cattle and dairy products in Newfoundland is reported by Mr. L. W. Roper, federal livestock promoter, who returned to Charlottetown last week. Mr. Roper had been sent by the federal department of agriculture acting under the instructions of his chief, Mr. R. S. Hamer, chief of the cattle division of the live stock branch, and at the request of different cattle breeding associations of this province, to investigate the marketing of Island cattle in Newfoundlond. He was also asked by Mr. S. D. Irvine, sheep and swine promoter, to interview a number of the Newfoundland breeders with regard to the sheep and swine situation.

Mr. Roper left Halifax on March 20th, by the steamer "Belle Isle" reaching St. John's on the following Friday. He stopped twelve hours en route at St. Pierre. There he interviewed a number of the importers of live stock. For many years Island cattle have been exported to St. Pierre, and on the "Belle Isle" was a shipment of beef cattle and hogs from this province.

Mr. Roper found on enquiry that quite a number of grade dairy cattle would be required in St. Pierre during the summer at fair prices. He got in touch with importing and exporting firms and made other contacts. He found that the Island stock was not selling to such good advantage as it has been selling in previous years. A better quality is desirable. A number of cattle are being brought in from Nova Scotia and Quebec.

On arriving at St. John's Mr. Roper interviewed the Minister of Agriculture, Hon. M. Walsh and his deputy Mr. Butler. They at once got in touch wtih farmers' organizations in the vicinity of St. John's and arranged a live stock meeting on Tuesday in British Hall. This meeting Mr. Roper addressed. There was a good attendance of farmers who were well pleased with the report which Mr. Roper had given them regarding the quality and the price of the Island cattle.

Formerly the Newfoundland Department of agriculture used to import live stock and sell them to the farmers, but this policy has been abandoned.

Mr. Roper was furnished with a full list of farmers, likely to require good dairy cows, at different points in the vicinity of St. John's. The prospects are, he said, that during the summer a considerable number of dairy cattle from three to seven years of age will be needed. Few, if any, young bulls are being asked for as the farmers are carrying on dairying practically on a production basis, the young calves going to outside districts which do not send milk to the city.

Mr. Roper also attended meetings of the milk producers of the Crosby Butterine and Pasteurized Plant and of the Harvey Butterine Factory in St. John's and East St. John's respectively. The patrons, (as they would be called on the Island) represent different sections of country. The impression formed from their remarks were that they will require quite a number of cattle to replace in their herds stock that is low in production. They also stressed the advisability of raising the standard of butter fat production rather than the quality of milk. At present there is quite a keen competition between the producers of pasteurized and non-pasteurized milk. Legislation is being sought for making it compulsory for all milk in St. John's to be pasteurized before being delivered. Should this go into effect, it might mean a reduction in the number of dairy cattle required, as some of the milk dealers are not able to afford pasteurized plants.

Mr. Roper drove by motor car through a number of the farming sections, visiting large dairy herds and gathered much information on market requirements. A considerable quantity of butter is exported from Canada and there should be a good market here for the Island product.

Mr. Roper was asked to send samples of both Island butter and cheese. He saw quite a number of dairy herds near St. John's, Ayrshires, Holsteins and Jerseys, with a few Guernseys. The foundation stock for a number of these herds was procured on Prince Edward Island.

Milk production in Newfoundland per cow is considerably lower than in this province. There is more barn feeding of cattle and not so much pasturing done as here. The cattle on the average were in as good condition as he had seen in any province. Some of the herds had 25 to 30 milkers. The milk retails in St. John's from 16 to 18 cents a quart, according to grade, compared to 6 and 8 cents in Charlottetown. Cream sells there at $1.60 a quart or 40 cents a half pint.

There is no cow testing done in Newfoundland and the farmers are anxious to have the Department of Agriculture take up this work and lend them some assistance in that respect as well as in the culling of the herds. Double the number of cows is actually needed to meet the demand for milk in St. John's.

