

ON HER LAST RETURN TO HALIFAX

A RECORD LOAD OF ICE! THE NATIONAL FISH TRAWLER LEMBERG AS SHE LOOKED

NO PLACE LIKE IT

When a native of Prince Edward Island had sailed forth to the world, he engaged a room in a modest hotel in Boston, intending to remain there while he was far from work. "But you register?" asked the attendant, looking at the man. "Yes, Aster," said the traveler, "that's your name." "We are required to keep a record of all our guests." The man wrote his name and was about to lay down the pen when the clerk added: "Now take place, if you please." "What place?" "The place you come from. Where do you live?" "I live on the island." "Well, but what island?" The other looked at him in amazement. Then he said, with an emphasis that left no doubt of his feelings, "Prince Edward Island man. What other island is there?"

Still, not so bad if you know the ropes. Insert a "Wanted" and live in hopes. And hope fulfilled you'll find it your lot. If the "Guardian" of Charlottetown your ad's got a brightly worded line or two will surely result in a house maid queue. —From a Subscriber.

WON HIS BLUE

Everybody has heard the expression "to be awarded his blue," but not everybody could tell precisely what that distinguishes a "blue" as awarded to the man who shows such exceptional skill in winter sports as to cause him to be chosen to represent his University against the sister University. A "blue" is entitled to wear a blue blazer and cap adorned with the University arms in white silk. Needless to add, the honor is greatly coveted and in after years the blazer and cap become priceless treasures.

Oatmeal—a "new dish"

This has solved the oatmeal problem in thousands of homes. Stew raisins and mix with the cereal after it is cooked. Add the raisin juice also. The raisins furnish mineral salts and valuable food-iron. But best of all, they make oatmeal attractive with the lure of healthful sweets. Ask dealers for

Can Blowouts Be Prevented?

Practically, yes! You rarely experience or even hear of a blowout with Firestone Cords.

For in Firestone Cords blowouts are insured against by a construction that is peculiarly Firestone's.

Firestone blending of the different varieties of rubber assures the combination best adapted to tread, sidewall and the other elements of the tire.

Tempering, as carried on by Firestone, has an effect on the crude rubber comparable to the heat treating of steel.

Firestone air bag cure provides equal tension on the cords by placing them in smooth parallel lines and accurately drawing them into a position where they

are vulcanized into a permanently balanced tire mechanism.

These are the tested methods that in Canada's newest and most modern tire plant are giving car owners a product whose value is a challenge to quality tire builders everywhere.

Each month this year has marked a steadily increasing demand for Firestone Cords that has already necessitated manufacturing in double shifts.

Equip all four wheels with Firestone Cords and end tire worries.

PREPARATION FOR SPRAYING.

(Experimental Farms Note).

Those who have been accustomed to spray thoroughly for the control of insects and diseases each year will need no reminder of the importance of having everything in readiness to begin at the right time this year. Those who have sprayed irregularly in the past, or who have not sprayed at all, should be warned that insects and diseases take their toll every year. Some years, and in some places, certain kinds are more troublesome than others, but the only way to be reasonably sure of having clean and arjunated fruit is to be prepared in good time for the fight. If one has a pump which was not thoroughly cleaned and left in good working order last autumn, this should be overhauled before growth begins this spring. If left until it is time to make the first spray, which is often the most important one, the critical time might have come and passed before new and necessary parts of the sprayer are received and before the pump is in working condition. If the first spray is not given at the right time, it will be exceedingly difficult, if not impossible, to have clean fruit this year. The best caterpillar promises to be had in some parts of Canada, and this is easiest given for apple scab. Spray calendars, giving the proper mixtures to use and the times of application for the same, can be obtained free of charge from any of the Provincial Departments of Agriculture, or from the Publications Branch, Dominion Department of Agriculture, Ottawa, Ont. The time for the first spraying arrives just after the leaf buds have broken. If "a stitch in time saves nine," then, certainly a spray in time often saves the situation.

