BEAVER FLOUR. BEAVER MILLS LTD. THE T.H. TAYLOR CO. It is the prevailing supposition that all well-known brands of flour are about the same in quality and that one is just as good as another for baking. This is entirely wrong. The baking qualities of any flour depend on the scientific blending of the classes of wheat used, and the skill and care exercised in its manufacture. "Beaver Flour" is made from the choicest Ontario Winter Wheat, scientifically blended with Western Hard Wheat. It has all the good qualities of both in such proportions that it produces bakings of fine, even texture yet with body enough to be substantial. The flavor produced by "Beaver Flour" is that rare, nutlike "home-made" taste, so much sought after by all who enjoy good things to eat. "Beaver Flour" will improve your bakings. Try it! Sold by your grocer.

Some of the replies received are encouraging and the matter has been promised consideration, as it is yet too early in the season to give any definite answer. School education was the subject of an interesting address by Rotarian R. H. Rogers, Superintendent of Education at Rotary luncheon today. The speaker pointed out that the real problem so far as school education in this province is concerned is in the rural district. In some cases this is due to the indifference of the public though in other cases it is rather the effect of the cause of the trouble. Poor buildings, inadequate equipment and scarcity of teachers are some of the difficulties. The grouping of the scattered districts into larger areas and the merging together of the smaller schools with a single board of trustees to each group is the key to the problem, the speaker believed. The luncheon was presided over by Rotarian J. B. Robertson, who tendered Supt. Rogers with the hearty vote of the club and the conclusion of his address. A short