From St. John's Mr. Roper proceeded to Cornerbrook, the headquarters of the International Pulp and Paper Plant. Here he visited Humber Mouth, Petrie's Crossing, Curling and other outports. The prospects for marketing cattle there are not as good as in St. John's because their herds are smaller. At the plant of the International Power and Paper Company a herd of fifty is being kept to provide milk for the employees. At times there have been 1800 at work but at present that number has been cut more than half. In this section practically all food supplies have to be imported. A considerable quantity had previously been shipped from Prince Edward Island but last year the volume of trade was reduced to one-third.

"I was given to understand," said Mr. Roper, "that Prince Edward Island's eggs, poultry and butter of good quality would be in demand. About two weeks before he reached there an order for ten head of cattle had been placed with a firm at Quebec. The manager of the plant has stated that next year he would be in a position to give an order for quite a number of Prince Edward Island cattle. The company had in mind the building of a much larger barn, the intention being to double their herd capacity as an increased quantity of milk is needed for their employees. The firm is also intending to erect a large piggery with a view of keeping a number of brood sows for the production of young pigs, the ultimate object being to cure ham and bacon. A large amount of this produce is needed in the lumbering camps.

From Cornerbrook Mr. Roper left by rail for Port au Basque and thence for home via North Sydney. He had many inquiries regarding Prince Edward Island bred horses, principally of the general purpose class and saddlers, the reputation of these having reached a high point in years past.

The Department of Agriculture is making a special effort this year towards the placing of young pigs among different farmers in order to have them raise their own pork and bacon in place of importing so much of the prepared product. He had been informed by Mr. Mitchell, one of the members of Parliament, that his constituency alone would require 400 hogs to supply his territory. There will also be needed a number of young brooding sows and young registered boars for late summer and fall delivery.

Mr. Roper pays a high tribute to the great kindness and proverbial hospitality of the Newfoundlanders. In his investigations into market conditions he was given every possible assistance from the agricultural officials and others.

The positions of large thunderstorms in Europe and the North Atlantic can now be determined by radio apparatus in the British Isles independently of weather reports.

Single dial tuning has no particular merit other than its convenience.

LIVESTOCK

(Canadian Press)

MONTREAL, April 10—Cattle receipts totalled 507 on the two Montreal livestock markets today. The cattle run was the smallest for the year to date. There was not much improvement in demand however and up to early today not enough cattle had been sold to establish market prices. Indications were that changes if any, would be in favor of the sellers.

Calf receipts were 433. Today's receipts on calves were very light and sales were fairly active. Prices were fully 50 cents higher than last week. Four or five picked calves made the top of $5.50 and fair to medium quality calves were around $4 with just medium kinds at $4.25. Common light veals and plain drinkers brought $3 to $3.50.

Quotations

Good and choice veal $5 to $5.50; common and medium $2.50 to $4.50.

Sheep receipts were 126. The lamb market was about steady. Good spring lambs brought $6 to $7 each, with common light kinds selling down to $3 each. Sheep were unchanged at $3 to $3.50 including old rams.

Quotations

Ewes, $2.50 to $3.50; lambs, good $6 to $7 each, common $3 to $4.50.

Hog receipts were 2758. Receipts included between 1500 and 1700 hogs held over from last week. Today's trading was slow. Some 500 of the best hogs were weighed up early at $5.50 fed and watered. The balance of the hogs were still unsold, at time of writing.

EXCHANGE

PRODUCE

(Canadian Press)

MONTREAL, April 10—Butter soared three cents to the highest levels in two years on the Montreal produce and dairy market today.

Light stocks and the tight statistical position pushed no 1 regraded butter in carlots or less to 30½ to 31 cents a pound. Today's prices were the highest since April 1931 when the 30¾ cents a pound mark was touched. Receipts were only 23 boxes.

Eggs were also higher priced being up half a cent to a cent a dozen. Fresh graded extras sold at 17½ to 18 cents, firsts at 15 to 16 cents and seconds at 14 to 15 cents a dozen. Receipts were 1,308 cases.

Current Ontario colored cheese was unchanged at 10¾ to 11 cents a pound Receipts were 19 boxes.

Potatoes were firm at 65 cents to 70 cents for New Brunswick or Prince Edward Island green mountains per 80 pound bag and 75 to 80 cents for Prince Edward Island green mountains per 90 pound bag.