THE FARM GROUNDS SHOULD BE MADE ATTRACTIVE

(Experimental Farms Note).

The Canadian Horticultural Council believes that Canadian farmers are rapidly learning to appreciate comfortable, beautiful and edifying home surroundings because it is now beginning to be realized that it pays from a cash standpoint, that it will help country life to be what it should be, the most attractive of all, and because it will in no small measure and in conjunction with the rural telephone, rural mail, good roads and Radio help to keep the young people at home and contented. Farming should be, and some day will be, the most independent, attractive and satisfactory profession in all the world, and one of the most important steps towards that end is that of having the home surroundings just as attractive as those of our citizens who live in the town and cities. This end can be accomplished much more cheaply and with more beautiful results, as the farmer has everything including an adequate space to work with. The appearance of a place is a very safe index to the character of the owner. Poor stock, poor vegetables, diseased fruit trees and wormy fruit go hand in hand with unpainted buildings, shabby barn yards and a bare house with grounds unornamented, and yet the majority of our farms are in this condition. In fact, those with really well laid-out and well-kept grounds and orchards are the exception. Making the home grounds tidy and well kept, not only adds to the pleasure of life, but it is good business, for it should be remembered that the front yard of the farm is the show window of its place of business. It is also good business because it attracts the buyer for

the products of the farm or the farm itself as everyone likes to trade at a farm or a store that has an appearance of being up to date, well-kept, of having fresh goods, and we are willing to pay the price for these things rather than take a chance on the other. It also pays because well-kept grounds and buildings bring returns out of all proportion to their cost. In fact, in a consideration of this matter the word "investment" not "expense" should always be thought of.

Any farm, the house of which is framed with trees, porches shaded with vines, which possesses a smooth expanse of lawn, the objectionable features hidden from view by trees, shrubs, or vines, has risen in value entirely out of all proportion to the time or money spent. Such a place will sell for a great deal more than a neighboring place, exactly as good, but in the condition too commonly seen throughout the country to-day.

And the problem of beautifying the farm is not an expensive one, as the orchard trees may be so placed as to be of a very ornamental nature and profitable as well. In fact, landscape men to-day are using fruit trees for ornamental purposes more than ever before. With these as the main material plus shrubs, perennials and flowers tastefully placed in clumps and masses around the foundation of the house and in irregular borders, and with some vines to hide the bareness of the walls, the whole picture is changed. A home not a farm-house is the result.

Our farm grounds should be improved if for no other reason than that of the women and the children to whom the love for beauty appeals even more than it does to men.

Make the farm-house and grounds a real home not an eating or sleeping-place or an adjunct of the barns and other buildings.

Advertisement for King Cole Tea. The text asks "What Will You Put in the Pot?" and describes the tea as a "delicious refreshment—a distinct pleasure." It mentions that the tea is made from a cup of King Cole Tea—a mere fraction of a cent. The advertisement includes an illustration of a woman's face and a box of King Cole Tea. The box is labeled "KING COLE TEA" and features a portrait of a man, presumably King Cole.

Advertisement for Lydia E. Pinkham's Vegetable Compound. The headline reads "Healthy Mother Merry Children Happy Home". The text describes how the compound helps women maintain a happy home by keeping them in good health. It includes a testimonial from a woman in Winnipeg, Manitoba, who says she was "troubled with weak feelings, headache all the time, a cough, fainting spells and pains in my back and sides." She found relief after using the compound. The advertisement also includes a testimonial from a woman in Cumberland Bay, N.B., who says she was "troubled with weak feelings, headache all the time, a cough, fainting spells and pains in my back and sides." She found relief after using the compound. The advertisement concludes with the text "Thousands of women owe their health to Lydia E. Pinkham's Vegetable Compound" and "LYDIA E. PINKHAM MEDICINE CO. LYNN, MASS."
