—A largely attended meeting of the ratepayers of Sherbrook was held in the schoolhouse on Tuesday evening March 24th to consider the automobile question. The meeting called to order by appointing Wm. Riley, chairman and J. J. Hall, Secretary. Stirling addresses were given by Messrs McCallum, Chapple, Townsend, Raynor Evans and others. The following resolution was carried without a dissenting voice. Whereas the running autos on the public highways of Prince Edward Island is in the opinion of this meeting a public nuisance, a source of danger to life and property, a serious detriment to trade and a continuous cause of alarm to our people when travelling. Whereas only a few that is the pleasure-seeking, moneyed and very few of the tourist class would be benefited, and the large farming industrial and resident portion of the community would suffer. Therefore resolved this meeting is of the opinion that our Local Legislature should enact such laws as would prohibit the running of autos on the public roads of Prince Edward Island. Also moved that a copy of the above resolution be sent to our Local Representatives and the press. And also moved that other School Districts be requested to hold meetings and discuss that above question. —Com.

—The attention of the Railway officials at Summerside should be called to the crowd of young men and boys who make the waiting room of the station there a play ground during the time of arrival and departure of trains. These people have no business there at all and some of them are always ready to interfere with passengers, especially if they are a little under the influence of liquor. If the writer mistakes not a policeman was appointed sometime ago to keep order around the station but it seems that there is more work for him around the freight house and he cannot attend to both. If the Railway police or even the town officers would take a look around the waiting room they would find a lot to do. There is no doubt that if this crowd of loafers had not been in the waiting room on Saturday that the young man who was arrested for causing a disturbance there would not have caused any trouble. Those who witnessed the affair claim that he was quietly resting on one of the seats when some of this crowd began to fool with him. The result of which he got wild and started to do up any one who came within his reach finally landing in jail. His parcels which were left in the waiting room seemed to have disappeared suddenly. The railway people claim they know nothing about them and it would be easy enough for any of this crowd to make off with them and no one would notice it.

—If you are your own cake baker—and surely you are—you perhaps have noticed the difference there is in flour. There are two principal constituents, in flour starch and gluten. All wheats contained both, but in varying quantities. Ontario fall wheat is rich in starch while Manitoba spring wheat contains a large percentage of gluten. By combining the two kinds of wheat scientifically a flour is made that gives delightful results, whether for cake, pastry or bread. Millers are now blending these two kinds of wheat in such a way that the rich delicacy of the first is combined with the strength of the second—making an ideal flour. Expert cooks have given Blended Flour exhaustive tests, and they are one in the opinion that no other flour can make such white, light, wholesome cake; pastry and bread. Housekeepers will find Blended Flour without equal, both for making dainty foods and substantial baking, and they will find Blended Flour most economical too.
