Kryptok Double Vision Lenses

When the age of forty to forty-five years is reached one needs another pair of glasses—a pair for reading and a pair for distance vision. Kryptoks combine these two pairs into one, the upper half of the lens for distance vision and the lower half for reading. Kryptoks are not two lenses cemented together—they are two strengths of glass fused into one.

CARRIED AWAY
ARE YOU among the thousands of men and women who are CARRIED away by the catalog habit? Is there anyone in YOUR immediate family circle who is allowing this habit to run away with him? If so, there is work for YOU to do. This HABIT started more than forty years ago. It is THIS same habit that has stunted the growth of thousands of communities. It has built up a few enormously large CITIES at the expense of YOUR town. DON'T allow a habit like this to run away with YOU. Take the bit in your OWN teeth. Investigate for YOURSELF. FIND OUT. Talk it over with your HOME merchant. Get your heads together. That HABIT is hurting you BOTH. By killing this habit you benefit yourself, your children, your neighbors, your community. Spend your money at Home.