TEACHERS! While in the City buy your new Easter Footwear at Purdie-Ferguson's Overstocked Shoe Sale. 8832-4-11-2i.

SUPREME COURT—A verdict for the full amount of a debt of $919 on a promissory note, and costs was given for the plaintiff in the Supreme Court yesterday in the action of James G. MacLeod of Hampshire vs. Roy Clark. Mr. Justice Arsenault was on the Bench. M. A. Farmer for the plaintiff and R. R. Bell for the defendant.

ROTARY LUNCHEON—Education as a preparation and equipment for the duties and responsibilities of life was emphasized in an interesting address by Rotarian Leslie J. Stacey at Rotary luncheon yesterday. Past President, A. A. Irwin presided. Rotarian Pickard thanked the club for flowers sent to him during his illness. The nominating committee submitted the following list of officers for next year: to be voted on May 1st, President, G. F. Hutcheson; Vice President, J. M. Murley; Secretary, G. J. Tweedy; Treasurer, Roy MacLure; Directors, Orrin MacGregor and Gordon Ives.

STAFF ENTERTAINED—Quite recently at the lovely home of Mr. and Mrs. Matthew Lee a most sumptuous chicken supper was given to the staff of Fred Trainor, the well known and popular plumber of this city. The evening was spent in speeches, songs and games, and included two beautiful solos rendered by Messrs. Fred Trainor and Ted Morrison, who are gifted with fine tenor voices. They were accompanied by Miss Mary Kelly on the piano. At the conclusion of the evening a hearty vote of thanks were tendered to Mr. and Mrs. Lee and after singing "For They are Jolly Good Fellows" all departed for their homes.

LADIES see the newest in Easter Footwear at Purdie-Ferguson's, also Holeproof Hosiery to match. 8832-4-11-2i.

RETURNS TO AUGUSTINE COVE.—Mr. H. E. Dawson, Clerk of the Legislature returns to his home today after seven weeks stay in the city in connection with his onerous duties. Mr. Dawson has discharged the duties for fourteen sessions, and is a most competent and obliging official, honoured and respected by all sections of the House. The past session has been one of the most exacting of his experience, due in a measure to the absence of the Premier, some of the duties of whom he had to assume, as "guide, philosopher and friend" of the members. An eight hour day is not practical for the Clerk of the House. He has to be on duty by eight o'clock in the morning and rarely finished before midnight or even later. Nor do his duties end with the Governor's speech—as do those of the members. Mr. Dawson has to complete his records and finish his other duties before returning to his home, but that now having been satisfactorily accomplished. Mr. Dawson leaves the city this morning, and all wish him a pleasant and profitable time on his farm till next session is called.

WILL THE CARS RUN NEXT SUMMER

Will the cars run next summer?
Sure they will in a greater number!
What is the reason they will not run,
Are we going to sacrifice all our fun?

Depression now is almost over,
By fall of '33 we will be living in clover.
Prices are soaring every day
That will help us, our bills to pay.

Sure the cars will run next summer,
It costs so little to buy our number,
When we get our cows on the grass
They will keep the old car in gas.

We need be good to the old sow,
Pork is advancing in price right now,
Butter and eggs are somewhat low,
It is helping the poor, is nice to know.

No good at all for us to get sad,
Times are not so awful bad,
Don't for one minute get in the blues,
Drive your car to the city, get all the news.

Step on her and pass every one you don't know,
If by chance you see a cop, go a little slow,
If we don't drive our car any more,
How are we going to get to the shore.

Our license being lowered sounds real nice,
I wonder if Mr. Bennett had the setting of the price.
By chance you, your horse, or cow, take sick,
You can get medical attention so quick.

We cannot afford to miss dollar day
Without the car it seems a long way.
When the merchants are selling clothes at half price,
We often get a bargain if not cut with mice.

Run your car next summer, I am sure it will pay,
Without a car all day Sunday would seem a long day.
What is the good of getting a sore head,
One hundred years from now we will all be dead.

—York.

American receiving sets are usually designed for use or 110 to 115 volt house light service, while European services are divided among many different voltages, mostly 220.
